

Caveat: These communications are informative teaching instructions for those who seek to increase their understanding of themselves and the magnitude of the future lying before us all. These lectures are not of a religious nature but rather deal with the science of human potential and evolution. This document is a direct transcription from the original recording. Although it has been checked for obvious errors, it has not been finally edited.

Hatton: I greet you, my beloved friends, in the love and light of the infinite Creator. I am Hatton.

I know, my beloved friends, that there are many, many questions in your minds, many concepts that have come to you, that are not clear in your human minds. If it were possible, I should like to clear up many of these things for you, but as yet, it is not possible for us to do this. Some of these shall be cleared through experiences, experiences that shall come to you individually, for without the experience, you could not have a thorough understanding. But take many of these things into your meditation. Meditate upon them. While you are allowing the light of the infinite one to flow through you, in these times, many things can happen that will bring you enlightenment and understanding.

A great deal has been pondered among you concerning the consciousness of man. A thorough understanding of consciousness comes with evolvment. At your present level of understanding, it would be impossible for you to understand the full extend of the consciousness of man. But as man grows and moves ever onward and upward on the spiral of evolution, he becomes more and more aware of his consciousness. His consciousness widens and grows ever wider. It takes in more and more of the universal knowledge and wisdom, and consequently man's understanding of how to use this consciousness becomes greater and greater.

Man is able to extend his consciousness over vast areas of space and encounter experiences that would otherwise be impossible. The important thing at this time, beloved friends, is to use that which you have to the greatest possible extent. Use your wisdom and knowledge today, and use it in a reverent and holy way, with ever a high motive in mind. By so doing, your consciousness shall widen, shall extend out and take in more of this universal knowledge and wisdom.

Once man has truly taken this step in sincerity, placed it above all else, above all other things, then he begins to move rapidly on his course. This is not done without effort and sacrifice. Many comforts may have to be sacrificed to gain this knowledge. The great Masters

have not accomplished this without making these sacrifices, and they continue to sacrifice.

Do you realize that the Masters who are working in behalf of earth today, have made great sacrifices. They have given up great peace and comfort. They have left their homes and their friends and are passing through what is to them great discomfort and sacrifice, but they complain not. Neither do they think of their sacrifices, but they are spurred on by the great love that they have for mankind. For their desire to see man of Earth raised up out of the stench in which he lives.

Little does Earth man realize the sacrifices that are being made. How many earth people would be willing to leave their comfortable homes and work in your slums, to go there and live in the filth that exists. Once you have known life on the higher planes and return to conditions such as exists on planet Earth, you are doing exactly that. These individuals come entirely by their own choice as volunteers. They are not asked to come, they are not told to come. It is their choice through their great love for mankind.

The questions arose among you tonight as to whether we had forsaken planet Earth in our efforts to influence your leaders, to attempt to aid in preventing further warfare. I should like to clarify this at this time. We have not given up. We are still putting forth every possible effort to influence your leaders in their decisions, but we can only influence or attempt to influence. We cannot interfere physically. We cannot interfere with the free will of man. Only to the point where it is necessary to save your planet. Man must evolve upon his own as much as possible. To interfere with the evolvment of another only brings Karma upon the one who is interfering. But according to universal law, we shall intervene at the point of total destruction, that is our right.

I leave you, beloved friends, with my blessings and my love surrounding each of you.

I am Hatton. ❀
