November 27, 1971

Yaum: Good evening to you, my friends.

Once more it is my pleasure to come among you. I wish to extend my greetings to all of you here tonight and to bless your new household. You have very good vibrations here and if you continue to hold the Light here they will become even better. Is there some special subject that you would like to discuss tonight? If so, I would be glad to share my understanding with you.

Questioner: Would you care to comment on the recent Amchitka tests?

Yaum: This is sad that this was allowed to happen. We tried to discourage this in every way possible but the power interests of your civilization are not easy to influence when they are in search of more power. You are told that this was to further your knowledge of nuclear energy and its uses in order that your nation might maintain its military might or power. But this was not the true purpose. The great power interests of your nation and your world use your military as an excuse to do many things. The military powers of your nation are working a great deal more for the advantage of the world powers than they are for the protection of the people and they are doing it at the expense of the people. You see, the power or energy is a great factor in the operation of your civilization. Up to now or recently these sources have been electrical power and the oil, coal that was taken from the earth. But now a greater power has shown its face and there are great anxieties among those who control the power sources, to explore the possibilities of these new powers. And it is being done more for these purposes than it is for the military purpose.

Little regard is given for the safety of the masses in the search for power. With certain individuals power becomes an obsession and to gain more power is their only thought. This should be very evident to you as you look about today and see what these great interests have done to your environment. But what they do not realize that when working with nuclear energies there is a far-reaching danger that will result from it. However, they have some realization of this which they discovered when making atmospheric tests. The

results became so obvious to these greater powers that were conducting these tests that fear came into their hearts and they agreed to stop it. But now they are searching for another way to make further search for ways to use this energy for their own gains. The results of some of these tests will be far-reaching. They will not be apparent immediately but they will appear in the future.

In your Scriptures are described the latter days of this Age. You recall how famine will occur, how great pestilence will occur. You will find new diseases coming forth. They are already appearing and will increase as time goes on. Your medical profession will have no knowledge of these things or what to do about them. A great part of these diseases will be the results of these tests, because of the poisonings of your Earth, your water and your air. And there will be more of such occasions, tests, plus a holocaust where nuclear energies will be used to such a great extent that great damage will be done to your peoples.

We told you many years ago that the Bear and the Dragon would clash and now you see them standing, nipping at each other already. This, my friends, will result in the holocaust, which is not too far off. The Eagle finds himself caught between the Bear and the Dragon, he is trying to decide which way he will go. Eventually he will be drawn towards the Bear. The law of cause and effect, action and reaction is moving to bring these things about. Man, for years and years has opposed nature, has tried to improve upon Her. He has tried to reverse the laws and the more he does this the worst situation he finds himself in.

Already your foods are so polluted, so poisoned and so diluted that they are doing you more harm than good. Your nation, more than most nations, is becoming a tired, sick nation, because the foods that it is eating, the foods that are being supplied to its peoples, are not supplying the vital energies that are necessary to maintain a strong, healthy body. And it is difficult to become strong spiritually when you have a weak, sick body. Better it would have been if you had never discovered how to refine your foods, you would be a much healthier people. The results of these things have not come about in a few days, it has taken time. Generation after generation is becoming weaker and

weaker. Today your youth is sick. This is one of the reasons that you find your young people resorting to drugs. Their bodies are crying out for something. They do not know what it is so they turn to stimulants to try to boost their energy and their courage. If your peoples had been kept strong and healthy this problem would not have occurred. It was started back many years ago and as this grew at first it was not as prevalent, not as many people were affected by it, but the increase over the years of this refinement has brought about an increase in the number of alcoholics. They are trying to find something to satisfy the craving that is occurring in their bodies. If a body is properly supplied as God had intended it to be, as He provided for it to be, these cravings would not occur, it would be satisfied.

So you see, man has gradually brought himself into this situation and he places the blame everywhere but on himself and there is no one to blame but man himself. God had nothing to do with it. He gave man everything he needed to maintain a good, normal life, but man did not want it that way. He said, "God, I can do it better," so he tried and this is where he finds himself. God supplied power, energies for man to use, energies that are not destructive. Every energy has its place in God's creation, but it is to be used as God provided it to be used. When man starts to use it in a wrong way then he starts to bring destruction upon himself. Power can be obtained from the cosmos itself at a cost so low you would not believe it, and this is already known to many of your great minds. But it is more difficult for them to exploit it for their own advantage, therefore they look to a source that will give them more carnal power. And as long as man seeks in this vein he will not advance as a great civilization. He will merely reach peaks and then fall.

You would think that, after all of this time, that man has had the opportunity to rise and fall, to experience these things, and after he has been told and warned many, many times, you would think that he would begin to see the light, would you not? And begin to build his civilization upon the rock as your great Master, Jesus suggested.

Questioner: Could you tell us something about the return of Jesus, the Christ?

Yaum: His return is described in many of your writings. I could not tell you more.

Questioner: Some young people seem to accept His history and miracles but not His return.

Yaum: Everything that is given in this manner in your Holy writings has both literal and symbolic meaning. You see, you are now approaching the celebration of the birth of your great Master and all of this occurred in the literal sense. He was born, raised as described, yet each of these phases has its symbology: the Christ being born in the manger—your heart. Let the Christ Child be born in you. Jesus was only symbolic of the

Christ, he was a Christed man. Christ is love, Christ means love. This is one part of the trinity of God, God the Father, God the Mother, God the Son. The Son is love and until the Christ Child is born in you and develops there and matures and you become love, you know love, you are love, you have not attained.

So, all of these things are true. The Master Christ will return He will return on the clouds as described. No man knoweth the day nor the hour, that is not for us to know, it is not for us to be concerned about. The only thing for us to be concerned about is to be ready when He comes, to have our wicks trimmed and our lamps filled with oil, ready to go forth to greet Him. In other words, to live the life, you see. If we can live the life as He asked us to do, then we are ready to meet Him. It does not matter when He comes, we are prepared, we do not need to be concerned about when He comes but to be ready when He comes. And I assure you that He will be here.

Questioner: How do the events of the Near East fit into the Bible prophecies?

Yaum: This is a great, complicated affair. The Bible prophecies were concerned with this and of course this is a sign of the times. The Jews returning to Israel, but here again, the great power interests are involved here. And it looks like there is going to be some action there, but this is not going to be the big action that will bring the great and final holocaust. This is going to occur between the Bear and the Dragon and the Eagle. There will be turmoil and war occurring there but it is not going to be the major one.

I am told that I have stayed my time with the instrument. It has been my very great pleasure to be with you tonight. I wish that I could spend time with you more often as I used to, but we have had pressing things to take care of, very urgent areas of service which has required a great deal of attention. But I shall be with you occasionally, whenever I have the opportunity.

I wish to thank you for accepting me into your household and among you. And to each of you I extend my most sincere blessings.

In leaving I should like to extend the blessings of the Great Ones. I should like to ask that these blessings be invoked upon each of you and that each of you may be helped in your individual problems and in your search. May each of you be given the courage and the strength to go forward and to serve and fulfill your mission that the Father gave to you.

Peace be with you, my friends, peace, peace. ✨
