**Yaum:** Good evening to you. my friends, I am Yaum.

It is good to come among you again. I should like to, with your permission, speak to you for a few moments tonight concerning the brighter side of the picture for your civilization, if your people are able to strengthen the foundation of which you were speaking. For once you have crossed the threshold and you have passed the danger point of your civilization, the things that are in store for you and your children and your children's children, will be beyond your conception. For the time will come when you will be able to travel the universe, to visit other planets, so to speak, to gain knowledge of those who are advanced somewhat in their sciences. You will find your material sciences developing to where man will have a great deal of time to travel, to learn. You will not be confined to working many hours a day. You will reach a point where even your factories shall be operated by thought controlled machines. For when man reaches this state through his increased desire for more spiritual understanding, more knowledge of himself and his relationship to his fellow man, to his creator, he will be able to spend his leisure time in gaining greater knowledge and wisdom. You see, man does not need to live by the sweat of his brow, providing he has the wisdom to develop himself and to use his time constructively in growing, in gaining ever greater knowledge. For you are going to find in gaining knowledge that is available in the universe, it is going to require continual effort, continual searching for out here beyond the horizon, there is always more and greater knowledge to obtain. As man progresses in his wisdom, his knowledge of universal law, he is able to move farther and farther into new realms, into new phases of life, for there are many, many phases of life beyond and beyond. In your bible is quoted "In my Father's house are many mansions" and these are the many mansions that lie beyond where man can, through his process of evolution, move ever onward to greater and more magnificent mansions, so to speak.

Among the many things that will come about as you move into a new Age here up on your planet, will be new methods of learning; man will learn much faster. For you are going to be taught new methods. Your children will be taught new methods. Under the present

system there is a great waste of time in teaching. What now requires fifteen or twenty years of your time to learn, to teach to a young one coming up in your civilization, will be done in about one fourth of the time. In other words, what could be what you would call a Masters degree, requires twenty years or more, would be accomplished in approximately five years. This should be quite an advantage, should it not? Man could gain a great deal of wisdom in a very short time. These things will come to your civilization, once it has crossed the threshold, has left behind the danger of annihilation.

Many other things shall also come about. You shall learn to eliminate all diseases, all sickness. Suffering will become a thing of the past. Would it not be a wonderful thing to just eliminate suffering among the people of Earth?

**Questioner:** Are you referring to physical beings of future generations?

**Yaum:** Indeed so.

**Questioner:** Will they have the ability to use this knowledge for their own good?

**Yaum:** Once they have passed the danger point, then they will realize. They will know. They will have the realization of man's oneness with each other, with the creation, with his creator. These things will be understood and when you have passed this point you have no problem as far as using energies for destructive purposes, and you will come into the knowledge of energies so much greater than nuclear energy, that nuclear energy will become obsolete. You will find energies much more adaptable, much more flexible and much cheaper. You will be able to draw these energies from the ethers, sunlight and other energies.

Lines of force will be discovered that are traveling through your atmosphere at all times, of which you are not aware at this time. You can tap these energies and have all of the power, energies you need at the cost of very little effort. Your homes will have no dirt. You will have no dirt problems. You will have devices that will eliminate all dust. Your housewives will not need to take the dust cloth anymore and go dusting around, for this problem will be solved for you. You will have

windows that are of pure energy—no glass—yet no air will come through and you can push your hand out of the window. You can control the amount of air from the outside, the heat and cold. These are some of the things you can expect.

**Questioner:** How about food?

**Yaum:** Food will become a very minor problem. You will require some food, but you will learn a great deal about foods and you are going to discover energies that can be used to replenish the body in place of many of your foods and also, as your civilization grows and becomes more understanding, gains more knowledge of these things, the physical body itself will refine, change. Many of your organisms will probably disappear, others may appear, for nature adapts herself, through time, to any condition.

I thought that it might be of some interest to you to talk for a few moments about these things; and to answer your statement. I would like to say that life is eternal. You can cast this body aside and create for yourself another one, so you have no worry about not being able to enjoy these things if not in this body, in another.

**Questioner:** Can we regenerate the body that we have now?

**Yaum:** Oh yes, this can be done, this can be done. The body will respond, once you have the knowledge, this can come about. But sometimes, you know, we like a change of bodies. We get tired of this one, this same old one, we like to get a new one, a new model, you see.

**Questioner:** You have told us before, Yaum, that you have been in your present body over two hundred years and that we can learn to use our bodies that long, too.

**Yaum:** Once you have the understanding of the relationship of the spiritual to the physical, there is really nothing to wear out in a physical body. It only wears out because we abuse it and because we think it is going to wear out, you see. We have to think properly, too. I never concern myself with the physical body. I never think of it as wearing out. I only think of it as a vehicle for me to use in the present environment that I am in and the present work that I wish to do. When I have finished with it, I will discard it and it will still be as good as new.

Now, my friends, it has been my pleasure to spend this time with you. I wish to extend my gratitude for your acceptance of me, and to the lady of this household. It is my privilege and my pleasure. May each of you in your search for understanding accomplish that which you seek very rapidly, and may each of you be able to be a great light in bringing your civilization into the new Age, the new era of understanding.

Go in peace, my friends. ☸
