

Caveat: These communications are informative teaching instructions for those who seek to increase their understanding of themselves and the magnitude of the future lying before us all. These lectures are not of a religious nature but rather deal with the science of human potential and evolution. This document is a direct transcription from the original recording. Although it has been checked for obvious errors, it has not been finally edited.

Samuel: Greetings to you, my friends. I should like to extend special greetings to our new friends here this night. It is my pleasure to come among you. I hope that I can be of some service to you.

My friends, have you in your searching and in your studies, observed closely the actions and reactions of nature, of the things that go on about you each day? Now nature covers all activities from the lowliest insect to the movement of the planets, of the stars, of the galaxies. All of those things are a part of what you call nature.

In all of these things in the action and reaction, in their movements, are hidden the secrets of the universe. All of God's laws are contained in nature, all things are tied together by etheric threads that are not seen by the eye of man. But they are there and this is what is meant when we say that all is one in this great vast sea of nature. This is what was meant by the great Master Jesus when He said, "When you harm the lowliest creeping thing you shake the throne of Heaven."

So I say to you, my friends, observe closely all of these things that go on about you, the delicate balance, how one depends upon the other for its livelihood. In order to learn the true workings of nature, it requires very, very close observation and study. Man of Earth is just beginning to get a glimpse of the delicateness of this balance, for he has disrupted this balance, he has thwarted nature. She is beginning to react and man will suffer because of this. He cannot blame a deity for this, he can only blame himself, for nature is only reacting according to the law of nature. She must put herself back in balance and if it is necessary to remove mankind to do this, this she will do.

It is the lack of these observations and the selfishness of man that is bringing these things about. Man has put himself above the good of all and when I say the good of all I mean the good of all mankind and of all life, whatever type it may be. It is sad that man must take so long to learn this lesson. How many times he has failed to learn, it is astounding.

Some of your greatest intellects put forth much criticism of people who have failed to gain their intellectual knowledge, who seem to be slow in learning it. Yet if

they only realized how many lifetimes they have spent and have not learned why they met destruction so many times. All mankind learns slowly, some learn certain things faster and more easily than others. But no man has a right to criticize another in his learning for if he were to observe and observe keenly and honestly he would find the same weaknesses in himself, only in other areas.

This is why we have no right to judge, we are not judges, we are only students in this great school of life. The only way that we will finally learn rapidly is to forget self and start observing God's creation and observing it closely, open-mindedly and intelligently. If we do this the great secrets of the universe will gradually unfold before us and we shall obtain true knowledge, true wisdom and true understanding.

Now I should like to change the subject for a moment. The time is now when many awakenings shall begin, the time is now when many choices must be made. The time is now when those who choose to be in the service are going to be tested for their sincerity, for only those who are sincere can be valuable in the service. Many who have seemed in the outer to not be one of the Light, will perhaps be some of the most valuable workers in the future. They will be awakened to a service, not to a great knowledge, but to a service. I speak to all those who will hear my words.

There are going to be times in the very near future when there will be tests, perhaps some have already experienced some tests. Many will receive these opportunities and these tests in the very, very near future. They are going to be called upon for services. Not that we are going to call them, but they are going to be called upon in various ways. Some may be asked directly by their fellow man to perform certain services. Some of these services may require certain sacrifices upon the part of the giver. He may be asked to do things that would cause him some inconvenience, or perhaps something that he would rather not do. He may be asked to leave his home for periods of time and travel long distances. Some of these opportunities will come in a way that you will have to recognize them and respond voluntarily. Some cases may require the loosening of the purse strings and there are those who guard this well.

Some are willing to serve as long as it does not affect their purse. These especially will be tested in this way. So be aware, Earth people, those who would be in the Light, be aware of the opportunities that may come to you to serve in some manner, whether it be a direct request or a situation that you must recognize and respond to yourself.

The testing is in progress. The activity of the Light workers is increasing and also I would like to say that the activity of the dark forces is also increasing. So be ever aware of these things. Be sure that you stay in the Light, do not be misled by the forces of the Antichrist, for more and more of these will appear as time passes. Some will, be very difficult to recognize for they shall display great powers in the name of the Christ.

This is going on all over your planet and as brother Oxal explained to you some time ago, this is also a time of bringing together the Light forces that they might help each other. They are coming together in many ways and they are coming together in some cases from great distances.

But be ever mindful that there are Light workers who are working on many different levels from different viewpoints. There are many who need to be reached in these times, so therefore there must be many different avenues of approach. But the important thing is to recognize each other and come together on the ground of common cause and not upon the ground of differences. For most of the petty differences that exist are of no importance. The main thing is that you are working for the upliftment of mankind, to bring him into a new world of understanding, a new world of peace and joy.

As I leave I should like to extend to each of you my most sincere blessings. May the blessings and the peace, the joy and the understanding of all the Great Ones be invoked upon each of you and may you go forth, your hearts filled with the Christ love and may that love grow ever in your hearts that you might come into a true understanding of it. Peace, peace, peace, I am Samuel. ✨
