Nathaniel: Greetings to you, my beloved friends, I am Nathaniel. I should like to extend special greetings to our new friends here at this time.

Since most of you here tonight are young in years and I mean by this that you are young in years in this sojourn. For all of you have been around for a long, long time. But I should like to address my remarks primarily to the younger generation of this civilization.

As you know your Earth and your solar system is about to experience some great changes. You are about to experience a cycle change that does not occur but about once in approximately 22,000 years. It will be a great experience, it is a great opportunity for your civilization and for that matter for your whole solar system.

Many of you who are of the younger generation of today are going to be the ones responsible for establishing a new civilization upon your planet Earth. You have a great task before you. It is going to require much wisdom, much love and much knowledge. Therefore it is going to behoove all of you who are seeking His Light, His love and His understanding to work diligently to prepare yourselves for the great task that lies before you.

Those who have been chosen for this work must prove themselves, must be tried and true. They must believe in their cause, they must believe in justice, justice for all, they must have a sincere desire to serve all mankind. The good of all mankind must be uppermost in their minds, for without true brotherly love you can never have a civilization that will stand. The lack of this has been the downfall of all the past civilizations upon your planet and there have been several. But you have reached the state in the evolution of your planet where this must now end and a true brotherly love must express itself in its fullness. For you are entering a new area of space, a new vibration where man will change. He will also become a new being along with his planet and his solar system. He will be able to comprehend greater things, he will think in different terms. Many things that he had not been able to comprehend in the past will soon be within his grasp.

If you would enter this new Age in this capacity, you must prepare yourself. You must purify your bodies, your minds and your souls. If the great Creator lives within you then your body is the temple of this Creator and would you ask Him to live in anything other than a perfect temple? Therefore it is necessary to cleanse this body, to keep it clean within and without.

Partake only of the things that will make this temple pure and wholesome and the same is true with the mind. A mind to comprehend the greater things must be pure of thought, must think only upon the things that are good, the things that are right, the things that are just. It must think not in terms of self but in terms of what is good for all.

Seek deep within yourself for the wisdom and the knowledge that you shall need. Intellectual knowledge is good and you need a certain amount of this but do not let it consume you for you will never find the true you by searching the intellect. This can be found only deep within your own being. It will not be found in the words or teachings of others, nor in the books that others have written. These are only their concept. No teacher can give you the true wisdom, the true understanding, it will only come by your true searching within, by following the guidelines that I have just mentioned. For the more pure you become of mind and body, the deeper you will be able to reach within to the true source of all knowledge and wisdom. And when you have found it here you will know that you know and this, my beloved brothers and sisters, is a great feeling of peace and joy, a great state of contentment, a great satisfaction in knowing that one has found himself.

A great teacher was once asked by his pupil what he would suggest as being the greatest thing to concentrate his studies upon and this great teacher answered saying, "My son, since you have asked me this question I shall answer you thus: understand and know thyself, study thyself and after many years of studying self if you were to ask me the same question, I would answer again and say to you to study thyself, O man. And after many more years if you were to ask me again I would answer in like manner for man to truly understand and know himself will require many, many, many lifetimes of study of self."

But do not let this discourage you for along the way you shall become wiser, more knowledgeable, you shall attain greater heights in your spiritual understanding. The ultimate is a long path but this does not mean that there are not many joyous places along the way and each rung of the ladder that you reach will have its rewards. Each will be greater than the preceding and this, my beloved friends will spur you on to ever greater heights.

As I leave you, my friends, I would like to extend to each of you my most sincere love and blessings. I would ask all the Great Ones, those who have attained great heights in His Light, to pour out their love and their blessings to each of you and may that Christ love be sparked in the heart of each of you and may each of you nourish it, cultivate it that it may grow rapidly to maturity.

Go in peace, my friends, go in peace. ☸
