

Caveat: These communications are informative teaching instructions for those who seek to increase their understanding of themselves and the magnitude of the future lying before us all. These lectures are not of a religious nature but rather deal with the science of human potential and evolution. This document is a direct transcription from the original recording. Although it has been checked for obvious errors, it has not been finally edited.

Zalhem: Greetings to thee, my friends, I am Zalhem.

You are now standing on the cusp of the new age known as the Aquarian age or the Spiritual age. This will be an age when there will be revealed to the multitudes the great secrets of life, and they shall be able to comprehend. This was not possible in the Piscean Age which is drawing now to a close. The multitudes were not able to comprehend these things, therefore they have not been given, but man of the Aquarian Age will have greater comprehension abilities. He shall be able to use his faculties to a much higher degree. I would not go so far as to say he will be able to use them to their fullest degree, but his capacity to think and to understand will be much, much greater than it has been in the past.

Few people of your civilization realize what a small fraction of their capacity to think, to understand and to reason is used. It is said by your authorities that man is only using ten percent, but I say to it is even less than that. Man of Earth up to this time in this civilization has known very little about himself, and in the past few years of your time, man has advanced rapidly in scientific development and understanding, but he has searched very little to know and understand himself. Some work in this behalf is now being done and has been for a short time, and they feel they have made great strides, but they have only scratched the surface.

One of your ancients has said, "Man know thy self," and this was a profound and wise statement, yet it was little understood and little heed was paid to it. Much has been said about love, much lip service has been given to it, yet there is little understanding of it among your peoples. This is because carnal man does not have the ability to comprehend true universal love. But in the coming times he will begin to understand what is meant by these things, and for now we can only say as your Great Master has said, "Love ye one another," and to accomplish this through your comprehension of love as you have it now, it will require patience, understanding in all of your dealings with your fellow man.

It requires you to withhold judgment, for you judge only by what you see with the carnal eye, and with only this much vision, you cannot make a judgment. This is why

the law of "cause and effect" was brought about. As ye judge therefore shall ye be judged. Whatsoever you do unto another man, another man will do unto you. These are things that can be understood, although I will not say that it is understood by all of your people. But those that do understand and are wise, will do unto other men as you would have them do unto you, and instead of making judgment of another, he will show compassion and understanding and will know that that person is what he is because of the law of cause and effect.

There is much to be learned as you move forward in your search for truth and understanding, so very much to be learned. But if you search diligently and wisely, all of the answers will come to you in due time, at the right time and when they are needed. No one goes unnoticed. No sincere prayer goes unheard or unanswered, but they must be given in full faith and sincerity.

You are not alone on your path. There is help all along the way for those who make the choice to search, to ask, and to give. You must be honest and sincere with yourself, and if you are honest and sincere with yourself then you are honest and sincere with your Creator and your fellow man. Many people are deceiving themselves as well as their fellow man. One must be able to face themselves regardless of what they find, for until you are able to face yourself, you cannot face your Creator. Every thought you think is a creation and is creating for you the future. Many mistakenly think that only the act is important, but I say to you the thought is as important as the act, for the act cannot occur without the thought. And if you will study your scriptures, you will find the great Master made this very clear. So, beloved people of Earth, let us cultivate patience, understanding and love for all, not for a few, but for all.

May the love and peace and the understanding of all the Great Ones, who are at this time making great preparations for this New Age, may each of them invoke their divine blessings upon each of you, and may you receive these blessings in your hearts. And may those blessings bring to each of you a peace such as you have never known. Receive each of you according to your ability to receive.

Peace my friends, Peace. ☸
