

Caveat: These communications are informative teaching instructions for those who seek to increase their understanding of themselves and the magnitude of the future lying before us all. These lectures are not of a religious nature but rather deal with the science of human potential and evolution. This document is a direct transcription from the original recording. Although it has been checked for obvious errors, it has not been finally edited.

Joseph: Greetings to you, my children. I am Joseph.

I would like to talk to you about the real you, not the physical chemical, electrical thing that you are functioning in. Nor do I refer to the lower mind to which you are attached.

Do you realize how long it took to create the real you? You were not created in a moment by some great Deity gathering up some dust of the Earth and creating you. That creation refers to the physical vehicle, and even that was not accomplished in a day. It was created out of the Earth itself, but this took many, many years, thousands and thousands and thousands of years in your time. You, the real you, took much longer. In fact, it required three other planets for you to evolve on before you could be brought to this one, so the time involved would be inconceivable in your time. In cosmic time it is not so long, but a cosmic day cannot be measured in your time. No one knows the length of a cosmic day in your time as it cannot be calculated. But let us get back to the real you.

When you came here, you were at the state of evolvement that we call pure mind. You were of such a high rate of vibration that you had to have a vehicle to function in here. This was because your rate of vibration was so high that you could not be held to this planet without a vehicle of a lower vibratory nature. That is why it had to be created out of the Earth itself, so that the vibration would be such that it could be held here. At this very moment, if you were to be freed from your physical body, you could not be held to this planet. The magnetic force which you call gravity, would not hold you, so in order to remain here, you have to have a vehicle of a denser nature.

You were given a body similar to what you have now to incarnate into when you came here. This body was created, or brought into being, through the plant and animal kingdoms. As I said before, this is a long process. The original bodies that you possessed were not nearly as refined as the ones you have today. They were more like the animals in appearance, with hair covering the whole body, etc. Your physical body has evolved through time to a finer vibratory rate, but it is still low enough to be held to this planet.

You were created out of Deity itself or Universal Mind, out of that partied portion of that Great Mind, and you are an expression of that Great Mind. Your purpose is to evolve so that your Deity may evolve as well. Everything in the Universe is in a process of evolution, even Deity itself. And Deity can only evolve through its expressions or creations. So you see, you have a great responsibility. First of all, you have a responsibility to Deity, because the more of its creations that evolve to a higher state of evolution, the more Deity itself will evolve. You would not want one of your children to cause you problems in your evolution. You would expect that child to evolve and grow, not only for the good of that individual, but also for your own good, your own opportunity to evolve.

Universal Consciousness is a very frugal mind, it does not waste. Anything that loses its usefulness, is no longer contributing to the evolvement of its Creator, and this will not be tolerated.

You have been individualized for many thousands of years, and as an individual, you want to be a useful contributing expression so that you and Deity and all of the creations of Deity may evolve. Each successive cosmic day begins at a higher state of evolution than the one which preceded it, and therefore, it is shorter because, as evolution develops, longer periods are not needed. Evolution develops more rapidly with each cosmic day because it begins on a vibration that is one octave higher than the previous one.

So, you see, everything is constantly moving upward to a higher state of evolution. Anything that does not move upward falls behind and eventually, is returned to the source from which it came. Perhaps you would have a little trouble selling these ideas to many of your friends, but this is the way we see it.

I have only very briefly scratched the surface of a subject that would require a great deal of study to begin to understand the real functions and their purposes in the great process of evolution. However, this gives you some food for thought, something for you to think about and exercise your mind.

Now, I have said enough. As I leave, I extend to each of you my love, my understanding, my peace, and to each of you, I extend the love and the blessings of the

Brotherhood. I invoke the blessings of the Great Ones who have risen to a point of evolution where they are devoted servants of Deity, those who really know the will of God, as you refer to it, and carry it out. They are the hands of Deity, working diligently for the evolvment of all.

Peace, beloved ones, peace, peace, peace ☸
