

Caveat: These communications are informative teaching instructions for those who seek to increase their understanding of themselves and the magnitude of the future lying before us all. These lectures are not of a religious nature but rather deal with the science of human potential and evolution. This document is a direct transcription from the original recording. Although it has been checked for obvious errors, it has not been finally edited.

Teacher: This person standing by you is definitely interested in you. He is your teacher or counterpart. He has been with you and in touch with you all during your life on this planet. He has aided you when the going was rough. He has been by your side. You had more support and help than you realized or were aware of. During the war you had rough times. He was flying with you.

He says he is definitely from the Etheric realm, as we term it. He is definitely not from the Astral realm around our planet. He says, "We have complete control over matter." If he so desires he can manifest a physical body and walk among us. Those in the Astral realm are not able to do this.

Many of these things are difficult to try to put into words that you can understand, so that it is clear to you. We have tried many times, but the subject is so vast and far reaching that it is hard for you to understand it without having experienced it. There are many facets to all of it. It is all scientific.

The main thing Earth people need to do is to raise their consciousness, become conscious of more of the things that are. As we become conscious of these things, we search in the right path. As we get further into our true area of space or density, the better we will understand. The vibration of this area itself will affect our consciousness, and it will be easier for us to understand.

The subject of consciousness itself is so vast that it would take volumes to explain about the extensions of consciousness and its various divisions. As we evolve to higher states of understanding, we become more and more aware of consciousness itself, and the part it plays in life throughout the universe. For instance, there are beings who are pure consciousness, who have no need of an astral shell or a physical body. These beings can divide and subdivide their consciousness. So you see there is a wide field here in this one particular phase which would require many life times to get a clear understanding. Even we do not have a complete understanding of it.

It is very necessary at this time for everyone to be aware and to seek as much knowledge and

understanding as possible of all things, because all things tie together. The whole universe ties together in an oneness. Each is dependent upon the other. So it is necessary to have an understanding of all things to become well rounded or evolved.

Changes on planet Earth are coming more rapidly as time passes. We can expect the conditions we are experiencing now to increase for some time to come. All things we are experiencing now in our atmosphere, are fore runners of greater changes that are to come.

The greatest thing Earth man has to learn is to live together in understanding. To try to understand his fellow man and to suppress feelings of superiority. There is no nation on this planet who can claim any great superiority over another.

Man has to concern himself more with helping those with lesser understanding rather than try to bring about greater achievements for himself. For as he serves his brother, his own understanding will increase automatically. planet Earth has reached the point where man must learn to live together. It is his only salvation. It is now a must—either this or total destruction.

You, as many other individuals at this time, feel a greater urge within yourself. You are not entirely aware that this urge or urgency which you feel is the urge for knowledge, for understanding, and the closer we get to the new density, the greater this urge will be. Respond to this, my son.

So be it. ✿
