**Oxal:** Greetings in the light my friends. I am Oxal.

I should like to talk to you tonight about the situation that you find in your world today. There is a great revolution taking place in your civilization. It is striking close to you these days and is becoming a matter of great concern to all of your people. But do you realize that this is nothing more or less but the result of the errors of your generation and the generations before you? You are now reaping the harvest of the errors of your civilization in the past generations. Their selfishness, their shortsightedness, their greed is now paying off in revolutions. It is sad when we observe from our vantage point to see a civilization blindly going forward into a path that can bring them nothing but destruction, but sorrow, but madness. It is difficult to see at times how a people could be so blinded by their own egos, their own greed.

Among your young generation today are some very great and keen minds who see the folly of the ways of their forefathers, who are becoming weary of fighting useless wars for greedy people who would profit in the material by sacrificing the lives of others. They see the errors in your political, social and spiritual institutions and they are determined that their generation shall not proceed in the same path. Oh, I agree with you, that there are those that you call rabble-rousers, militants and revolutionists, but these are in the minority. Your institutions and your news media make sure that these are the ones that are given publicity. But this has been true in all generations of your civilization. It will be those who have the sincerity and the minds and the will to do something about a situation that they know is both morally and spiritually wrong. They are coming into a realization now that they too must move to the front and be heard. Unless they are heard and are listened to and are given the opportunity to work in behalf of what they believe to be right, they too, will become violent. The turmoil in your civilization will increase to great heights.

Do not sell these keen minds short for some of these minds that are incarnating into your civilization and have been for several years past, are well trained and well thinking minds who are not thinking in terms of self and today only, but are thinking in terms of what is

good for all and what is good for the future. It is going to be very difficult for them to be heard. Your great leaders are going to make them believe that they are being heard, but they are not going to deceive them for they have not the minds to be deceived.

It is not difficult for you to see what has been done to your civilization, to your planet, how its resources have been wasted in these useless wars. How its water has been polluted and its air has been polluted. Those who are responsible for this will do nothing until they are forced to do it. They think only in terms of profits. They do not think in terms of what is good for mankind.

They think only of what is good for them in a material way. Blinded as they are by their selfish interests, they are taking their own lives and do not realize it. It is sad, that great scientific minds, such as you have in your civilization can be so blinded that they cannot see the folly of what they are doing. So do not judge too harshly some of these who are trying in their own way to better a world that is about to destroy itself. This destruction, beloved ones, is much, much closer in possibility than you think or realize.

It has been said to you in times past that those who have made a choice to serve their humanity in the light of love and understanding shall be guided and directed. This, my beloved, is being done. Many people today are doing things that seem very foolish and unwise to your intellectual wizards, yet they are being guided and directed to do the very things that they are doing. In the days to come when they are able to survive by the things that they have done, your great intellects will look on in awe and plead to them for help. For the day is not far off when survival will be of great importance to Earth people and many will not survive.

I hope that you have understood in the proper light what I have said.

If you have not, the day will come when you will. I do not enjoy being a messenger of gloom, but there are times when these things must be said and there are times when it is necessary to bring these things to the attention of certain people. Perhaps I should restate that and say to the attention of all people who are willing to listen, who have ears to hear and eyes to see and act accordingly.

I leave you, my friends, by extending to you the love,  
the light and the understanding of my people.

I am Oxal. ✿
