

Caveat: These communications are informative teaching instructions for those who seek to increase their understanding of themselves and the magnitude of the future lying before us all. These lectures are not of a religious nature but rather deal with the science of human potential and evolution. This document is a direct transcription from the original recording. Although it has been checked for obvious errors, it has not been finally edited.

Clyde: As we were meditating the room filled with an orange light, the room became orange. Then a rotation started in the middle of the room, like a vortex.

It gradually picked up speed until it was turning rather rapidly in a clockwise direction. It seemed as though it just picked up that color and wound it into this cone-shaped vortex.

Then after all this had been wound into the cone, the room filled with a green color. As the vortex began to absorb it the orange moved down and the green formed the top of the vortex.

Then blue began to fill the room, then wound into the vortex. Then both the green and the orange became more narrow to make room for the blue.

Yellow then filled the room and went into the vortex. The yellow took the top position, then came the blue, green, with the orange on the bottom. These were all medium range colors.

As the vortex rotated, the colors began to, one at a time, stream out and sweep the room over those present. This continued for a short time.

Then the colors started to leave the cone as the speed of the rotation of the vortex seemed to slow down and the colors slowly faded away.

I did not see anyone causing this to happen. ✿
