

Caveat: These communications are informative teaching instructions for those who seek to increase their understanding of themselves and the magnitude of the future lying before us all. These lectures are not of a religious nature but rather deal with the science of human potential and evolution. This document is a direct transcription from the original recording. Although it has been checked for obvious errors, it has not been finally edited.

Oxal: Greetings in the Light, my friends, I am Oxal.

If those of you who are here tonight, who are old friends, will bear with me, I should like to speak with you for the benefit of your guests. I know that those of you who have heard my many dissertations, will have heard those things before.

I am of a group that is aboard a craft in your solar system, and we have been in your system for seven years in your calculation of time. However, we are not of this system. I shall refer to our system as the system of Arcturus, since our sun, Arcturus, is known to your astronomers. We have been attuned to your gathering since the beginning. We have heard your discussion in its entirety as clearly as though we were sitting among you. This may not seem possible to some of you, but a great deal of our scientific knowledge and functions would not seem possible at your present state of understanding.

The craft in which we are now living, perhaps also would amaze some of you. This craft is known among the Confederation as the Otavana. This was also known to some of your ancients. Our craft is one hundred and twenty miles in length, its diameter is thirty miles. We carry upwards to twenty five million people upon this craft. In short, it is in itself a miniature planet. We can sustain ourselves upon this craft for indefinite periods of time. Do you think my friends, this craft could have been built upon your planet? The very sight of it, if it were to come close to your planet, would bring great fear to the hearts of your masses.

We shall not land upon your planet, for our mission does not require this. We have come to your system by request, by the request of the Federation. We were requested to carry on our mission because of the powers of our people. Anyone aboard our craft could stand upon the surface of your planet and perform what would appear to be miracles to you. We are not bragging of our development, for we are humbled in the light of an everlasting love that is of such magnitude that our comprehension of it is only slight. In your time of need, we are honored to be of service to your system, and especially to the people of Earth.

There is much talk among the truth searchers of your planet of the new Age, and this is true, my friends, a new Age is coming into being, but not only for your planet, but for the entire system. As your system and all systems move throughout space they pass through areas—shall we say, vibrations—which bring about, changes, and the new Age is simply a change brought about as your system moves on its course through endless space.

The planet Shan has been lagging, so to speak, in its preparation for this change, and there has been great concern from civilizations on other planets in your system, that planet Shan would not be ready for the transition.

So great efforts are being made to speed up the progress of your planet, for unless your civilization is prepared for this change many shall perish in the change, not as you think of this word, but they will not be able to move with their planet, and through natural resources and by necessity will have to be removed and incarnated into another system.

We, of the Otavana, known among the Confederation as the Sons of Adoni, have come to perform a task for Earth people. We are bringing about an awakening among your people, not an awakening of any great knowledge or service, but rather awakening then to the realization that they must make a choice. That there are two ways to go and they must make a choice. To those whom we see who make the choice to serve their humanity, to follow the path of Truth, of love and of understanding, we pledge our assistance. They shall be guided into a way that will bring about new understanding, shall bring about a new way of life.

You will find yourself doing certain things, not knowing why. You shall find yourself following a path. We shall not at any time guide you or direct you in any manner that will be injurious to your person, but to all those who make the choice, we shall move in with truth, with light and with love and surround and guide all of those who make the choice rightly.

It is a pity that a civilization has to be guided and directed into a path that is so obvious, to prevent their destruction. So I say to you, people of Shan, we, the Sons or Adoni, are in your skies. We are watching

individuals, waiting for their choice. I should like to add that from planets within your own system there are many living among you, quietly going about their work, hoping to bring greater knowledge to Earth people, both scientific and spiritual. These people are much like yourselves and you come in contact with them many times not realizing this, but you say, "Why do they not make themselves known?" They have a great mission to perform. They are making a great sacrifice in coming among you, and in every case where they have become known, their work has become hampered and in most cases in order to perform their duties or their mission, they had to be withdrawn and replaced with others who were not known. Most Earth people, when they have discovered the powers of these people, immediately attempt to make

Gods, as you call him, out of them, they want to worship them, or else they want to kill them. There seems to be no in between, so to speak, and so these people come among you as one of you and work for your benefit, to attempt to bring understanding to Earth, man.

And now, my friends, I leave you by extending to you the love, the light and the understanding of my people.

I am Oxal. ❄
