

Caveat: These communications are informative teaching instructions for those who seek to increase their understanding of themselves and the magnitude of the future lying before us all. These lectures are not of a religious nature but rather deal with the science of human potential and evolution. This document is a direct transcription from the original recording. Although it has been checked for obvious errors, it has not been finally edited.

December 31, 1981

(Clyde's instructions and conversation with Athens, who is the engineer aboard the craft "Otavana," adjusting the beam preparatory to transmission.)

Clyde: Greetings to you, Athens. Yes, it has been a long time since we've heard from you. Yes, you're way too far forward. Bring it back, now a little to the left. Now bring it (*the beam*) a little more forward. Yes, you're much too hot. That's better. That feels pretty good now. No, the visual has not been opened but it is beginning to open now. It is not very clear, pretty fuzzy. No, you're not right yet, but it is much clearer. Bring that temperature down a little more. That's better. Yes, that feels good now. Yes, I think you're right on target.

Yes, we do have a good group here tonight. Did you notice our hookup here? We're going to try to broadcast via our telephone equipment, which is not as sophisticated as yours, to another group. Yes, I should have let you beam that directly to them. I think you could do that.

Yes, O.K. Everything feels normal. You say Oxal is going to speak to us? Alright, you bring him through.

Oxal: Greetings in the Light, my friends, I am Oxal.

I presume that you are all waiting to hear what we see in the future for your planet for this year of 1982. As we observe your planet from our vantage point, we see some good being accomplished and also see a great deal of negativity, violence. But this is all a part of the civilization upon your planet. Although we see a great deal that we do not like, we also see many things happening that we do like.

In the latter part of the nineteenth century it was decided by the Hierarchy of your planet that it was time again to make available to those minds that were seeking the higher knowledge more of the esoteric teachings. So gradually since that time more and more of your developed minds have taken advantage of this information and have begun to study the deeper teachings to learn the Truth that they might be set free. And this is good, for it will do a great deal for your civilization.

There are more individuals today upon your planet who are sincerely seeking answers to many of the mysteries

and they are finding them. Knowledge is not kept from man when he is seeking it. Truth will be made available to those who seek sincerely for the Truth.

Now to touch upon a few of the things that we see in this coming year. Economically we do not see a great deal of improvement, although there may be some toward the middle of the year.

We do not believe that you will see as high interest rates in the coming year as you have seen in the past, although there will be considerable fluctuation. But by and large, for this coming year you will find the interest rates generally lower, but not as low as you have seen in the past.

The money situation will stay fairly tight. We see unemployment increasing gradually as more and more of your industries are forced to close or reduce their output. We do not see any great recovery in your automobile industry in the near future. In fact, some of them may face bankruptcy, possibly in this year.

We do not see any improvement this year in the Middle East and the African situation. It seems that there is going to be great disagreement there. I do not believe that it will escalate into any major war at this time, but we see it eventually escalating into a war which will draw in many nations.

Poland is going to find themselves in a great struggle for some time yet to come. It does not appear that they will be able to get themselves out from under the foot of their oppressors for quite some time.

Russia finds itself economically in a very serious situation, and the pressures will be felt by their people in the near future even more than in the past. They have a strong military group and will be able to suppress their people for a long time to come.

The Reagan administration, as you call it, is going to run into some very rough oppositions in the days ahead, and they are going to find it very difficult to deal with the people. It is difficult to take substance away from people who have not earned it, once it has been given to them. Many of your peoples have become dependent upon their government for their supply, and they are going to fight back when it is taken away from

them. This administration is going to have a rough path.

But by and large, the year 1982 economically, will not be exceptionally bad in your nation. It will not be good, but it will not reach its lower levels in this year.

Weather-wise, you are going to experience many unusual storms throughout the world, as you call it. You will have record snow storms through this winter, and record rainfalls during the warmer seasons. More and more unusual plant diseases, animal diseases and people diseases are going to appear. This is a result of man's misuse of his planet, his failure to consider planet Earth in his pursuit for wealth, so he must pay the price.

There is going to be considerable activity within your planet. The fault lines are going to become more active in the coming year. The pressures within the earth are building more and more, and there will be many volcanoes erupt in the near future, for they are the safety valves for this pressure.

The changes that are coming about in planet Earth are increasing day-by-day, so you can expect more and more changes to take place on the surface of your Earth and the interior of your Earth. So much for predictions.

We urge all Earth people to prepare themselves for the coming times by building their strength, their spiritual strength, by becoming more knowledgeable of the laws and how they work. Then you can control your environment and can be in the right place at the right time and create for yourselves the situations that will be advantageous to you.

Too long have Earth people tarried in this respect. They have procrastinated, they have put off until tomorrow what they could do today. And those who continually do this will one day find themselves being left behind, while others move on to new and greater things.

I leave you, my friends, by extending to you the love, the light and the understanding of my people.

I am Oxal.

Clyde: Athens, all of us here would like to extend our love to all of you there on the Otavana. We do appreciate your contacting us and speaking to us tonight. Give our love to Oxal and to all those aboard your ship, and to you, too. Thank you. Odina.

(Clydes's comments to group about the Otavana.)

I could see inside the control room and saw Athens making adjustments, and I saw Oxal when he came in. He is a big person, about six feet, big broad shoulders and a full head of hair. He has a beautiful aura. The control room is about 15 by 20 ft. with many instruments, lights and dials. Sometimes others are

working on the panels. They communicate telepathically.

I could see inside the control room and saw Athens making adjustments of the instruments, and I saw Oxal when he came in. He is a big person, about six ft. tall, big broad shoulders and a full head of hair, dark brown in color.

He wore his regular one-piece suit with special markings on it. He is evidently one of the officers on the craft as he has more decorations on his suit. It is fancier than Athens's. Their suits are a medium green. Oxal has a very beautiful aura.

The control room is about 15 by 20 feet, and it had lights and dials and instruments seemingly everywhere. Sometimes I see other persons in the control room working on the panels.

The box that Oxal communicates through is square, about two feet on the sides. It flares out in the front, something like a horn does. This device picks up the thoughts of the person using it. Words are not spoken.
