**July 13, 1974**

**Yaum:** Good evening to you, my friends. It is my pleasure to come among you again. I will not be able to spend too long a time with you tonight. But if there are some subjects that you would like to discuss I will be happy to participate in the discussion.

I have been busy with many and various activities as the activity is increasing in every realm and especially upon your planet. Things are moving and changing more rapidly all of the time and there is much more to be done, to be recorded and to take care of, you see.

**Questioner:** As these things continue, does this mean that you will be with us less and less?

**Yaum:** This is difficult to say. It will depend upon the development of certain things and how much work is necessary to bring about the necessary things.

**Questioner:** Our activity here seems to be quiet right now.

**Yaum:** Perhaps this will change again. You see many of these things go in cycles and right now you are in a valley. Also there is not as much expected from you now as in the past.

**Questioner:** We hope that we are gaining strength for the future in this quiet time?

**Yaum:** You should be. You are all going to need much strength and courage in the future. Many of those who perhaps will not remain on this level too much longer, will still need strength and stamina and know-how in other realms in which they will be required to serve.

**Questioner:** Present company excepted?

**Yaum:** Well, you do not expect to remain in this level forever, do you?

**Questioner:** I do not.

**Questioner:** I would like to finish a few things I've started.

**Yaum:** Well, you no doubt will have the opportunity to do that.

It is true that you need hope and courage no matter what level of life you are on. For those who are

energetic and desire to continue on and to learn and grow, there will be the necessity of courage, hope and all of those things on any level in which you find yourself.

**Questioner:** Is there any speculation on the inflationary spiral in the short term future for possibly the next five years?

**Yaum:** The indications are that this will worsen. There are many reasons for this, one being the shortages of food supplies which will drive the food prices higher and higher, as you operate on a supply and demand basis. I'm sure that you are all aware of the world wide shortages but the people of your country do not realize the seriousness of the situation that exists worldwide. Some parts of your world already have starvation, famine and many of your other countries are almost on the verge of it now.

Your nation has been trying to supply many of these other nations to relieve their shortages. It has been done in a very unwise manner because of your profit system. But more and more nature is going to react which is going to bring about damage to your food supplies which will increase the shortage as time goes on.

Then your nation will no longer be able to supply other nations because they will have more than they can do to supply themselves. If at this particular time a great crop failure were to occur in your nation, for instance this year, you would have almost a famine situation. Only those who had great wealth would be able to purchase food because the prices would be so high. So these situations are going to worsen.

An inflationary period always occurs prior to the collapse of a system because as the inflation increases year after year, it finally gets to a point where the people themselves can no longer endure it. Also the taxes will increase as this is another phase of your inflation. If you will trace back into your history you will find that when direct taxation has reached a certain point there has always been a revolution or a downfall. For people can only endure so much and this is the same situation that is occurring again, only on a larger scale each time.

If you will trace back through your great “depressions” as you call them, you will find that each major depression has been greater than the one proceeding it.

**Questioner:** What will some of the problems and difficulties be for those who will make sudden transitions to another plane through catastrophes if they haven’t built strength, faith, trust and God consciousness?

**Yaum:** Those on the astral plane will face much the same situations that you will face here. It will be on a different plane but it will be just as severe, just as serious. Because you do not escape your responsibilities or your karma by transferring to another level of life. All must be fulfilled and those who think that by passing into the astral that they are going to avoid everything are much mistaken.

**Questioner:** They wouldn’t have the hunger problem specifically?

**Yaum:** Perhaps not specifically but they will have the equivalent of it so you do not escape by going to another plane. And those who think they are going to escape by committing suicide their trials and tribulations they will find that there is no such escape.

**Questioner:** Some of those who have passed into the astral realm report about their blissful experiences and the beauty there. Is this a rest period for a time, perhaps for the Higher Self?

**Yaum:** Oh, yes, yes! But you do not escape your karma or your responsibilities.

This time is the end of a great cycle and the situation is somewhat different than it would be normally. You are going into a new Age and there is a great cosmic change which is the end of a very long cycle.

**Questioner:** Will you please comment on the source of the powers of Uri Geller.

**Yaum:** This is a vast universe. There are many, many forms of intelligence.

There are those who are far, far beyond my understanding and you see, Earth people have such a very, very narrow view of infinity, shall we say, that it is impossible for them to conceive of what lies in infinity. For some reason, and I am not qualified to define what this reason is, it has been decided that Earth science should be shown some of the mysteries. Not really mysteries, but are mysteries to your level of life.

Your science has become very smug, so to speak. They have become very narrow-minded and are not quite ready to accept many of these things. They have closed their minds to much of what has been brought to them and have rejected much that has come before them. So these powers are trying to open their eyes a little bit, to baffle them, to place before them things that are far beyond their understanding, in hopes that

perhaps they might be able to humble some of the so-called great minds of your planet.

I believe they are being successful to a degree, although your scientists are attempting to explain everything in what they call a “scientific” manner. In other words they want to bring it down to their level where they can prove it on their scientific level. The “powers” are hoping to convince these people that they are going to have to raise themselves to a higher level in order to understand some of these things. It may seem that many of Uri’s demonstrations are done in a strange manner but we have to realize that the “powers” are working from a level of intelligence that is greatly separated from the intelligence of planet Earth. They are working on a much different vibration.

**Questioner:** Quoting from the “Uri Geller” book, will you elaborate on “the only extended extraterrestrial contact”?

**Yaum:** I don’t know just why this was said. Perhaps they are referring to the type of work that they are doing and from the level in which they are working. I do not believe that there has been contact prior to this from this level of life. You understand that this level of intelligence is coming from a far off part of the universe.

**Questioner:** These “demonstrations” seem similar to poltergeist activity.

**Yaum:** It may seem so to some people but this is because you do not understand what they are trying to accomplish, so we cannot draw judgments on what they are trying to do. They are working with a different group of people and they are trying to bring the consciousness of these people to a point where they would be humble enough to at least admit that there are greater powers than theirs and that things are possible that they had considered impossible. So they are learning that energy is not what they thought it was, that it can be transmuted from one form to another.

**Questioner:** Are these “powers” known by the Tribunal? Were they asked to help or did they just come in and do it?

**Yaum:** I do not think that this would be so. I think perhaps that this is known by the Tribunal of your solar system, that they would certainly know what is going on. They are not that unaware of what is going on.

**Questioner:** Could Oxal and his people have fulfilled this mission?

**Yaum:** Perhaps they could have, but this is not their mission. Each group that comes, comes for a certain mission and each mission is assigned to different ones who are capable of performing that mission to the fullest.

**Questioner:** Do you think that these “forces” that are using Uri are positive ones and will be helpful to our planet?

**Yaum:** I believe so. It is a force or intelligence that I don't believe has been used on other contactees. I think it has its purpose. It is reaching your top scientists which none of the other contactees had been able to do, as they had different missions. It had to be something spectacular in order to attract their attention. It had to be something that they absolutely could not explain away and here are these things happening before their very eyes. They see it happen, it comes in contact with all of their senses, there it is, they cannot deny it.

**Questioner:** Would you say then that Dan Fry, George Van Tassel and others have paved the way, conditioned them for things to come as their contacts have extended over a period of time but they were a different kind of contact.

**Yaum:** Yes. Science, in general, has ridiculed these people and put them down. So perhaps Uri's "powers" will be a breakthrough which you have never had before.

**Questioner:** Then this would be a great service to mankind? Yes it is, because it is getting worldwide attention, it is really affecting the scientists of every major country upon your planet. It is bound to bring about new concepts in your scientific world and this is what is needed if you are to advance beyond where you are now without destroying yourselves.

**Yaum:** There has been, so far, no demonstration of a negative nature by these "powers", such as lives and property being destroyed, etc. Demonstrations have to be extreme to awaken your people to learn that there is much in the universe that they are not aware of, that even higher intelligence's are not aware of. Life goes on and on, you see. There are many, many forms of intelligence's throughout the universe. It is full of intelligence, so there can be any number of levels of it.

I would not be able to explain these levels because I have not experienced many of them. I am aware of much but I am not aware of all and do not expect to be for eons of time. But a greater awareness of what does lie out there is necessary if your science is to advance as it should.

Now I must leave.

May the peace, the joy, the love of all these Great Masters be invoked upon each of you now.

Go in Peace, my friends, peace. ☸
