

Caveat: These communications are informative teaching instructions for those who seek to increase their understanding of themselves and the magnitude of the future lying before us all. These lectures are not of a religious nature but rather deal with the science of human potential and evolution. This document is a direct transcription from the original recording. Although it has been checked for obvious errors, it has not been finally edited.

Oxal: Greetings in the Light, my friends, Oxal here.

Though your numbers are few we still feel it worthwhile to contact you occasionally. Even though you are few in numbers perhaps your word can reach a few others, which we hope might be of some benefit to them.

We wish, from the bottom of our hearts, that we could give you more encouraging word of the position in which your civilization finds itself. Many of your people, although attempts are made to bring their attention to these things, are still ignoring them hoping that they will go away. But I am sure that all of you here are aware that problems do not go away by ignoring them. They are not solved in this manner. If you have a problem to solve, it can only be done through effort on the part of those involved.

Your civilization today faces many problems. In fact, they are so numerous that most of your people would rather ignore the situation than face it. Many of your problems have been ignored too long to avoid the consequences at this time. In other words, the die has been cast. The effect of the cause is already upon you. Yet, there are problems that could be solved if your people, through right action and right thinking, would act. They could rapidly put into action a cause that would counteract the effects of other causes.

It is not pleasant for us to be bearers of doom, as you call it. Yet we feel that people should know what they are facing, so that those who care to, can, as we have advocated over the years, prepare themselves physically, mentally, socially and spiritually. For only those who do this will find themselves at the proper place at the proper time, doing the proper thing.

Another great earthshaking event is soon to take place upon your planet very soon. It is hoped by us that each of these events as they occur—and they will occur and each will become greater in severity—that each of these will awaken more and more of the people of Earth who are left and will open their eyes to new horizons, that they might search out the knowledge, the understanding that will put them in a position to move on with your civilization, or the remnants of your civilization, into a new life of greater grandeur.

We shall have more to say concerning these things in the very near future perhaps in more detail. But for now we would ask Earth people who hear our word to prepare themselves to meet these times. And if they are to be successful in this preparation their actions must be prompt for they have a very short time to accomplish these things, as for most Earth people it is not easy and it will not be easy to make the change that is necessary for them to make in the short time in which they have to do it. Each one has the power within to do this, the God-given power, for each of you are creators in your own right. You are creating every moment one way or another. Every thought that you think is a creation, is setting in motion a law and you will be reaping the effects of this thought somewhere in time. We urge Earth people to think upon these things and to act while there is still a short time left in which to do it. If any effort is put forth to do this one is bound to reap some benefit for no effort goes unrewarded however small it may be.

I leave you, my friends, by extending to you the love, the light and the understanding of all my people.

I am Oxal. ✿
