

Caveat: These communications are informative teaching instructions for those who seek to increase their understanding of themselves and the magnitude of the future lying before us all. These lectures are not of a religious nature but rather deal with the science of human potential and evolution. This document is a direct transcription from the original recording. Although it has been checked for obvious errors, it has not been finally edited.

Zalhem: Greetings to you, my children, I am Zalhem.

I presume that each of you are here because you are seeking Truth, you are seeking to know. Either you have decided or you are anticipating placing your foot upon the path, the path that leads to Truth; the path that leads to what often has been spoken of as the Kingdom. The Kingdom of Heaven is reached through much hard work and much study, and that Kingdom, through this pursuit will be found within yourself. I will speak some of the path that you are anticipating.

This is not an easy path. Each individual should think well before he places his or her foot upon the path. Are you willing to make the sacrifices that are necessary to trod this path? It will not be easy. It will require great efforts upon your part and much work and I mean work. There is not anything that comes for free. All must be bought and paid for through your own efforts and work.

Knowledge is a great thing to have and to hold, and it is the only thing that will lead you to true spirituality. Knowledge is not easy to come by, for all knowledge must be proven. Beliefs are not knowledge. You do not have the knowledge of a thing until you have proven it to yourself and this requires work. For what does it avail you to know of a law and to believe in it, if you do not know how to make it work, to use it? So you see belief amounts to very little. It is knowing that counts, and you do not know until you have proven it.

That is why I try to impress upon you that before you decide to trod the path, be sure you are ready and are willing to prove the things that you are told. For it is better that you do not start the path, if you are not willing to make the sacrifices necessary, than it is to go part way and turn back. It is better to wait until you are ready, for you will be tested every step of the way. And the higher you rise upon the ladder of knowledge, the greater will be your responsibilities and your tests, and more responsibility will be placed upon your shoulders.

This is a serious step. Many of your friends may rebuke you for your lifestyle will change. Yes, many may even try to persecute you. But some of these things are the prices that one must pay if one is to trod the path. So long as you move with the masses your social problems will be few, so far as your friends and even

your families' opposition may go. But when you begin to change, your lifestyle begins to change, your thinking and your speech becomes foreign to the masses, and often great opposition is met. But to he who is sincere, who is determined to know the Truth, these things will not affect him.

You have much to learn, beloved ones, much. Now in these lessons that you are embarking upon, the great mysteries will not be revealed to you. You will be dealing more with laws and how they work and how you can use them, and with the histories of yourselves. You will be learning who and what you are, where you came from and where you are going. You will be learning what life is all about, what evolution is all about. Until you have an understanding of these things and are able to work them and use them to some degree, you will not be eligible for the deeper secrets, or the deeper knowledge.

You have to prove your capability, your responsibility before you can be given many of these things, for in the more advanced teachings, you are dealing with very powerful forces, forces that create planets. Yes, suns and galaxies, and the forces that destroy them when their usefulness has been completed.

Universal Mind has many aspects and you will learn of some of these in these lessons. You will learn that it must have both its constructive and destructive side and why this is necessary. All things have their purpose. They are created for a purpose. They go through their useful stage and then as their usefulness descends and there is no more use for them, they must be destroyed or taken back into the source from which they came. So there is much to be learned, beloved ones, so much to be learned before you are ready for the great mysteries. Now I think that I have said enough. As I leave I extend to each of you my most sincere love and my blessings.

To those of you who decide to trod the path, whether it be all of you or part of you, may your progress be swift. And when the end of this cosmic day arrives, may you find yourself having gone high enough on the ladder to be of great assistance in the cosmic day that will someday follow.

Go in peace, beloved ones, go in peace. Walk in peace.

Peace, peace, peace. ✝
