**Note from Carla L. Rueckert:** Don Elkins had a very limited exposure to both Walt Roger's and Clyde Trepanier's channeling in the early 1960's, after which time he had no more contact with either man's work. Clyde Trepanier continued to channel until the late 1980's. L/L Research became reacquainted with this additional material of his in 2011, at which time we offered to create a section on the L/L site to archive it.

We would like to make it clear that the transcripts in these sections do not have any direct relationship to L/L Research and that this material moves into areas which are not in congruence with the work of L/L Research. Because of this, we would take a step back from recommending or endorsing it to anyone. It is, however, a part of the extraterrestrial channeling story that otherwise might have been lost to research and so we are grateful for the willingness of the Detroit Group members, past and present, to share this material.

## **Introduction**

The communications contained in these documents are informative teaching instructions for developing a better understanding of ourselves and the magnitude of the future lying before us. The nature, source and directness of this information makes it necessary to include this introduction.

This material is available for those who seek to grow and increase their understanding of their place as part of the great ongoing plan of evolution. These lectures are not of a religious nature, but rather deal with the science of human potential and evolution.

As we enter into the next age millions of beings from other regions and other realms have come to extend their friendship and offer their help that we might awaken ourselves as to who we are and our potential for growth and what lies in the future.

These individuals once stood upon the same spot on the path of evolution that we now stand. They have long ago progressed to higher states of knowledge, wisdom and power. They have long known that the path of service is a great road to travel.

Within these pages, the words you read are those received from physical beings upon this planet, those aboard spacecraft, and also from those who reside in other dimensions. Although many communications have been received, these are but a small sample of the total information that has been made available to all who seek to grow and to serve.

The reader is to understand that these communications were received through a human channel who himself was able to function at will in dimensions other than the one in which we reside at present. Although these words were spoken to a small group, the knowledge within applies to all seekers of truth.

We hope that the reader of these impromptu talks will realize that when set down on paper they often lack literary virtues. We appreciate your understanding on this point.

It should be remembered that certain of these lectures contain words or phrases that were appropriate to the times and or groups that were present when originally presented. Therefore, it might be necessary for individual students to translate these words or phrases to their own understanding so that semantics do not stand in anyone's way of comprehending their meaning. ✿
