

Caveat: These communications are informative teaching instructions for those who seek to increase their understanding of themselves and the magnitude of the future lying before us all. These lectures are not of a religious nature but rather deal with the science of human potential and evolution. This document is a direct transcription from the original recording. Although it has been checked for obvious errors, it has not been finally edited.

Nathaniel: Greetings to you, my children, I am Nathaniel.

It pleases us to note that you take an interest in keeping abreast of what is going on about you and in your world. Most recently you have studied about the 6 and 11 Hertz signals being broadcast in the Northwest area of your country. This is good, as the wise ego stays abreast of what is going on about him, and thus is prepared to take care himself and others. But the foolish ego goes about his merry way ignoring and taking no interest in the things that are happening about him. His is only concerned with satisfying his senses and becoming more powerful in the carnal things.

The Great Teacher that you call Jesus, of your Christian religion, often spoke of these things, yet they did not register in the minds of the masses. He made many statements that, if man had stopped to analyze them and to think about them, he could have changed his environment, had he followed their instructions.

When He said, "What gaineth a man if he gains the whole world and loses his soul?" very little thought was given to this statement, yet it had a very deep meaning. Partially this was a fault of the Priesthood for they have also ignored these statements and have not comprehended their true meaning.

"Whatsoever a man soweth so shall he reap," was another profound statement, yet you seldom hear this subject discussed and analyzed by the Priesthood. Many other similar statements were given from time to time, yet little time is spent dwelling on them and in impressing upon mankind the meaning of these statements and how they function. Each one referred to a law, a law of Universal Mind, and these laws are inescapable. Yet most of your people believe that they are escapable, that they can break these laws and then escape the consequences.

This is the reason you see so much turmoil on your planet today. Most of your great scientific minds do not believe this for if they did they would not be tampering with nature. They would not be trying to alter the ways that the Creators have set up for your Universe to function by.

Today upon your planet, as you have learned, this tampering is happening in ever increasing amounts and you are seeing the results. If this continues the results can only become more and more apparent and more severe. Again it is a law of cause and effect. When man violates these laws for selfish purposes especially—and this is the reason that most of these things are done—he is bound by law to suffer the consequences.

If the scientists of your world would come together in their experiments, would seek to know the answers, and to know them in such a way that they would benefit mankind, they would get complete answers and your people would not need to suffer the consequences of the selfish acts of these scientists.

When one tries to manipulate nature for selfish purposes, she will react negatively, but when it is done in a positive way to benefit mankind, she will act in a positive way.

There needs to be a great coming together of minds in a positive way, knowledge for positive purposes, sharing and loving, but this is not the case. Each nation pits itself against the other and tries to come up with knowledge that will benefit them and bring detriment to other nations, oftentimes their neighbors.

So long as this continues you will have turmoil among your people and in nature. It is not necessary for a planet to be plagued by violent storms, violent earthquakes, and so forth. This is a result of man's wrong thinking and poor judgment.

If Man of Earth could join together in a brotherhood of joy and peace, and declare this over and over, demanding it from Universal Mind, it would come about very rapidly. But so long as man operates with greed, with hatred, this cannot come about.

Gradually many of your people are beginning to awaken to this fact but not enough of them express it sufficiently to convince others. But is growing, and there are more and more as time goes by, who are coming into this realization, and if enough of them come into this realization, it will come about. At least this realization is going to be reached by enough to bring it about in the New Age where there will be a new Earth and a new Heaven.

The time is nigh when the cries of the minority will be fulfilled, and those who have sought and asked, are going to find their demands fulfilled. They will have that peace, that love and that joy for which they have sought.

Peace be with you, beloved ones, peace be with you.

Each of you are blest this day.

May you keep on seeking the knowledge that will bring you to a new horizon, a new view of what life can be if you so desire it, and are willing to work to that end.

Peace, Peace, Peace. ♣
