Yaum: It is my pleasure to come among you this evening and to spend a few moments with you. My friends, is there something you should like me to talk about? I would much prefer to speak of the things which you are interested in providing we do not have to become personal, shall us say,

Questioner: That's the most interesting part, is the personal part.

Yaum: Well, friends, I believe that it is necessary for all of you to realize your responsibility to your civilization, to your fellow man. There is so much to be done today in your civilization if Earth man is to prepare himself for that which is before him and if the civilization of Earth is to survive. There seems to be today among most of you who have started in the search for truth, to have fear of ridicule, of being embarrassed or ridiculed by your fellow man, but no great advancement in your civilization has ever come about without those who were responsible for it facing condemnation and ridicule and all of these things. Today, as never before in your civilization, Earth man needs to broaden his horizons, his consciousness. He is going to either have to accept these new thoughts and new ideas into his consciousness, or he is lost from this civilization.

Great advancement is being made today by your peoples in their conquest of space, and this, my friends, is going to bring a great awakening to your people, providing, providing I say, your civilization withstands for a few more years without bringing destruction upon itself. For soon in the next few years, certain of your people in this conquest of space are going to reach other planets, and this, my friends, is going to be much sooner than you think. And the information that they will bring back, is going to be one of the greatest revelations to your civilization that has ever occurred. True, it is going to be very upsetting to many of your peoples, upsetting to the point where they will not be able to accept it. It will, their resistance, rather, to the accepting of this new information will be more than the minds can stand, you see, and perhaps, insanity will increase for a period, yet, it is going to do more for the advancement of your civilization than anything that could happen, you see.

It is as, as has been explained before, the great danger that your civilization faces today, is the race or competition that your nations are in at this time, in testing of nuclear devices. There is much more danger at this moment from dust than there is from a nuclear war. This has been gone over before, but to those of you here, I should like to bring this point out.

Here you have today engaged in a competitive race, two of the greatest powers upon your planet. Soon there will be others. So you see, my friends, this thing will build up. Each one feels that he must get into the race, therefore, your atmosphere is going to become so polluted with the debris of this nuclear test, that this in itself could bring destruction, and will if it continues, to your people. A destruction that would be even worse than a nuclear war, for it would be a slower process, and a great deal more suffering would occur. Unless the peoples of Earth unite in a common cause to bring an end to this madness, you are going to find, Earth people will find themselves in a very bad situation.

Great resistance is already being expressed in all the countries of your planet, and I sincerely hope that this will increase to a point where it will impress these leaders, that the people are demanding that this be stopped, and

I sincerely believe that each of you, each man, woman and child should be sincerely interested in doing something to try to avoid this thing. Many feel that there is nothing that can be done but if enough people oppose these things it will be stopped. It is much easier to sit and say there is nothing to be done but if man had done this and had not feared criticism, your civilization would not have today the things that you have. Man must have courage if he is to grow, if he is to accomplish anything at all, he must have courage. The time, my friends, is past for thinking. The time is for doing in everything.

If man is to grow spiritually, if he is to bring about a new age, if he is to bring into being a new civilization, then he must act. Well, my friends, words without action mean nothing.

Questioner: Could you suggest some specific things we could do in that direction?

Yaum: I believe, as do many others, that man of Earth must make his desires known to his leaders. He must let them know that he does not approve of what they are doing. Perhaps there are many ways this can be done. In your own country you have representation in your governments. In many other countries this is true, and where it is not, you find the people are beginning to come out and demonstrate. They are letting them know that they do not approve. It is going to be a matter of each group of people, nations of people or whatever you call it to do what will be the effective under their own system.

Questioner: Well in our country we have one group of scientists who say that the fallout is not our fault and that seems to be the problem, people question it.

Yaum: This is true, your people are confused. They do not know who to believe. Well, my friends, this is only necessary to stop and think. If this is not harmful, why all of the big meetings among nations in trying to come to some agreement to at least to be pretending to come to some agreement.

This in itself, should point out to you that there is danger. But your straight-thinking, sincere scientists, do know and are against this thing. It is only those who wish to go on and prove something regardless.

Questioner: Well, Yaum, is it not true though, that they maintain the reason for attempting to come together and agree not to test, is to stop the race for power rather than to stop because of the fallout?

Yaum: No, this is not so, this is not so.

Questioner: Well, I mean that's what we're lead to believe.

Yaum: No, it is expounded every day in your news facilities, that this is dangerous, that there is danger from this nuclear fallout. Your scientists, many of them, have come up openly, but they are not the ones who are backed by the great powers who would control the energies of your planet, but this problem has become so serious is why I have chosen to talk about it. I realize it is not a pleasant thing to think about. It is much more pleasant to ignore, but, I say to you, my friends, there will come a day where it will not be so pleasant.

Questioner: Well, we have to figure out a way then to help ourselves, figure out a way to get this to our leaders, through our representation. Of course, there are groups who are doing this.

Yaum: This is, this is true, and this is being done by many people, many groups of people all over your planet, not only in your country, in other countries. It is growing, and this will be the one thing that your people can join together in a common bond. People of your planet, for this is not a threat to any one nation, it is a threat to your planet. As your teacher Oxal spoke of this, I believe a short time back, and he mentioned that

when war has come to your nation, your peoples immediately join together in a common bond of survival, of protecting themselves. They forgot their differences in religions and what not, they joined together in a common cause, but so far there has never been an occasion when the peoples of your planet could reach a common bond to bring them together, because there has been so many barriers in languages, in religions, customs and what not, but this can be a combined thing, where all other things can be forgotten and your people join together in a common bond of survival. It would be well to give this some thought, for it is a very serious problem.

Anything that anyone does to bring the people closer together in a better understanding of each other, for people are not different, people are people, they all have minds, they are all created in the same manner, and if you are to converse with people through all of the different countries, you perhaps would find they all are thinking very similar.

Now, my friends, I think I have taken enough of your time. I wish to extend my gratitude to the members of this household for accepting me and to all of you for spending this time with me. It has been very nice being with you.

I extend to each of you my very deepest love and blessings and I know that each of you in your search for truth are going to make great accomplishments.

Go in Peace, my friends. ✿
