

Caveat: These communications are informative teaching instructions for those who seek to increase their understanding of themselves and the magnitude of the future lying before us all. These lectures are not of a religious nature but rather deal with the science of human potential and evolution. This document is a direct transcription from the original recording. Although it has been checked for obvious errors, it has not been finally edited.

Teacher: Peace be with you my friends.

As I come among you tonight, I have observed each of you, and I saw in you a great deal that you have not seen in yourselves. Beloved ones, raise your sights, realize your potentiality. Know that within you lies the power of the universe. You see, beloved friends, it is so much easier for you to doubt your abilities, your powers, than it is for you to try to realize the potentials that lie within you. Accept your challenges of today. Cope with them and be not concerned for the future. You can only live one moment at a time. Live that moment to the very best that is in you. Realize that there is only the now. Know each moment of the day that, that which you are doing is the right thing for you. If you do this, each moment, each hour, each day, shall fall in place. Take each task as it comes to you and be conscious of what you are doing. For, you see, no experience is beneficial unless you are conscious of it, at the moment it takes place.

Each of you have tasks before you that you will perform, and if you will allow yourself to flow with the tide, you shall find that these things will come to you in proper sequence. I know that certain of you now, at this time, are feeling within you this urge to do certain things. These urges are part of your consciousness that is directing you upon your path. These urges, desires, should be well considered by you, and in carrying them out, much wisdom and meditation should be used.

Each of you, beloved ones, should be very grateful for the opportunity to serve Earth humanity at this time, for in this period, Earth will reach a new height in its climb. This civilization that you are now in, is about to reach its greatest height. The advancements that are in the future for Earth people, both scientifically and spiritually, shall bring about a change that the masses at this time cannot conceive of. But I am sure that within the hearts of those like yourselves, you have a slight conception of what it will be like. The darkness is beginning to lift. Suffering, disease, all of these things shall vanish, shall vanish from the face of the Earth. In their place, there shall be radiant health, peace of mind, well being and a Brotherhood of man that has never been known before.

My friends, you are witnessing today this change. It is taking place before your very eyes. But you say to me, there appears to be more suffering, more chaos, more fear and unrest today than ever before. This, my friends, is not true. There is not more of this upon your planet today, it merely seems to you that there is more. For Earth population has increased greatly.

Communications have improved, more information comes to your ears, and too, had you lived in other periods, or could you remember the things that have taken place in other periods in your civilization, you would realize the truth. It is true, very true, that in this changing period, many are affected. It has brought to the surface that which is within them, but still, percentage wise, improvement has been on the upswing.

As brother Hatton has told you, let not your heart be troubled, neither let it be afraid. The time is coming rapidly, and Earth man shall not know fear. In this new age, it shall vanish and be no more. Fear has been man's worst enemy. There is really nothing to fear but fear itself.

I leave you, beloved friends, in peace and love.

Goodnight. ☸
