

*Caveat: These communications are informative teaching instructions for those who seek to increase their understanding of themselves and the magnitude of the future lying before us all. These lectures are not of a religious nature but rather deal with the science of human potential and evolution. This document is a direct transcription from the original recording. Although it has been checked for obvious errors, it has not been finally edited.*

**June 11, 1977**

**Samuel:** Greetings to you, my beloved children. I am Samuel. It is my pleasure to come among you once more. I understand that you have some things that you would like to discuss. I shall be happy to discuss these things with you. What would you like to talk about first?

**Questioner:** We are puzzled by what seems to be an overwhelming number of contacts by space beings of what we would term a negative type and the publicity that this has engendered. There seems to be very little notice being given to those contacts which are of a positive nature.

**Samuel:** You are well aware that there are many entities coming here from various parts of the universe, and you must remember that there are many, many different levels and forms of life throughout the universe. In the last few years, due to the great change that is taking place in your solar system, there has been much interest aroused in other parts and other systems.

As you know, there are many civilizations who are not necessarily evil, yet they have not reached high states of consciousness. However, they have reached heights much greater than yours in their scientific advancement. Many of these come here to investigate your planet and its species of Man, animal and plant, and its atmosphere, mineral content and what have you. They are interested in all of these things, and the contacts of which you spoke, offer the only way they know of to obtain the knowledge that they seek.

**Questioner:** Yes, but this has given the public the impression that there is this great over-mind that controls everyone here upon the planet and that everyone is doing their bidding.

**Samuel:** This is due to the thinking of certain people and the ideas that have been put forth by them. Actually, these beings have not acted as an over-mind, as you call it. These ideas are only figments of some of the earth people's imaginations. Actually, your people are attracting these things due to the vibrations which they have built up and their ignorance of many of these subjects.

**Questioner:** What about individuals like Uri Geller?

**Samuel:** This is a different matter. This has both a positive and a negative connotation. This has been controlled and brought about by a group of negative forces or Black Magicians in hope of developing certain minds among your people which they could control. Also it is being done to arouse the attention of your scientific community to get them to investigate these phenomena. Anyone with a good mind can develop it to do these things. The attention given to these things have aroused a great deal of curiosity in your scientific community. They are spending much time in research on this, and sooner or later they are bound to discover these things for themselves.

Although the original intention was not good, it has also had a positive effect in that your scientific minds are now becoming aware of these things and many of them are beginning to realize the dangers and to see into what is happening. Even Dr. Puharich has great reservations at this time about this and about those who are doing the manipulating. There are many among your scientific minds that have the good of the people at heart and will research these things and find both the advantages and disadvantages of them and the ways that they can be used. Therefore, you will have more of a balance with one working against the other. Those who work from other realms have also been working to try to bring about this balance.

**Questioner:** Will there be any material published to show the public the negative and undesirable side to these phenomena that have received such wide publicity?

**Samuel:** Eventually, but your science is very slow in releasing information of this type. They have to have laboratory proof, and through seeking this laboratory proof they will discover both the positive and the negative sides, and will eventually speak out. So far, I do not think that this is a great problem in your society today. What has been done has not been damaging or disastrous in this particular case. It has been strictly in a research stage.

**Questioner:** We would like to do our part in sharing the story of the good forces and what they are trying to do. One would think by reading the many paperback books on the subject that nothing but these weird things were happening.

**Samuel:** This is due to your writers. This will attract more attention than will the other type of contact, and they are writing their books for monetary purposes.

**Questioner:** Aren't the good forces concerned about this publicity and the many people who are accepting this point of view, and don't you want to counteract it with other positive information?

**Samuel:** People will have to search out for themselves and make up their own minds concerning these things. There is plenty of information on both sides, but if they prefer to search only in one track, that will be all they will find. There are plenty of writings that tell about the positive side of the story, but this does not have the mass appeal. Your masses are not searching for that.

**Questioner:** Oxal has said that there is a need in this area for this type of enlightenment and information. This is why we are hoping to present the spiritual side of the space story here. We know of no other sources in this area who are doing this. It would be nice to know if there are any.

**Samuel:** There are many others in your nation and around the planet who are working on this angle, but you are going to find only a small minority who will be interested. Your area is not too unique. There are many who are searching for Truth. They do not all search on the same path or in the same direction, but they will reach the same goals. There are many such paths.

**Questioner:** We are attempting to share our understanding with any who might be seeking this opportunity. Do you feel this is a wise move?

**Samuel:** This is very good. You should share what you have. That is why it was given to you. You may find much more interest than you think. It may take some time to draw them together. There are many in your area who are interested in these things, but it often takes many attempts and sometime to reach those who are interested. Continue to expose yourselves and your information, and as you make the efforts and move forward, I think you will find that the results will come.

**Questioner:** Would you care to discuss the Don Elkins book now?

**Samuel:** Yes. We checked into this matter and we find that the author felt that the earlier contacts were so well known among those who were interested in this field that it was not necessary for him to cover them. So, he has picked only the later ones and out of these, most were of the type of which you spoke. In the past few years there have not been as many personal contacts by us or by those who are manning the craft, and many of those that have been made have not been publicized by the choice of the contactees. Sometimes it takes awhile, but sooner or later most of these will be made known.

This author has done some investigation, as have many other authors of your books along the lines of

what you call contacts, but they have not investigated thoroughly. This takes considerable time, perhaps several years of study and investigation into the various cases of contacts with people who have the knowledge and experience. These authors have not done that.

**Questioner:** He said that he spent 25 years investigating this field.

**Samuel:** Yes, but mostly in reading the things which he has printed, meeting a few contactees and spending some time with them. In fact, if you will look at his reference to some of the contactees such as Van Tassel, Fry and others, you can see that his investigation was not very deep because of the remarks that he made. He said that they had profited from this which they had not, and he also implied that they were not sincere in their work. So you can see that he has not done his homework as well as he might have.

He is only reporting the results that he has had through his hypnosis experiments, and fortunately he did not run into difficulties which he might have. Not having investigated thoroughly, he is not aware of the dangers of this and how people can be misled and get into very deep difficulties when in contact with the wrong forces. He has been in contact with the same source, at one time, that has directed Uri Geller, but he has contacted other sources, too. He has definitely not done his homework in this area, either, or he would also have included a cautionary dissertation.

**Questioner:** Do you think that he is being controlled or guided by those sources?

**Samuel:** No, I do not think so. I think the man tried to do a complete job in his work and tried to present both sides, but in some areas he is weak. I am sure that you are aware that this is true of many of your authors. To search all of these areas takes much time. He was involved in so much research that he had spread himself too thin, and this is often the case.

**Questioner:** I had a question regarding Carla Rueckert, who collaborated with Don Elkins in writing this book. Her material would appear to have come from the Otavana. Could you verify this for us?

**Samuel:** I am not quite sure about this particular person. It is altogether possible that she could have had contact with the Otavana. There are so many contacts that I would have to check that to be sure. If the material seems to coordinate with what you have received, it is altogether possible. I am not familiar with this person and there are thousands of people around your planet who receive contacts from various sources. The thousands of people upon your planet who are receiving communications of some type, are receiving them from both positive and negative sources.

**Questioner:** We understand that there will be several people at our upcoming meeting that are students of

Joel Goldsmith's teachings. We were wondering how we might present our information to them in a way that would correlate with their understanding and be attractive to them. One suggestion was to concentrate upon the other realms of life and beings of higher understanding. Would you care to comment upon this?

**Samuel:** Well, each individual will have different interests and different questions, but all of these other teachings are fine. There is no quarrel with their teachings. It is just a matter of whether they want to go farther and gain a better understanding of the universe and what lies out there, and what man's relationship is to that.

The problem with so many of these Truth teachers is that they cover a very narrow viewpoint, and so many of them are inclined to bury their heads in the sand and not face up to reality. This, is not Truth. If we are going to study Truth, then we are going to have to see it from all angles. We have to see our responsibilities to our fellow man and the necessity for our service to him. You could sit and meditate and pray for eons of time and you would grow very little if you did no more than that.

**Questioner:** Many feel that as long as they are spreading their own understanding that this is their service to others and they do not need to get involved in civil projects, etc.

**Samuel:** And while they are doing that, their world is falling apart about them!

**Questioner:** Do you agree then, that this approach would be the best one to take in preparing our lesson outline to meet the needs of these people?

**Samuel:** You are taking a wider and more cosmic view of Man and what his true relationship is to his fellow man and to his Creator. This life will never be the ultimate. It is not going to be this life and then Utopia. Many of the metaphysicians do not give too much thought to what is beyond.

**Questioner:** We are interested in learning about the stage of meditation whereby some who practice Transcendental Meditation are able to levitate and do other paranormal things. Would you comment on this for our enlightenment?

**Samuel:** They are not doing anything that you can't do yourself if you are willing to discipline yourself and give the time to it.

**Questioner:** Would this fall in the same category of exploring one's own potential and letting the world fall apart?

**Samuel:** I cannot judge the individuals in this. I think that many of them believe that this is all that they have to do and that if they develop their own potentials it will solve the world problems.

**Questioner:** Well, it will help, won't it?

**Samuel:** It will help if they will get out and do something about the world's problems along with their own development. Without action you do not get results.

**Questioner:** Do you think that this is awakening scientific interest, too?

**Samuel:** Oh yes, your scientific community is becoming very interested in this, especially from the point of developing the mind and improving their abilities to perform. This is fine and through this they can do a much better job whatever their work is. If the individual uses the strength and energy that he gets from this to better his fellow man he will better the world to whatever degree he gives his service.

**Questioner:** Then you agree that it is important to maintain balance?

**Samuel:** Always maintain balance in all things.

**Questioner:** We appreciate all of your help and we hope you will watch over us and our efforts to share with others in the coming times.

**Samuel:** We will help you in every way that we can.

It has been my privilege to spend this time with you and if I have been of any service I am grateful. May the love and the peace of all the Great Ones be invoked upon each of you now, and may you go forth spreading the Truth to those who seek. As a result of this, may those with whom you come in contact have a greater realization of their obligations to their Creator and to their fellow man.

Go in peace, my friends. Go in peace. Peace. ✿
