

Caveat: These communications are informative teaching instructions for those who seek to increase their understanding of themselves and the magnitude of the future lying before us all. These lectures are not of a religious nature but rather deal with the science of human potential and evolution. This document is a direct transcription from the original recording. Although it has been checked for obvious errors, it has not been finally edited.

Oxal: Greetings in the Light, my friends. I am Oxal.

It is my pleasure to again have the opportunity to speak to you. We have been tuned into your conversation for some time and we gather that your new friends here have some questions. Before we go into that, however, I should like to say that you are not strangers to us. We are aware of you and your work, and we wish to give you our blessings in your work.

We are aware of all of those who are attempting to serve and are doing it seriously, without thought of self. We are helping these people in every way that we can. We are also aware of those who are not sincere and are working for monetary gain and think mostly in terms of the carnal. These we cannot help nor do we wish to. Now we will attempt to answer the questions that you have.

Questioner: I have been feeling as though there was a heavy weight pressing upon me. Is this from your beam?

Oxal: You have been picking up the vibrations of our tuning in here and it is your reaction to that. Different individuals may receive a different reaction depending upon their sensitivity. Also we have been beaming energy from our craft to your group tonight, which should be beneficial in many ways. It should help you in eliminating negativity. It should help you to resist psychic attack, also, and there is much of this going on today upon your planet. Later on you will be receiving some instruction in this field, because in the days to come and even today, it is important to know these things and how to reject these attacks and protect yourselves against them.

Questioner: Are these psychic attacks coming from other human beings, or negative UFO forces?

Oxal: This can come from anywhere and from any force of a negative nature. It can be a physical being, an astral being, or many of the other forces that you are perhaps not even aware of. There are many forces in and around planet Earth that one needs to be able to protect themselves against. When you refer to UFOs, you are covering a wide range, because in your

terminology we understand that this means unidentified flying objects.

Your skies are full of unidentified flying objects and they are not all spaceships. Very few of these objects that you are able to see are objects from outer space. Some of them are, but most are not, and these are the ones that you do not want to be associated with. You need not have fear of these so long as you stay in the Light and do not try to molest them. By this I mean that to deepen investigation into their activities, or to oppose their actions would bring notice from them. When I speak of opposing their actions, I mean that you should not try to interfere in their work or activities, nor try to help them or become involved in any way with them.

Questioner: I recently read a book which mentioned beings that lived in the center of the Earth and have been seen emerging in places such as West Virginia and the North Pole.

Oxal: Some of these beings are elementals from the center of your Earth. These are beings that are entirely foreign to you and you would not want to be associated with them in any way. The time is coming when they will be eliminated from planet Earth. They will be driven out and will have to find other abodes in other solar systems, but they too, will be taken care of.

Questioner: If a spaceship emanates a blue light, does this have any significance?

Oxal: Have nothing to do with any spaceship that emits a blue light. These are not really spaceships, for they are not really capable of traveling outside of planet Earth's atmosphere. They are not of a nature with which you would be familiar. We could only relate them, to a certain degree, with beings and their creations in your astral realm. They are of a very low nature.

Questioner: Are they human?

Oxal: Not as you would think of human. Of course, the word "human," depends on your interpretation of it. It would depend on what one considers human. They are a form of man.

Questioner: Are they physical in nature?

Oxal: Not as you view physical. They are of a different density, and cannot always be seen by the physical eye of man of Earth. Often they are seen, however, and they have some knowledge of being able to change their vibration or density. Therefore, you might see them at one time and not at another.

Questioner: Are these beings the same as the so-called "little people" of Ireland?

Oxal: No, these are an entirely different form of life. I think that you are referring to the elementals known as "nature spirits," that have to do with the care of plant life. These beings are not fictional. They are really there and without them, man of Earth would be in a bad way. It is sad that he is not aware of these creatures and does not cooperate with them, for if he would do so, he would find many of his food problems becoming much more simple. All the creations of nature, such as your plant life, trees, etc., would be much more beneficial to man if he understood and cooperated with these elementals. This is being demonstrated upon your planet today in a place that is called Findhorn. They have learned the importance of these little nature spirits, and the results that they have had have amazed them.

Questioner: Is it true that certain non-mechanical energies, such as electromagnetism are conducive to plant growth?

Oxal: Yes, if it is used in the right manner, it can be helpful. However, this would not be necessary if man would allow the energies to work that are already here. All of these energies that are necessary for the welfare of plant life and mankind are here and available without having to use mechanical devices to stimulate them, but these devices can be used beneficially in this way.

Questioner: Are you conversant with the work done in the field of extrasensory perception that has been done in Russia?

Oxal: Very much so.

Questioner: Are they using it for good purposes?

Oxal: No, their leaders are not interested in it for good purposes. They are only interested in using it to further their own ends and to overcome their enemies. They have been using it for spying. They have people that they have trained under hypnosis that they send out to various areas in other governments to bring back information. This can be done very successfully if you develop the right subjects. Your government is also doing this. In fact, they have gone quite a way in this. They started much later than Russia, which has been experimenting in this field for many years, and it is amazing what they have developed. Your scientists in this country have been very closed-minded and are just beginning to wake up to the fact that there are many things that they do not know.

There are many energies and powers in man himself that they are not familiar with or aware of. This will be one of the things that will hasten the downfall of your civilization. This was one of the things that brought about the downfall of other civilizations, when man began to use his powers for evil, to control and use his fellow man.

The problem is that knowledge can be very dangerous in the hands of the wrong people. To handle knowledge wisely one must have integrity. One must love his fellow man and have a desire to serve and to do that which is good for all mankind, not that which is only good for a few. It is sad that people of Earth have taken so long to realize this and still it is only realized by a few. Time is eternal and all men will come to that realization sooner or later, but man could save himself a lot of suffering and anxiety if he would come to it sooner.

Questioner: I have some theories on methods of propulsion used by spacecraft, and I wondered if you would discuss this?

Oxal: Earth man is not ready for this information. He immediately would want to use it for destructive purposes, to build a war machine. We do not wish to see this happen. Of course, you have to realize there are many different kinds of spaceships using different ways of propulsion. What are your theories?

Questioner: One theory is to use different quantities of mercury in juxtaposition with different sound vibrations set up in a rotating field.

Oxal: I know of no craft that works upon a principle of that type. There are several principles, and it depends upon where you are going to use the ship. Many of these ships are not capable of interplanetary travel. They are used within the envelope or magnetic field of a planet, and they draw their power and energy from this magnetic field.

Questioner: An alternative method to the one I just asked about occurred to me. This involves alternating magnetic fields. One would be a set of fixed magnets arranged in a circle around a shaft. The other would be a rotating set of magnets which would change the magnetic lines of force and attraction.

Oxal: This, perhaps, would have some merit, but it doesn't conform to any of the principles that I know of. They are much simpler. Once you have discovered most of the principles used in space travel, you will be amazed at the simplicity of their design and equipment. Most of these ships are made of a material that is of a different vibratory range than that which you use upon planet Earth. Not all, but most are what you would call etheric objects. In order to see them with the physical eye they must be brought down into a lower vibration or density. So, we are talking about something that Earth man, in general, is not familiar with. The space travel that has been developed upon your planet is still in the

“horse and buggy” stage of development, to use your terminology. Most of the ships, except those which come from within your Earth’s envelope, are of a finer density than Earth material. Quite often they are caught on sensitive film with your photographic equipment, though you do not see them with the physical eye.

Questioner: Could you tell us the source of Uri Gellers’ power to perform the feats for which he has become so famous?

Oxal: It does not come from us. I understand the claim has been made that this has come from space beings or spaceships, but this is not true. This is not to say that he is not being helped and influenced by outside forces, but these forces are from within the Earth’s atmosphere or envelope. As I mentioned before, there are many different forces at work. They are not all what you call spaceships. They are not all from astral realms, but there are forces that are working, both in the visible and the invisible. They are what you would term “dark forces.” Many things are being done to influence individuals. In this case, it is being done by a group attempting to influence your scientists with powers that the scientists have opposed or refused to recognize. This is not being done with particularly good intentions. There are many people on planet Earth, having been made aware of these powers and how they can be used who can be influenced to use them in ways that may not be beneficial for all mankind.

Questioner: Is there a battle going on within the ranks of the dark forces?

Oxal: Not that I know of in this case, but often this does happen. The forces of darkness do very often battle among themselves for supremacy. This, of course, is advantageous to the forces of Light, for the dark forces very often defeat some of their own purposes by battling among themselves.

Questioner: Do space beings have physical bodies such as we do?

Oxal: Well, my friend, we have a very large field to cover when you consider the vastness of space. When you refer to space beings, that could encompass practically all of life for we are all dwellers in space. The average being that you would encounter in space in your solar system would not be of the exact same body that you would have. Now, I understand that when you say physical, you refer to a body such as you have here on Earth. There are other planets in other solar systems that have the same vibratory rate that you have upon planet Earth, but there is not another one in your system. So, any being that comes from another planet in your solar system would not be of the same vibratory rate. His body would be of a different density, a finer density, which would be difficult to observe with the physical eye. Most of these beings have attained knowledge of how to control energy and change it into matter and matter into energy. Therefore,

they can control their vibratory rate and can bring it down to a point where it would be visible to the physical eye.

Questioner: As you observe Earth people, do you find that the infants being born now are more highly evolved spiritually than the ones in preceding generations, and therefore capable of providing leadership in the times of crisis which lie ahead?

Oxal: Many of those incarnating into planet Earth today are souls who have advanced and will develop quickly. Many of them are going to have recalls at a very young age. In order to establish the New Age it is going to take advanced souls, so they are now incarnating and have been doing so for some time, and some of the greater ones are yet to come. There will come a time when it will be necessary to take many of the people from your planet for a short time in order to avoid the suffering and turmoil that will come about in the cleansing. The preparation is all made for this. Most have been chosen and these will be the ones to bring about and establish a new civilization. This will not be done overnight. It will take time and much work and knowledge. The preparation for this, as some of you here know, is being done at this time and has been going on for some time. Many will be awakened to who and what they are and what their mission and purpose is at the right time.

Questioner: Is the right time for this still a long way off yet?

Oxal: It is very close. This depends upon what you consider a long time. As we observe time it would be very, very short. Perhaps, as you observe time, it would be a little longer, but, the time is now and the changes are taking place before your very eyes.

Questioner: Are many awakening even now, having little glimpses and gradual recalls?

Oxal: Many are. It is happening and cleansing is taking place right now, but the momentum will increase very rapidly, as you have already seen it increase.

Now, my friends, I think we have used this instrument long enough. If I have been of any help to you I am happy, for we are only servants to a cause. We try to serve always to our fullest capacity.

We wish to extend to each of you, the love, the blessings, and the understanding of all of my people.

I am Oxal. ❀
