

Caveat: These communications are informative teaching instructions for those who seek to increase their understanding of themselves and the magnitude of the future lying before us all. These lectures are not of a religious nature but rather deal with the science of human potential and evolution. This document is a direct transcription from the original recording. Although it has been checked for obvious errors, it has not been finally edited.

Hatton: I greet you, my beloved friends, in the love and light of the infinite creator.

I know there has been some discussion among you and some wonderment, as to these exercises which we have used upon your instrument, but this has been simply an exercise to clear the vocal system of the instrument.

As your planet and your system moves more and more into its new location in space, you shall note greater changes taking place. The new vibration into which you are moving is bringing about many changes. Even the atomic structure of your atmosphere is being changed, and soon baffling changes will occur in the atomic explosions that your scientists are experimenting with. They shall be greatly baffled by these changes, but they shall be due to the change taking place in the atomic structure of your atmosphere, due to the new vibration into which it is moving. Also, changes will be noted in the beings themselves that are upon your planet, for all must be affected in this change.

We are here for the sole purpose of helping this system in this coming change. We are interested in seeing this system and this planet pass through this change in the easiest possible manner. As most of you are already aware, there are thousands of beings who have volunteered to come and live upon the surface of this planet and aid in this change.

Many of these are known as wanderers. These wanderers have aided through the Ages in various planets and systems, for their aid has been needed.

Yes, beloved ones, these are times of great changes, and this great nation in which you are living, as we see it from our vantage point, must take the lead in bringing about the new Age upon planet Earth. And great concentration, both from without, from those of us who are working from without and those who are working from within, great concentration is being placed upon this nation to prepare for this task.

As was mentioned to you some weeks back, we do not believe from our observation that a great conflict shall rise between your nation and the other great power on this earth. This is not to say that there will not be

conflict, for it appears that there shall be. But the great eagle, if at all possible, shall be spared from this. And in the meantime, prepare to salvage what is left and to bring it together in a Brotherhood that will enable planet Earth to join with the other planets in this system. To take her place in the Brotherhood of Mankind. This has long been awaited by the other planets in your system, and it is our hope that this shall come about in the near future.

Earth man must learn to live together in love and in understanding. I realize that at the moment, this does not seem possible, but I assure you that it can happen, and we believe it shall happen. Man must know himself. To know one's self, will enable one to live in love and understanding, for to know thyself is to know creation. Look within for your truth, for who can establish your truth, your understanding, better than yourself. Within you lies all truth. You need only to seek and find it there.

At this moment, we are sitting here in space 500 miles above the surface of your planet. We have our Iconiscan attuned to your location, and we are able to sit here and observe each of you, as you are sitting there in your comfortable chairs and in your comfortable room. We are also, through our scientific methods, able to pick up any sound or thought that occurs there. Beloved ones, these are some of the things which some day soon, we hope to be able to share with Earth people. We have much to give you, to share with you when you are ready and willing to receive us. We await only the day when we can come to Earth people and be received in love and in understanding.

And now, my friends, I must leave. May each of you reach great heights in your understanding, and may each of you be able to share with those whom you come in contact with, that they may also increase their understanding and their love. Goodnight, beloved ones.
