

Caveat: These communications are informative teaching instructions for those who seek to increase their understanding of themselves and the magnitude of the future lying before us all. These lectures are not of a religious nature but rather deal with the science of human potential and evolution. This document is a direct transcription from the original recording. Although it has been checked for obvious errors, it has not been finally edited.

Oxal: Greetings in the Light, my friends. I am Oxal.

Tonight I will concern my little talk with why we are here and some of the things that we are doing and things that have been done in the past for the benefit of Earth people. When I say we, I am referring to all of those who are working in your behalf, whether they be from the planets in your system or from surrounding systems.

Through all of your ancient histories, references have been made to visitations from the heavens, or in your modern day language, from space and these are true. Through the growth and decline of all civilizations that have come and gone upon your planet, and there have been several, you have been watched over and helped in times of crisis by your elder brothers from other areas of space. I do not like to use the words, "space people" or "space beings," for you are all "space people." You are riding this spaceship known as planet Earth through space at this very moment and have been through all of your lifetimes.

Those who have come from other areas to help are your elder brothers. They have a great love for you and for all mankind. They realize the oneness of mankind, and that the evolution of each is interdependent to a certain degree upon all the others. That which damages one or a group has its effect upon the whole of mankind, however slight it may be. So you are watched by your elder brothers and helping hands are extended whenever it is possible and necessary.

We will concern ourselves with this civilization now existing upon your planet. From the beginning of this civilization you have received help from your elder brothers from other planets, and even other systems. In your scriptures are given many instances where people have been contacted and given information and direction that would help to improve the situation of their people. Even whole nations of people have been directed and saved from destruction, as is described in your religious histories.

When Moses was led with his people, they were protected, guided and instructed all the way. Through the scientific knowledge of your elder brothers they were led to safety and their enemies were destroyed.

This has happened many times during the rise of your civilization. We have been referred to as angels and as gods because the people of those times described us in the words of their understanding at the moment. In times to come your descriptions will sound as vague as theirs.

We have also served in your times to protect you. Three times within the past 25 years of your time we have saved your Earth from total destruction. Your civilization has discovered powers with which it is not capable of coping, making it necessary for your elder brothers to watch you very closely so that you will not allow this power to get out of hand and destroy you or your planet.

It is the planet which we are most interested in, for you can only destroy your bodies which can be readily replaced, but to destroy a planet is to affect a whole solar system. A solar system is of such a delicate balance that the destruction of one planet could cause great damage to other planets in your solar system. This was once allowed to happen. This is described in your religious histories as the fallen angel, Lucifer. It is described as great fires in the heavens and turmoil upon your planet. It even tells of the rivers as running red as blood. This was caused by the debris of this planet falling upon the surface of your planet. Millions of tons of dust and debris fell upon your planet and others at that time. In fact, the asteroid belt around the planet that you call Saturn was caused by this same event.

It took a great amount of know-how to bring this solar system back into balance. Artificial satellites were launched and much work had to be done. It was decided by the Confederation at that time, that this would never be allowed to happen again. Therefore, a close watch is kept over the actions that go on.

A nuclear holocaust that would destroy this planet will not be allowed. We can and will intervene if it comes to this point. We can only intervene at this point for man must be allowed to evolve in his own way. When he reaches the point of destroying others beyond this civilization, he must then be stopped. We will not use violence, for we have long since learned that violence can only breed more violence. We have tried to bring advancements to your civilization that would lead away

from violence, but we have not been very successful in this way.

One was sent to your planet before the turn of this present century, who brought much scientific knowledge and advancement. He, Tesla, was a part of your nation. He did more to advance your scientific knowledge in his lifetime than any other one that has come into your scientific field, yet much of his wisdom and knowledge was rejected and suppressed by those who were in power at that time. Much of his development was claimed by others, but he was not interested in having credit for his work. He was interested in advancing mankind, and bringing about a better way of life and a safer life. Yet in his latter years upon this planet he was downtrodden and died a pauper. He took with him more knowledge and more advanced scientific data than has been developed since his passing.

Your nation and your civilization has missed a great deal in being closeminded. The power energies that you are using are perhaps the worst that you could have developed. If you had taken another path which was suggested and pointed out you would have a much different world today. You would not have all of the polluted air and waters. You would have all of the energy that you need and its cost would be slight. These things were rejected because those that were in power at that time could not see into the future. They only saw what it might do in the way of reducing their power at that time.

You speak in terms of money, but to the great powers of your civilization money only represents power. They are not really interested in money. They are interested in accumulating wealth for the power that it gives them, and when people become blinded by this power, they are unable to see beyond it. They destroy themselves and those about them.

At the beginning of every Age there has come to your planet a Great One, a Christed one to point the way and to give to Earth people the lesson that is to be learned through that Age. It is sad that man then takes these lessons and distorts them for his own purpose. Yet this is what has happened time after time.

Now man draws to the end of another Age and another cycle. At this time you are completing more than just a 2,000 year cycle. You are also coming to the end of a greater cycle and great changes are taking place. Your solar system is entering a new area of space and the influence of a new vibration. Great change is coming about for your solar system, your planet, and every planet. There will be a great cleansing process taking place, in fact it is in process at this moment. Your Earth will go through great changes but it will emerge cleansed and purified, and a New Age will have dawned.

Your man upon your planet will be a new man. He will have a greater brain capacity. He will be able to understand and comprehend things that are now beyond his comprehension. He will have a new body and a much finer vibratory range. Many there will be who will not be able to make this transition because they have not evolved to that point. This does not mean that they are forever lost. Each must be allowed to evolve at his own rate but when he has not kept up with his planet or his level of life, whatever it might be, and it reaches a point such as your planet and solar system have reached, then he must be taken to another area in space or solar system that will suit his vibration. This will allow him to continue to grow under the circumstances or vibrations that he needs for his development.

So these are some of the reasons why we are here. There is going to be, and is now, great work to be done in this transition. Those of us who have come from other systems have come to do service here, are happy and grateful to have the opportunity to render this service. We shall serve as long as we are needed, for man's greatest opportunity to grow comes in the service to his fellow man. The only way that you can serve your Creator is to serve your fellow man. For as the great Master of your planet has stated, "As you do it unto the least of these, you do it unto me."

And with this, my friends, I will leave you. As I leave I extend to each of you, the love, the light, and the understanding of my people.

I am Oxal.

(Night Class on the etheric plane.)

Clyde: There have been certain times in these classes when we have been given symbols of various kinds, and they have given demonstrations such as the one showing the use of power in moving and handling heavy materials. Another time they demonstrated the use of the Maxim Flame.

Sometimes there are several teachers participating in a class. I remember one time where they demonstrated the speeding up of laws. They used plant life to demonstrate this. They planted the seed, then by accelerating the law pertaining to its growth and development, they were able to cause it to mature and bear fruit, as we watched. The effect was very similar to that of time-lapse photography.

Now this class of February 4, which you were asking about covered several subjects including "Time and Space" and "The Conversion of Energy to Matter and Matter to Energy." The teachers demonstrated the fact that energy and matter are really one and the same. They merely take on a different form as they are changed back and forth, as in the conversion of water to steam. Occasionally students are allowed to

participate in these demonstrations. The teachers touched on the fact that we are entering into a new vibration as we progress into the New Age. The effects of this transition will be much greater in this Age than in the previous one, as we are completing a larger cycle in addition to the 2000 years of the Piscean Age. Man himself will have a more refined body and a greater brain capacity than he has now.

All these things are interrelated as our own bodies have already gone through a process of transformation from energy into matter, as in birth and death as we call it. This process affects everything. Our whole planet will be in a different vibration and our plant and animal life will change with it. Also, those souls of a higher nature who have come here from other planets and other realms will be awakened to their missions and the roles that they are to play in the transition. This is not going to take place overnight. We are not suddenly going to find ourselves in utopia. It is going to take time and it will necessitate rebuilding our whole civilization. It will be faster this time however, than it has been in past civilizations upon our planet.

Another subject covered in this class was man's relationship to his fellow man. They stressed the fact that all living things are really one for they are all connected by an invisible line of energy. Because of this we cannot harm another living thing without harming ourselves. One of the interesting phenomena connected with these etheric classes, is the speed with which we travel there and back again. It seems almost instantaneous. While we are in the sleep state, we suddenly find ourselves at the class, and when it is over we return just as speedily to our sleeping physical bodies. ♣
