Samuel: My greetings to you, my beloved ones. I am Samuel.

It is my privilege to have the opportunity to spend this time with you.

Earth man spends a great amount of his time and resources attempting to explore outer space. He also does the same thing in many other areas of exploration, such as the medical field and various branches of your science yet at great cost he accomplishes very little. In your medical field, for instance, there has been little advancement in many hundreds of years.

Man does not seem to realize or know the proper way to go about his researching. He always starts in the wrong place, and in most cases, it is kept entirely upon the intellectual level. If Earth man could only realize that if he is to ever make any great advancements he will have to start by researching himself, by learning to know and realize the Inner man. Man's great knowledge and wisdom will only be found through the discoveries of what lies within him. He must become aware of that Inner man. He must learn that all of the secrets of the Inner man can be found through the searching of your Scriptures and the ancient writings of the Wise Ones.

There has been great knowledge given in the past by those Great Masters who have come to your planet. Many of these works and teachings have been put in writing, but they are put in such a way that man must search. He must put forth great and sincere efforts in searching these writings and teachings to bring out the hidden meanings. All of these works are written in parables. They have both an outer and an inner meaning. The outer meaning will appeal to the Outer man and give him hope and encouragement and some understanding. The inner meaning or psychological aspect is hidden in symbols. If man will just search he will find the meaning of these symbols. He will learn to understand why certain words are used in certain places and why certain parables are given the way that they are. He will learn to understand the inner meaning, that which appeals to and develops the Inner man.

Through this he will develop a desire to serve his fellow man.

He will learn his responsibility to his fellow man and what his relationship with him should be. Eventually, he will become aware of many things that he did not know existed. He will become aware of a great inner power that has lain dormant within him. He will learn to use this power for the benefit of mankind. He will discover that most of the things that he has been trying to do in the past can be done much more easily and efficiently, without waste.

He will learn the secrets of the universe how it functions and what man's relationship is to it. He will learn to harness powers that he did not know existed, powers that are there to be used by mankind without cost or waste. He will also learn that these things are to be used for the good of all mankind and not for the benefit of a few. He will learn that the profit system as it exists upon your planet is not a good system and is not a system that benefits all mankind. He will also learn that all men must accept their responsibility to their fellow man. Each must do his share and pull his load, so to speak, knowing that by doing this he is benefiting all mankind.

He will discover that there is no need for poverty, hunger, or suffering and that man can live in peace and harmony. But this cannot be done on an intellectual level. It must become a spiritual thing. Only on a spiritual level can mankind exist in peace and harmony, and never will he do this until he has become aware of the Inner man and learned to apply those principles that are found there.

Mankind upon planet Earth has suffered through the ages because he has not found that Inner man, but has lived and functioned by the Outer man. In the age to come, man will better understand and he will search these areas. He will be better fitted to function in these areas for he is entering an age of greater spirituality. The old is passing and the new is being approached. More of your people today are beginning to realize this due to the vibrations that you are being exposed to. This is beneficial to many, yet, to many others it is disturbing for there are yet the multitudes who cannot accept this idea or are not ready to accept it.

Those of you who can accept this idea and work with it are going to find it much easier to face the times that are ahead, for a great change always brings much turmoil for a short time. Become more and more aware of what and who you are so that you will be better qualified to face this change. Know that you are a child of the great Creator and know that all that He has is yours. You need only to discover and develop it and it is yours to use.

May the peace, the blessings and the joy of all the Great Ones be invoked upon each of you here this night, and may each of you go forth with a greater realization of what lies within you.

Go in peace, my friends. Peace, peace, peace. ♣
