

Caveat: These communications are informative teaching instructions for those who seek to increase their understanding of themselves and the magnitude of the future lying before us all. These lectures are not of a religious nature but rather deal with the science of human potential and evolution. This document is a direct transcription from the original recording. Although it has been checked for obvious errors, it has not been finally edited.

Special: Bless you, my children:

I would ask each of you as I speak to become relaxed. Let your heart do the listening, for we have again brought into concentration here cosmic or universal energies that can be very beneficial to your well-being. If there is need in your physical habitat, you might mentally direct these energies to the areas where the need may be, and perhaps you may receive great benefit.

Beloved ones, People of Earth today and in the days to come are going to face great decisions, decisions that are going to require courage, decisions that are going to determine the future of your race or your civilization. It is very difficult, as I see it, for Earth Man to draw his decisions from his innermost being where lies the Truth. Especially, those of you who have sought Truth and understanding, it should not be difficult to know the right path or the correct decision, and I believe in most men this be true. Yet, there seems to rise up within Earth Man the desire to cause others to suffer because they do not agree with him, or do not see as he sees.

Your nation is, perhaps, the greatest and strongest nation upon your planet today/ They have accomplished great things for the welfare of mankind and in the eyes of those in other lands you are an advanced race. Therefore, your nation stands in the greatest position to lead Earth Man, through example, to the threshold of a new life. Your nation, with its great wealth, great abundance of foods and resources, if wisdom were used, could, perhaps, make the greatest demonstration of a Brotherhood of Man that has ever been made upon your planet. Yet, your people are not willing to do this. They prefer to allow food surpluses to rot and ferment in their storage bins, rather than to feed those who are starving and have not that with which to purchase the food.

This, beloved ones, if I may use one of your terminology's, is a great sin. You see, beloved ones, when nature produces in abundance, she does not produce to be wasted. It is well to have plenty, man was created to have plenty. But, also, in nature there are laws concerning waste, and when man deliberately wastes life's substance, the law reacts, and sooner or

later man will pay for the waste he has created. For, you see, the laws of Creation are just, yet they are firm and they are positive. So, beloved ones, you see it would behoove your nation in its great abundance to wisely share those things and yet do it wisely, but these are only a few things.

In the position that your people hold as a world power, many, many great demonstrations could be made, and I must say some have been made. There have been efforts in this direction, and there are many among your people who would that these things be done, and yet, there are too many who object, who are not willing to go the extra mile, or to turn the other cheek. They must have an eye for an eye, and a tooth for a tooth, but this is not the way of Truth. If man had been created to live unto himself, there would have been no need to create him.

It is difficult for those who stand at the level of understanding of your masses, to be able to get a slight conception of their relationship, one to the other, yet, man must through time, come into the realization of this great fact. For, until man realizes his relationship to his brother man and to his Creator, he has not found Truth. This, beloved ones, is one of the great realizations that man must reach, and this, and this realization, when it has come, is the first great step into the realization of Truth. It is the first great step in understanding Creation and its great laws and the vastness of it. Yes, beloved ones, search and find this realization, for when you have, you have reached a great milestone in the evolution of man.

Beloved children, I hope that each of you have been able to receive benefit from what we have attempted to do for you. It is free, the great universe is filled with these energies. They are the energies that sustain life. Without these you would not be. And it is ours to use in any quantity you desire, for we are the Sons and Daughters of the Creator of all this. It is our heritage. Let us receive in great abundance. We are not limited.

(Chants)

May the peace, love and understanding of the great Brotherhood of Man rest in the hearts of each of you.

So be it.

Go in peace, beloved. ☙
