

Caveat: These communications are informative teaching instructions for those who seek to increase their understanding of themselves and the magnitude of the future lying before us all. These lectures are not of a religious nature but rather deal with the science of human potential and evolution. This document is a direct transcription from the original recording. Although it has been checked for obvious errors, it has not been finally edited.

Joseph: Greetings to you, my children, I am Joseph.
Again I shall be brief.

The instructions that you have just read may seem to some to be extremely simple. Some may even despise them as being of little value in helping or guiding people.

In the complexity of your civilization those who think thus forget that the very essence in the life of a pupil is to be able to lay aside these complexities, to come out of your world into ours, a world of thought, where life is simple and direct, where the definition of right and wrong is clearly defined, where the issues are clear and to the point.

It is the simplicity that the pupil attains that enables him to attain the higher positions.

You have made your lives complex, a mass of confusion, a mass of crosscurrents in which the weak fall and only the strong survive.

If the pupil is to attain the attention of a Master, he must take his life in hand, he must wipe aside in his mind all of these complexities. For unless you become as a little child you cannot enter the Kingdom of Heaven, and remember the Kingdom of Heaven is the Great Brotherhood of the Adepts.

Think upon what I have said, my children, think well.

I leave you by extending the love, the understanding and the blessings of all the Great Ones.

May you go in peace and may you find that simplicity of which we speak.

Peace, peace, peace. ✿
