

Caveat: These communications are informative teaching instructions for those who seek to increase their understanding of themselves and the magnitude of the future lying before us all. These lectures are not of a religious nature but rather deal with the science of human potential and evolution. This document is a direct transcription from the original recording. Although it has been checked for obvious errors, it has not been finally edited.

July 3, 1987

Samuel: Greetings to you my children. I am Samuel. It is nice to once again visit with you. How can I be of service to you?

Questioner: Would you like to talk to us about the dates of August 16th and 17th in 1987?

Samuel: Well this is a very important time in your history. To understand it a little better perhaps I might explain to you a little more about the transition from the old to the new. As you look about you, you see the old struggling to hang on to their old beliefs, their old habits and so forth and condemning the new. The new is becoming stronger and more prominent all the time. This is a part of these changing times. You see you have been in the cusp of the transition from the old age to the new age for a number of years. You have been in the first side of the cusp where the old has been declining and the new has been gaining more strength. At this time *(the 15th, 16th and 17th of August in 1987)* that area right in there are the dates at which the tide turns. The 16th is right on the center of the cusp where you will be passing over into the new half of the cusp. The influence of the old will still be there but the influence of the new will be more predominate after those dates. The old influences will become less and less.

There have been of course many changes taking place in this first period of the cusp. You have noticed this. At the start of the travel through this cusp, the early stages of the transition, things that were talked about and believed were altogether different than it is now or has been. You have the increase of the new gaining more momentum as you move through this cusp. From here on, it will gain faster. The changes will be greater. There have been many changes taking place for many years now. Climates have been changing. Your earthquakes and storms have gotten more prominent.

They have gotten worse during that period of time. They will increase even more. The old has to be eliminated and it will be eliminated more rapidly from here on out. You will see many changes taking place now. This will be the beginning of the greater changes in your Earth, in your people and in your civilization. The old must give way to the new. The struggle has

been taking place for quite a long period and will continue for quite sometime yet. But the new will gain much faster from now on. It will bring about many changes in your civilization. Your economic, social and spiritual areas will all go through many prominent, noticeable changes.

This is not going to be an easy time but it is a time that must occur in order to weed out the old and to separate the "wheat from the chaff" so to speak. That is going to occur more rapidly from now on. You will see many more things taking place that will eliminate more and more of the negative population of your Earth. So do not be surprised at anything that might happen such as catastrophic economic changes.

Questioner: It seems that those who choose to be here during these times are very fortunate. It looks like a great opportunity to grow in poise and composure.

Samuel: That is right. It will be easier for those who are working towards that to do it from now on if they are sincere and are really trying to become more self conscious and to raise their consciousness to become more spiritual.

But of course you still have to work at it. It is still up to the individual. It is not going to happen without effort. You see there are no free rides in the universe. Everything must earn its way.

So each of us if we want to reach a goal must work toward that goal, diligently and earnestly. If we do so then we will be rewarded. So expect the new to gain momentum and the old to lose. It is going to eliminate a lot of the population of your Earth and many times the volume will be quite large in one sweep.

Questioner: Have you experienced the many changes that this planet *(Earth)* and her inhabitants will be going through?

Samuel: Oh yes. I have been through it.

Questioner: Do you remember it?

Samuel: Oh yes. These things occur in the normal evolution of a planet. You have to experience these things in order to gain the knowledge and the wisdom. It is not easy but it is good. Nothing that is good is easy.

Questioner: Can you tell us about how many people you speak of when you talk of many people dying in one incident? There have been times in recent history where ten million people have died within a day. Are these the numbers that you speak of?

Samuel: Yes that is what I am talking about. Of course you have to realize that there are an awful lot of people on your planet. Some of the areas on your planet are very heavily populated and you could take ten million out of there and you would hardly miss them. There will be cases where millions are wiped off in one sweep.

Questioner: Would that be towards the end of this period?

Samuel: Not necessarily. You could have a catastrophe somewhere on your planet tomorrow that would wipe off ten, fifteen or twenty million and they would hardly be missed. They would be missed in their own area of course. But worldwide they would hardly be missed.

Questioner: What will the very start of the new civilization be like?

Samuel: There will be certain areas of the Earth that will not change too much. You have to have a place for a civilization to get started again. So there will be certain areas that will not be affected too much just as there have been in the past during big cataclysmic changes. The Earth has shifted on its poles several times in the past. There have been other civilizations of which all of you have been a part of, that have come and gone. So it is all a part of the process of evolution.

There are those that advance faster than others and they are the ones that will lead the flock, so to speak, and help to establish the New Age. They will be leaders and teachers. It is a glorious thing when you stop to think of it.

But it is difficult for most of the people who are expressing here in the physical to comprehend just what is going on. They have become so steeped in old ideas, old beliefs, legends and so forth that it is difficult for them to see and to get a little glimpse of what it is all about from a cosmic standpoint.

You see you put great value on what you call life here. Actually it is not really that important in that we should put a great value on it, except for the experiences that it gives us. This body is nothing but a vehicle, as you already know, to express in this environment. So giving it up should not be any great sacrifice if you can come back with something better such as a body with a higher consciousness and greater moral values.

Your civilization has gone the way of others. When it becomes too corrupt, too materialistic and when it loses its moral values, it then begins to crumble. This is what has begun to happen. That is of course what is happening at the end of this age. It has happened even in your civilization, in nations and countries. The same

thing has happened. They have had their rise and their fall. The fall usually brought about by corruptness and immorality such as the Roman Empire. You could name many others that have come and gone in the same way.

The New Age will depend upon man himself. It is not a guarantee that it will be a success. It will be a greater success than this civilization. Man could still fail to accomplish as much as he can and that civilization might have to go through a great change again. It will depend upon man himself.

It depends upon man himself if he can maintain his values, his spirituality and become aware, really aware, of who and what he is. He is a spiritual being. He is a creator. He creates his own future. Every moment we are creating our future. The more that we can realize that and do something about it through our words, thoughts and deeds, the sooner we will move forward and the faster we will move forward. It is that simple.

Questioner: And complex at the same time.

Samuel: It is only as complex as we make it. Why is it not just as simple to have high morals as it is to have low morals? Why is it not as easy to be honest as it is to be dishonest? Why is it more important that we lie, than it is to tell the truth?

Questioner: Selfish ego.

Samuel: Yes, ego has a lot to do with it. We are so easily hurt. We are afraid to tell the truth so often because we are afraid of hurting someone's feelings. If everyone were to tell the truth, that in itself would make a lot of people more cautious about what they would do and what they would say. It is only complicated because man makes it complicated. It is selfishness, greed, desire for power and desire to control other people and to force your views on others. Man wants others to accept his beliefs rather than allowing each other to express their own beliefs and grant each one the opportunity to do that.

Man must be free. Oh you claim to be free. Your great nation often talks about how free they are but they are not really free. They are more free than many other nations but not all. There are other places on this planet that have more freedom than your country has. But they are small.

This is all a result of greed. But these things must pass away and those that cannot make the change, cannot let go of these desires and who remain entirely materialistic are going to be eliminated.

Gradually they will fade away with the old and the new will take over.

It is up to you my friends. It is up to me as to how far I go. I know that I have a long way to go but I am working at it. I make a mistake now and then, as we all will, until we reach a state of perfection.

None of us are perfect, as yet, but we certainly can try to be. As long as we are trying and doing our best that is all that is asked of us and we shall gradually progress and proceed on the path.

Questioner: Thank you very much.

Samuel: Is there anything else that I can be of help on?

Questioner: Thank you for coming to talk with us.

Samuel: It is my pleasure.

Questioner: What job do you have?

Samuel: I have a number of different things that I do. This is one. I am working in the field of energies. Directing energies to planet Earth. The proper energies to bring about the changes that are necessary. I have many other duties too numerous to mention that I carry out under the direction of my superiors.

Questioner: Are there special energies that are to be directed at Earth on the 16th and 17th of August, 1987?

Samuel: At that time they will have reached a higher level of intensity. That is the point where the energies will begin to increase, certain energies will begin to increase, that will move forward the events and the necessary things that have to happen. It will be felt more. Man himself, due to the vibrations, will be able to progress faster if he really wants to and tries to. That is important.

Now my friends I must leave. As I leave I extend to each of you my love, my blessings, my peace. May you go forth in peace. ☸
