**April 21, 1958**

**Mr. R.:** Good evening to you my friends, I am Mr. R. I extend to you my love and my blessings in the name of the infinite creator.

I should like at this time, my friends, to emphasize the seriousness of the results of the nuclear tests that have taken place about your planet, and more of these are being planned. This, my friends, is much more serious than you realize. The results are becoming quite prevalent among your people. The last test that was conducted has greatly increased the radioactive clouds about your planet. These are being controlled as far as possible by your brothers in space. Great damage is being done to your people, to the people of Earth. Our control has prevented a great deal of damage, but this is being released in ever increasing amounts. How much longer we can prevent great disaster from resulting from these experiments, we do not know.

New diseases are appearing upon your planet. Many of these are results of this madness. Your people are suffering in more ways than you realize. People who have been closer to these tests are much more aware of it than are some of you. However, they are being convinced that these things are not the results of these energies, but we tell you, my friends, that they are, and unless this madness ceases, it shall become much more rampant. Some of your great earthquakes at this time are direct results of these tests. If we were to release the clouds that have resulted from these tests, the havoc would be great upon your planet. Gradually we are neutralizing these radioactive clouds, but if these are produced in greater numbers than we are able to handle, the results shall be disastrous. The great tests that are now being planned, should be prevented if at all possible.

We are attempting to do our part by impressing certain people upon your planet to cease this madness, but it is not always easy to do this with certain peoples. They are so intent upon what they are doing, that it is almost impossible to break through to them. People of Earth must, somehow, be made aware of this madness, and demand that it cease. For unless the voice of the people cries out loud enough, these forces of darkness are apt to engulf them. We do not wish to see this great suffering occur upon your planet. We are making every

effort to prevent these conditions, but unless, the people of Earth shall respond in large enough numbers, it shall be very difficult to prevent.

I do not wish to frighten you, beloved ones, and I should like to say this, as an assurance to you, that those of you who establish yourself, firmly in the light and in the love of your creator, shall not be harmed, but the masses of innocent people we do not wish to see suffer for their lack of knowing.

Many of your scientists today realize the seriousness of the situation and are attempting to correct it, but they are meeting great opposition among the warmongers of your world.

Let each of us do our bit in helping to prevent this. We can do this in two ways. First, by helping to make people aware of the dangers. And I do not imply by this that you must do our shouting, but if each in his little way plants the seeds, they will grow, for you must also be ever aware of the opposition. Secondly, you can help greatly by establishing all the light possible and sending it into the ethers about your planet. Positive thoughts, anything that will raise the vibrations of the atmosphere about your planet, shall be of help.

To each of you and to all of the workers in the light, we ask you in the name of the Infinite Father to do your part, to help save a civilization that is much in need of being saved.

I leave you, my friends, by surrounding each of you with my love, light and understanding. My Peace I leave with you.

Good night, beloved ones. ✿
