**March 5, 1981**

**Yaum:** Greetings and good evening to you, my friends,

It is my privilege to spend this time with you again and I see we have the grandson with us again tonight.

**Questioner:** It's good to see you again.

**Yaum:** I have not been in your presence for a long time. It is my pleasure.

**Questioner:** Yes, it's been a long time and it is my pleasure, also.

I should also like to extend my greetings to our new friend here tonight who is new to me as far as being in my presence, shall we say?

Now, my friends, I will try to limit my expounding so I do not overstay my time with you. So, do you have some questions that you would like to ask? I do not know if I will have the answers, as all I can do is to sharpen my understanding with you. I do not ask you to accept it if it does not appeal to you.

**Questioner:** What have you been doing?

**Yaum:** I have been keeping very busy but have been able to check on you occasionally to see what has been happening with you and your group and also with some that you have been associated with for these many years.

**Questioner:** Would you care to comment on national and international affairs?

**Yaum:** Perhaps I do not know anything that you do not already know. But I do not see a very bright picture in your economic situation. I think that you may see some improvement now and for sometime due to your new President and the ideas and efforts that he is putting forth to change the situation. For a time it may help some and things may get a little better.

The problem is that it has gone on so long in the old ruts. Your people have allowed the power structure to take over, and I do not see things changing. Another problem with Earth people is that they all want to improve the situations that exist, so long as it does not affect them. With this attitude it makes it very difficult to turn the situation around. Of course I realize that I am not telling you anything that you do not already know.

We are expecting some improvement for a time in the monetary situation, but I do not see it being turned around.

I think that interest rates will continue to stay high. There will be some fluctuations for a time. They may come down fairly low but it will only be temporary. With the inflationary rate continually climbing, there's no way that you can change this except by throwing your economic system into a complete depression. The politicians are not going to do anything that is going to cause this if they can help it. Of course it is eventually going to happen, but they will try everything possible to prevent it.

Foreign relationships are becoming more and more strained. The dollar is becoming very, very unpopular as an international monetary exchange. I do not think it will be very long until a new monetary or an international monetary system will be set up. The plans of the international money moguls or manipulators are to attempt to do it this year. They may not succeed, but I believe that they will. There is to be a meeting held in the very near future, perhaps no later than the middle of this year, to try to bring this about. If they are not successful this time they will continue to try to do this. In fact, it is almost a must if trade relations are to continue with any kind of harmony.

The OPEC nations are also pushing this idea heavily because they claim that they have to continually raise their prices to keep up with the devaluation of the U.S. dollar. Of course this is true. You are told by your leaders that the OPEC nations, the oil supplying nations, are trying to take advantage of the United States and other countries. In some ways they are. The big oil cartels of your nation are very closely tied in with those of the OPEC nations.

Whether you realize it or not, the truth is that the whole energy system is controlled and owned basically by only a few individuals. They are the ones who manipulate the international currency and the international transactions and they are from all countries with resources or with power.

There will be an international currency set up to pay for the exchange of goods for all nations. There will be something new to replace your dollar as the

international currency of exchange. Just how this is going to affect the American dollar we can't tell yet.

**Questioner:** Do they have a plan yet to bring forth the new form of currency like the "surrender"?

**Yaum:** Not immediately. They will let the other currency stand, for the time being at least. But gradually I think it will come to an international currency and there will be an exchange for it.

**Questioner:** Will it be backed by gold and silver?

**Yaum:** I think that eventually it will be backed by gold because it becomes almost necessary to have a sound currency backed by something of value, something that has a basic value. I think that you are going to see that most all of the currency is going to have to be backed by gold, or at least by some solid commodity.

**Questioner:** Do you see a runaway inflation sometime in the early 1980s?

**Yaum:** I see a gradual increase in the inflation, but it will slow down some this year. Government spending is not really going to slow it down much even if they are able to make the cuts that they are talking about. Your people are not going to stand for that. They have become too accustomed to having had things handed to them, so it will be very difficult to make many cuts. Although it is a little difficult at this time to say just when and how this will come about.

I think you will see the inflation increasing, perhaps more rapidly next year than this year. It will eventually come to a point where the people will not take any more. They are going to start crying to their government for more help which the government will not be able to give to them. Eventually the pressure will become so great that your national leaders will be forced to turn to a totalitarian government which will mean a dictatorship. That is the only way that they can stop or deal with a revolutionary situation. Your people will revolt if things become difficult enough. You may think that could not happen in your country but it can happen in any country.

**Questioner:** Do you think that this could happen here in the next four or five years or sooner?

**Yaum:** I do not want to be held to this because situations can change, but if the present trends continue, and it appears that they will, then I see nothing to prevent this happening within five years.

**Questioner:** Will the Antichrist eventually be part of this dictatorship?

**Yaum:** Eventually, but that will be sometime later.

**Questioner:** Do you see this happening at approximately the time the Russians begin to fight us seriously, and when the third world war is really recognized as the third world war?

**Yaum:** I do not think that the third world war is going to involve the United States for quite a long time. I think that your nation will be drawn into it but it will be toward the end. For one thing your nation is going to be in such a bad financial condition that it would not be of much help to its allies.

Your people are not going to be anxious to fight a war. It will be very difficult to sell another war in the United States after Viet Nam. Although by the time that you are drawn into it, much of that will have been forgotten.

**Questioner:** Because of our own geological disasters?

**Yaum:** No, not because of that, but because of time. You see time heals hearts and ill feelings. At this time it would be very difficult to sell a war in this country unless you were attacked by someone. If another nation were to attack you, your people would rise very rapidly. But since they are not being attacked, they are not in any mood to fight on foreign soil.

**Questioner:** I think that Oxal has said that we would be too busy providing food for ourselves, and keeping peace among ourselves, to want get involved in a war.

**Yaum:** This will be toward the end. The next war is going to be quite a long war. It is going to run over quite a number of years. The only thing that will stop it will be the natural forces themselves. They will react with earthquakes and storms, damaging the world. The people are going to be so busy looking after themselves, their families and their own interests, that they are not going to have time to fight a war. It will die out of its own accord.

**Questioner:** Is it a war between Russia and China, primarily?

**Yaum:** Russia, China, Africa, Ethiopia, you name it. Even Japan might be drawn into this.

**Questioner:** Will it come to our shores, to Cuba? Will it come that close?

**Yaum:** No, I do not think that you are going to have any problem with Cuba. They are so close to you and such a small country that you could wipe them off the map in two days.

**Questioner:** Do you see the end of the war leading into the tribulation?

**Yaum:** Yes, it will be the big tribulation, the culmination.

**Questioner:** Do you see the dictator possibly being George Bush?

**Yaum:** No, I do not at this moment. see it as him.

**Questioner:** Is there a chance that President Reagan will not live through his entire four years?

**Yaum:** There is a very good chance that he might not.

**Questioner:** Might he suffer the same fate as Kennedy and others have?

**Yaum:** No, I did not say that. You see he has quite a number of years upon his head, and that is a very, very trying job. It ages a man very rapidly.

**Questioner:** Will it be really hard on the people under a dictator? Will we lose our freedom to a great degree?

**Yaum:** You surely will.

**Questioner:** Is that approximately the time when the "Mark of the Beast," will appear?

**Yaum:** Yes, this will come about at that time. You see that what happens in a situation of that type is this: Man becomes so desperate that he is willing to give up his freedom for food. In many countries people will do anything because they are so desperate. But usually they do not gain by that. In most cases their situation is just as bad after the dictator takes over. But there have also been cases when this has not been true.

**Questioner:** Will the dictatorship be something that is from within the ranks of the government itself?

**Yaum:** Yes, the government will not have any choice but to do this. The people will demand it.

**Questioner:** So basically the next president of the U.S. will probably exercise his power as president and become a dictator?

**Yaum:** That's right. It will just go to a totalitarian government.

**Questioner:** Do you see that extending on through the war probably into the tribulation?

**Yaum:** I believe that once it is set up, it will not change during the period of time that is allotted. There will come a time when survival will be so much in the minds of people, that even the government itself will have trouble. Now, is there a more delightful subject that you would like to talk about?

**Questioner:** Will you speak about the New Age?

**Yaum:** The New Age will not suddenly become Utopian. It is going to take a lot of hard work to establish this. Many of your metaphysicians and your religionists seem to think that all of a sudden there will be a New Age, everything is going to be heavenly with nothing to do but enjoy yourself. But things are not handed to you on a golden platter. Your planet will have gone through great changes. Much of the civilization will have disappeared. Some lands will have gone down, new lands will have come up. A new civilization will have to be built.

A new age comes about every two thousand years and each age brings a higher state of evolution. This, your present age, is the culmination of other cycles, plus the two thousand year cycle which is bringing you in to a multiple cycle change. The change will be much

greater this time. You are already exposed to the new vibrations that will be predominant in the New Age. But for a number of years past this point, which is the cusp, so to speak, there will still be some of the old vibrations around. These will gradually fade out. Man himself will be starting to take on a different view, a different outlook, a different understanding. Gradually he is going to gain more and more. He is going to be open to the new things.

You are going to have help from higher forms of life. The Master Jesus will have returned, and He is going to be establishing this New Age. New scientific knowledge is already coming to you and being developed. You will be able to establish this civilization much faster than has been done in the past. This is because you are going to have more help, more knowledge. Many things will speed it up but it still is going to take some time and some hard work. You have to earn this and prove that you can do it. It will take two or three hundred years to get a good start.

It is my understanding that Jesus will return after the flip of the poles, after the earth has settled down, and those that have passed into the astral plane will also witness and experience this. He will return when the way has been made clear. I do not know exactly when that will be. He may come just before the poles flip. He may come slightly after. This depends upon the preparation. He will not be coming alone. There will be others with Him at the time He first appears. Some of them are already here, and some others will be coming at that time.

We are ready. The Hierarchy has all of the plans made. They are ready and waiting for the time to be right. Now this may seem like quite some time to you, but in cosmic time, it is a very short time. You see they do not feel time as you do. They feel time cosmically. It has been two-thousand years since this Master came and did that which He was assigned to do at that time. Now in order to complete that cycle, He has to return. Others came at other times to do their work. There have been great Masters here since that have done work that has been very slightly noticed. Perhaps most people do not even know about it.

**Questioner:** Could you name a few?

**Yaum:** St. Germaine was one and there have been others.

**Questioner:** Will you comment as to "how" Jesus will return?

**Yaum:** I do not know exactly how He is going to come. It is stated in your Bible that He will come on the clouds as He left. If He comes that way, then I guess it would be a spaceship. He has been on and off your planet many times in the last two-thousand years, unbeknownst to all of you.

I did not say that He had come to your country or your nation or any other nation. But in the Himalayas there is a great retreat where many of the Masters of the Hierarchy of this planet live. He has a dwelling there and goes there frequently. Buddha, Krishna and many others live there also. They are known under different names now.

The Master that you call Jesus is now known by another name. Jesus was the name that the Christians used. He has been known by many different names. He, too, has evolved in two thousand years as has everything else. For everything and everyone, regardless of how high a station they may hold in the universe, is in a constant process of evolution. It is evolving and devolving. Nothing stands still. Everything is in the process of change.

**Questioner:** Would John the Baptist be able to go to the Himalaya retreat?

**Yaum:** Yes.

**Questioner:** Has Jesus written any of His teachings while here on the planet under any other name?

**Yaum:** No, He has not returned in that capacity. He spends a great deal of time in the Himalaya retreat working with the Hierarchy. He is not going out to teach. He will not do that until He comes forth and makes himself known.

**Questioner:** Have Earth people made any progress in preparing for His return?

**Yaum:** Yes, there is progress being made.

**Questioner:** What else could we do to help prepare for His return?

**Yaum:** Try to help raise the consciousness of the planet by raising your own consciousness, and helping others to raise theirs. It is the consciousness of the people of this planet that will prepare the way and determine the time of His return.

**Questioner:** Will you comment on why the predicted 1965 California earthquake did not happen?

**Yaum:** The earthquake did not happen because of the many prayer groups on the planet that were concentrating Light energy on that area which helped to dissipate the negativity there. Nature reacts according to the vibrations that the people themselves emanate by their thinking and actions. When this negativity is lessened the risk of catastrophe is also lessened.

If you could see the black, etheric clouds over some areas of the world, it would amaze you. But without clairvoyance you cannot see these things. A person who has good clairvoyance and has the chance to view your world from a great height, could pick the spots where great catastrophes are likely to happen. The black, etheric clouds that he would see over these

areas are created by the negativity that takes place there. If these things can be cleared out, you have much, much less chance of disasters occurring there.

However, for the benefit of the planet, certain cleansing and rejuvenation must take place. The normal process of the rain, the sun, and so forth, gradually transpose the minerals of the soil into the ocean. It is a much slower process if man cooperates with nature by not stripping off all of the trees in the forest.

But there does have to be some type of cleansing by upheavals, eruptions and all types of catastrophes now and then. A planet is like an individual, it is an entity unto itself. It is born, it evolves to a point and then it starts to go the other way. It eventually loses its usefulness. Then through a natural process of destruction it returns to that from which it came.

**Questioner:** Will the new sun make a great difference in the weather or the temperature patterns?

**Yaum:** It will make a difference. But I am not exactly sure what the exact effects are going to be. However, it will make a difference in your seasons, in your temperature changes and in many things. It will also have its effect upon the people. It will bring about different vibratory energies. It will be a wonderful new world of experiences for you.

Now as I leave I extend to each of you my blessings and my love. It has been my blessing to have had this time with you. If I have been of any help, I am happy.

I ask that the Great Ones pour forth their love and their blessings upon each of you here. As you go forth, may your Light ever increase, and may the protective Light surround you and protect you all the way.

Peace, my friends. Go in peace, walk in peace.

Peace, peace, peace. ☸
