

Caveat: These communications are informative teaching instructions for those who seek to increase their understanding of themselves and the magnitude of the future lying before us all. These lectures are not of a religious nature but rather deal with the science of human potential and evolution. This document is a direct transcription from the original recording. Although it has been checked for obvious errors, it has not been finally edited.

Oxal: Greetings in the Light, my friends, I am Oxal.

Tonight we have tuned in upon your conversation through a device that is tuned to the brain frequency of the instrument, and all sounds that take place in this room are recorded clearly by us. Also, for a short period we had our Iconiscan attuned to your location and were able to see you clearly. This is done by attuning our device to the vibratory rate of the material we wish to penetrate and automatically, so far as our device is concerned, this material is erased and we see through it clearly. These are only some of the minor scientific devices that are in our possession.

In answer to a question that was brought out by one of you tonight concerning scientific information being given to Earth people, we have brought many advancements to your people in science and should like to bring much more. But you see, the difficulty is, my friends, that already you are too far out of balance. Your scientific development has reached a point that is far too much ahead of your spiritual development. In order that a civilization might advance successfully, these two must be kept in balance. For you see, friends, unless man has the spiritual understanding the foundation upon which to build his scientific development he is apt to find himself upon very dangerous grounds, and this is where Earth people find themselves today.

Earth man already has within his grasp, power that he is not capable of coping with, for you see, my friends, all energies can be used on either the positive or negative side. Man can learn of great powers, both within himself and in the cosmos. He can master these powers, but he can also use them any way he desires, once they are mastered.

So you see, my friends, spiritual development and understanding is important for unless man has this, he is not capable of receiving the great knowledge of the universe. There is no limit to how far man can advance in these things but unless man has the wisdom and understanding to cope with these things, he will only bring destruction upon himself and this has happened before to civilizations upon your planet, and has happened to other planets.

One planet within your system completely destroyed itself in this manner and we do not wish to see this happen again.

We are interested in bringing Earth people to this realization—to realize that there are two paths to follow—the path of love and understanding, service to man's brother, a realization of his responsibility to his fellow man or he can choose the path of destruction, the path of darkness. Man through all eternity has had the right to choose. Your people are no exception, for man was created with a free will to make his own choices. He does not always choose wisely, yet the path is so apparent.

As we have stated many times, those who make the choice to serve their humanity in every way possible, we shall guide them and protect them.

They shall go about a way of life, not always knowing or realizing why they do the things they do, but realizing the things that they do are right and good, and are helping to raise their civilization to a new height in understanding.

As your system approaches the great changes that are in store we are humbled to be of service to you. We are humbled to be able to serve in the light of truth and understanding. Man of Earth who makes the choice, has a great future before him, one that is far beyond his conception or realization at this time, for planet Earth is about to take its place with the other planets of its system. It shall no longer be set apart as has been the case, but will become a part of the great Federation and communication and travel shall become common place between your planet many others. A whole new horizon of life shall open up. So beloved ones, let your consciousness reach out, for, in the days to come, it will be necessary for you to expand, to open up your consciousness and grasp that which is before you.

I leave you by extending to you the love, light and understanding of my people. I am Oxal. ☸
