

Caveat: These communications are informative teaching instructions for those who seek to increase their understanding of themselves and the magnitude of the future lying before us all. These lectures are not of a religious nature but rather deal with the science of human potential and evolution. This document is a direct transcription from the original recording. Although it has been checked for obvious errors, it has not been finally edited.

Teacher: Greetings to you, my friends. It is my pleasure to have the opportunity to spend a few moments with you this evening. If you will accompany me for a few moments, we shall take a short journey into a land which I am sure all of you are anticipating in the far, not too far distant future—spoken of by many Truth Teachers as the New Age or the Golden Age or whatever you may choose to call it.

Visualize if you will, a planet where beings are taught and encouraged to live for one another instead of for one's self. A civilization of entities dedicated to the good of all man, where all developments, all things are created with the thought in mind of how they can be best benefitted by all of their people.

A civilization where man extends his love in equal manner in all of it's relations. Where his love is so great, so expanding, that it envelops all things. He sees all things as creations of the One Great Creation.

A civilization that needs no policing, a civilization that is led by those of great spiritual understanding and love, with a consciousness that is ever expanding and increasing in wisdom and understanding.

A civilization that has such great spiritual understanding that it can and does use great scientific knowledge for the benefit of its mankind, with no thought of ever having to use this knowledge for destruction.

A civilization with such scientific knowledge as to be able to take, any in its civilization who might have criminal tendencies, and by applying simple scientific knowledge and methods, be able to change this person into a loving, understanding entity.

A civilization that has used its scientific knowledge to educate its people, to determine the qualifications of its children at very early ages and to direct them in the path that is best suited to their happiness and to their well-being.

A civilization that has transportation that will enable its people to travel where and when desired, with no complicated matters of financing their trips for all is free to all; where its people and its children are taken on educational journeys thru the lands and taught first

hand rather than by books and where its transportation system will carry them to other worlds within your solar system where they may receive further education and knowledge where anyone so desiring can acquire any knowledge that he wishes and scientific methods which would be beyond your concept at this time.

In this land man does not live by the sweat of his brow. He toils not as man has known toil in the past, for his science has grown beyond that and the science being used for the good of all man does not work for the benefit of the few who would accumulate the wealth of the land.

You see my friends, enough has been supplied for all, if there were not those who demand far more than they need. When the wealth that was created within the planets as they were formed it was created in such abundance as to supply all with plenty. It is only a matter of distribution, a matter of education, a matter of love and understanding. When man has true love, he does not desire more than is needed for his well-being and he takes great pleasure in seeing his neighbor enjoy the same as he enjoys. And with this attitude of mind in all people, there can be no poor and there can be no rich. Class distinction has faded and all men become equal as they are in the sight of the Creator.

Fancy if you will, these people with physical bodies similar to what you know, except perhaps a little more refined, vibrating at, shall we say, a little higher rate. A civilization that does not experience sickness, that has overcome disease, that has learned the power of mind and learned to use the brain contained within the physical body to approximately its full capacity.

If you, my friends, can visualize such a race of men then you have pictured in your mind's eye what the New Age will be like. But before this is reached there will be many trials and tribulations which man of Earth must pass thru before reaching this stage. Many will be called but few will answer. Are you, my friends, are you, my friends, going to be among this few? You can be, my friends, you can be among this few for you have been called. You need only to answer and you answer by the way you express your feelings and your life. It is up to you, my friends, you shall make the choice—no one will make it for you. It has been spoken: Love ye one another. This has been spoken well, for this is the

key to the New Age: Love ye one another. If this is truly expressed in your consciousness, I say, truly expressed in your consciousness, you need have no fear of your future.

Bless you beloved ones, bless you. It has given me great pleasure to spend these few moments with you. Go in peace, go in peace. So be it. ♣
