

Caveat: These communications are informative teaching instructions for those who seek to increase their understanding of themselves and the magnitude of the future lying before us all. These lectures are not of a religious nature but rather deal with the science of human potential and evolution. This document is a direct transcription from the original recording. Although it has been checked for obvious errors, it has not been finally edited.

Yaum: Greetings to you, my friends.

It has been sometime since I have spoken with you. I had a few spare moments today, so Anthon asked me if I would stop by and visit with you for a short time. It is my pleasure to once more be in your presence.

Now, what would you like to talk about? I will try to be brief today, so do not ask me difficult questions.

The situation on your planet does not seem to be improving, as you already know. The situation in the Middle East is not getting any better, and I do not see that the present negotiations and feelings between the parties involved are going to improve in the near future. I am afraid that all of these situations that are occurring upon your planet now are only a forerunner of a greater conflict that will develop, perhaps within the next two or three years.

The world economic situation does not look good, either. I wish that I could tell you that it does. Your financial wizards have backed themselves into a corner that they are going to have a very difficult time getting out of, for they have made such heavy loans to the minority countries. At the moment, I see no way that they are going to be able to repay these loans. If they default, your bankers are going to be in very deep water, and at the present time, it does not appear that there is any way that the loans can be repaid.

Questioner: Would they then change the money system, and would that be an opening for them to start a new process of exchange?

Yaum: There will be a great deal of maneuvering in the financial world to try to save the situation. If your banking institutions become bankrupt, and your government is already bankrupt, it is hard to see how your currency can hold up with any value. So something will have to be done. Either a new system must be created, or they will have to cancel all debts and start over. That would be the best solution they could use, but they will not be easily convinced that they should do this. They will try every other means, and I do not believe any of them will work.

Questioner: Do you foresee more earthquakes?

Yaum: You are going to see more and more of an increase in the Earth's fault line activities. There will be more and more unusual weather, such as floods and storms. This is because Mother Nature has reached the point where she has to start doing something about the exploitation that has taken place. You are going to see much upheaval taking place in the balance of this century, until you come to the time when once again the Earth will shift its poles, cleanse itself, and start over again to reproduce.

The Earth has become overpopulated. It has so much to give and then it must take in. Nothing can give out more than it has to give. When it begins to lose its ability to give out, then it either has to perish or go into a period of rejuvenation. That is what planets do when they become depleted in certain areas. It is a necessary cycle in planetary existence. Through the natural processes, much of the supply of minerals, etc., are washed into the ocean. Eventually, the lands become depleted, making it necessary for nature to reverse the situation. So it brings the replenished land up and the depleted land down. Thus, the process starts to reverse itself, but this takes time.

Questioner: I thought it would be interesting to discuss Universal Laws.

Yaum: When you speak of Universal Laws, there are so many that it would require study, such as you are doing now in your classes here. It would take a great deal of time and lecturing to go into them all.

Questioner: Could we start with self-control, as that is one of the most important laws?

Yaum: There again, you would have to go into all the different phases of self-control in order to understand. None of these things can be explained in a few words, you see. It is something that you have to spend some time studying. As you know, they are in written form and would require hours and hours of someone's time in lecturing to bring out all of these things.

Self-control is one of the most important things, for until Man is able to control his emotions, he does not grow very much.

There are many phases of emotions. Fear, of course, is the greatest enemy to mankind. It requires sometime

and some study to understand and to try to overcome these things.

Questioner: I have been reading a lot about subliminal control through television, books, and paintings. I wondered if Russia is into parapsychology and things of this nature?

Yaum: They have been going into this extensively. In fact, they started working on this right after World War II, and have been working with mind control—ESP, as you call it—and all of that type of thing ever since. Their intentions are not altogether good, however and as you know, these things can be very destructive when wrongly used.

Your government has also done much experimentation in this field. They have gained a great deal of knowledge, but they are more of what you would call a “Johnny come lately,” as they have not put as much time and effort into it as the Soviet Union has. You would be amazed to know some of the things that they are doing.

Questioner: Are some business using it to gain money through television by trying to seduce people into buying their product or watching their program?

Yaum: This has been done, but it is outlawed in your country. It is against the law, and if they are caught doing it, there is a severe penalty. No doubt there are some who are using it on individuals without their knowledge or the knowledge of the government. They have to be caught, of course. This is a rather devious way of influencing people.

Questioner: Does it really work?

Yaum: It surely does, but not on a highly developed mind, because they would become aware of it.

Questioner: Are we also being bombarded by new diseases and that sort of thing?

Yaum: Yes, these things are happening in the world today. There are individuals in certain countries that are using devious methods to transplant disease, or are causing mind frustration through what are known as radionic devices. The Russians have been doing some of that, and some of your scientists are aware of this. Through their own instrumentation, they have discovered these things being done. But the majority, and especially those in higher positions, have more or less ignored this, or have refused to accept that it could be done.

Mr. Tesla left many, many records. He had done a great deal of experimenting in radionics, but he never developed this to a point where it was made public. The Russians were able to obtain many of his records after he passed over, and they have been working on these things and developing the use of radionics more than your people have. Mostly, it is being used to the detriment of other countries.

Questioner: I understand that our scientists discovered a certain type of beam being directed into Oregon, and the crime rate has increased there. Is this what you were referring to?

Yaum: That is one of the places which were discussed by some of your scientists. In fact, it was talked about on a radio program. But there have been other places where this has been done. They have directed or beamed it in such a way that it frustrated these people's minds.

Questioner: Are we capable of doing that same thing to their cities?

Yaum: You are capable, but your scientists have been slow to recognize the possibility of these things. It does not fit into the normal sciences, so it is a “far out” thing to them. However, they are learning that some of these things that they have considered “far out” are a reality.

Questioner: Is the intergalactic fleet of spacecraft still overshadowing us?

Yaum: We watch your planet very closely. We are not going to allow your planet to be destroyed, as the Elder Brothers are watching it very closely to see that this does not happen.

Questioner: About two years ago, about forty whales beached themselves off the coast of Oregon. Why?

Yaum: They had probably reached the termination of their life, just as your elephants do when they are ready to make the transition. They have a place where they go, and it is what you call the Elephant Graveyard. Whales will sometimes do this by beaching themselves.

Questioner: Would this be true in the case of younger whales that are found beached?

Yaum: Perhaps these had become fatally ill because of the pollution in the oceans. You know your oceans are very badly polluted, and this is not advantageous to your sea life. It is a wonder that more of them have not died.

Questioner: Mr. Ingalese goes into what the more evolved forms of animal life are, such as the dog and the elephant. I was wondering if the porpoise, the dolphin and the whale are equally as highly evolved? They seem so intelligent.

Yaum: For their form of life, they are the highest intelligence. I am not sure that they pass above that. They may always stay a sea animal. I'm not sure about that, so I cannot answer that for you.

Questioner: Are you still in Communist China?

Yaum: That is my base, yes.

It has been my pleasure to spend this time with you. As I told Anthon, I would have to make it rather brief. As I leave I extend my love and my blessings to each of

you. I ask the blessings and the love of all the Great
Ones be bestowed upon you.

Go in peace, go in peace. Peace, peace, peace. ✿
