

*Caveat: These communications are informative teaching instructions for those who seek to increase their understanding of themselves and the magnitude of the future lying before us all. These lectures are not of a religious nature but rather deal with the science of human potential and evolution. This document is a direct transcription from the original recording. Although it has been checked for obvious errors, it has not been finally edited.*

**October 20, 1973**

**Oxal:** Greetings in the Light, my friends, I am Oxal.

As Athens has explained to you we are going to give each one of you an opportunity to ask a question that may be in your mind and we will, to the best of our ability, attempt to answer it for you. This, of course, will be our version and understanding. I would suggest that you start at one point and continue around your circle.

**Questioner:** How are things going in the Mideast and what affect will this have on us, if any?

**Oxal:** At this time it does not appear that it will develop into a major conflict. In the first place neither your nation or the Soviet Union want to be involved in a major conflict at this time. However these things are not always 100% predictable. There are things that could happen that would bring about a major clash.

You will be affected in that your nation will extend aid to Israel and this is going to further weaken your monetary system and will be responsible for bringing about more inflation and more scarcity of food due to the inflationary prices. But at the moment we see no great involvement of the major powers of your planet. This, perhaps, will come at a later date. The major involvement will be between the Bear and the Dragon, at least to begin with.

**Questioner:** Are there any special changes that we will be able to notice at the time of the coming of the comet Kohoutek?

**Oxal:** Yes, this will have an influence upon your planet and your civilization. You can expect to see some unusual events in your skies as this passes over, which will bring fear to the hearts of many. It may even be the cause of suicidal tendencies in many of those who are of a very ungodly nature. It is going to receive much attention and speculation from Earth people and as I said before it will have other influences which will bring about certain events. It is a sign of the times and this is only the beginning of the phenomena, as you call it, that will be seen in your skies in the very near future.

**Questioner:** Are the spaceships that are now being seen here more for information or for negative purposes?

**Oxal:** Your planet at this time is being watched very closely. There is also much investigating going on by certain individuals from civilizations that are not too highly developed in their spiritual natures and in their love for their fellow man, their desire to serve their fellow man.

Some of these who are coming to your planet are scientific researchers from other planets who are not familiar with your civilization, its people, its species. They are investigating, they are checking your animal life, your plant life, your minerals and your human life. They are interested in knowing what type of beings you are physically and how you function.

But there are also many others who are not of this nature who are visiting your planet and their reasons are many. They are checking your nuclear stockpiles for there is great danger even in stockpiling nuclear energy. Too much of this stored in one confined area can be very dangerous. Through certain energies that it emanates it is possible for it to detonate itself when too much is accumulated in one small area.

Also, they are interested in watching the progress of your foolish wars. They are checking individuals also. Much preparation must be made for the times ahead. Many individuals upon your planet have been earmarked for certain missions and duties. Often they are following the progress of certain individuals who are not yet aware of their mission. Others they are working with or working on, gradually awakening them to a realization of what and who they are, what they are to do in the future.

But there is, at this time, an exceptional amount of this activity near the surface of your planet. Some of it is done to bring more of your people to the realization that they are not alone in this universe. There will be much action in the future around your planet, many craft will be seen, many events will take place. But 90% of this activity is for the good of planet Earth.

Much study is being done on your fault lines, areas of vortexes and on many things that Earth people, even their greatest scientific minds, are not aware of. There are many forces, many fields of energies emanating from your planet and to your planet of which your scientists have no knowledge. But all of those things

have their effect, their place and scientifically understood these things can be used in many ways. This is some of the work that is going on for you.

**Questioner:** Do our present heads of government know that in the past, the heads of world governments have been contacted by the Space people?

**Oxal:** Those who are now in power are well aware of visitors from outer space. They are all well aware of it, they know the complications, they know the implications, but they do not see how or where that this can be of benefit to them, so they would like to keep the people ignorant of these things as long as possible. But all of the great leaders of your world know full well of these beings.

**Questioner:** Could you tell us what kinds and how much food we should have on hand and how best to preserve same?

These are questions that are a little difficult for us to answer for you. Your method or way of receiving life energies are so far afield of ours and your types of food, that it is rather difficult for us of an entirely different civilization, to go into a great deal of detail in this. But it would seem to me that this information and ways of preserving food would be readily available upon your own planet. As I see back into your past somewhat, it would seem to me that your fruits and vegetables dried in the proper manner, would be your best quality of food. However if this is not possible you would have to use the methods that are available to you. I understand that your foods have been very much depleted in quality due to methods that have been used upon your planet and that it is very difficult to obtain food that is not contaminated and filled with poisons. I am sure that this knowledge must be available among your own people.

**Questioner:** How can we help to make people aware of what is going on, on planet Earth, of the need to develop spiritually and improve our physical bodies for the coming times without frightening them or giving them more than they can handle?

**Oxal:** All that you can do, my brother, is to plant seeds and to give them information that they can handle or are willing to accept.

Give them knowledge that is thought provoking that can lead them to some conclusions. For those who do not wish to believe, no effort that you could put forth could convince them for their minds are made up and they are closed.

You can only follow your own guidance, your own intuition in attempting to reach those and if you are observing you should be able to know very quickly how far you can go.

But rather than spending great efforts in trying to convince those who do not want to believe, who have closed their minds. It is better to put your efforts into

your own self-development, and in helping those who are trying to help themselves in their self-development and self preservation. Much life energy can be lost in trying to force your views and beliefs upon another who does not want them.

**Questioner:** Could you give us any more details about the action of the comet?

**Oxal:** No, I cannot go into that any further than we have already.

**Questioner:** Thank you for enlightening us concerning these matters.

**Oxal:** It has been my privilege to again speak with you and as

I leave I extend to each of you the love, the light and the understanding of my people.

I am Oxal. ✨
