Philip: Greetings to you, my beloved friends.

I am going to spend a few moments with you tonight in trying to answer some questions that I know art in your minds. I know there has been much speculation, much wondering about our being among you and what our functions are. I might say that they are varied and many. We have infiltrated into your industries of many types. We are very interested in trying to help your people improve their food products. For the food that most Earth men and women are eating today is atrocious. We have tried to bring about new ideas in your industries that would be beneficial to all of your people.

But my friends, you would not believe how difficult this has been. One of our people, a short time back, who had been serving in one of your large aircraft industries, presented drawings and formulas for a new type of power for your aircraft which would have revolutionized the industry, eliminating pollution and would have been very economical to operate. His superiors, in looking over and studying his drawings and in questioning him, could not conceive of what he had presented. They were unable or did not want to see. Some of their arguments were childish. A few days later this person was told his services were no longer needed in that organization. However, we have been able to in some instances, bring about some improvements and inject some new ideas that were acceptable. But we find that they have to be within the scope of their understanding and that your people have to be led slowly.

But their greatest block is the profit motive. They think in terms of dollars. Many times the dollar signs cancel out advancement. Your Army now has a new aircraft which will be announced. Although it will be a great advancement over what they have been using, it is still quite primitive. But we were able to advance some ideas to the engineers that developed it that were acceptable in their concepts.

We have run into the same problem in trying to improve your foods. Through our knowledge we can produce artificial food for plants that will give them all of the minerals and vitamins that they need to nourish the

human body. Yet this is so simply done and so cheaply done that very little profit could be made from it, therefore it has been rejected. They do not know that those who have put forth these ideas are not of your people and we do not wish them to know.

But you would be amazed at the abuse some of our people have taken for advancing ideas and scientific information that was not acceptable. There seems to be no one industry or profession that is willing to accept these advances. The worst opposition has been in your medical field, not that many of your physicians are not sincere and would like to function in a different manner, who have ideas that they would like to try, but they live in fear of the powers that rule over them. So, my friends, we have come among you to do what your people will allow us to do.

Questioner: Why should this knowledge be kept from the "little people" like us since those in power won't accept it?

Philip: What would you do with it?

Questioner: We would probably handle it very unwisely?

Philip: If it cannot be accepted into your industry by your great leaders, how can it be used?

Questioner: But if every individual had food and shelter, the profit motive to some degree, would be unnecessary, would it not?

Philip: How long do you think that you would get by producing this kind of food? My friend, you do not know the ruthlessness of the power's that rule your people. Many of those who come forth with great ideas that would revolutionize a particular industry have found themselves in a very difficult situation if they tried to put it forth.

Questioner: This should be up to the individual to decide if he wants to do this or not.

Philip: This is true and many have tried. But we have found that Earth people, under the system in which they operate with the profit motive, and the power that is accumulated through monetary gains, that change of a nature that goes against these things to any degree is not acceptable and will not be tolerated. We have

tried in many ways and found that we can bring about improvements only if they fit into your system. We have given to certain individuals at times, advanced ideas. None of them have been successful in getting them accepted unless they could fit into your profit system.

Questioner: Were these ideas thoroughly understood by those to whom they were conveyed and in such detail that they could argue their point to develop the idea?

Philip: Definitely so. They were understood in their fullness, not only that but information was available to them that would clarify anything that was not completely understood. It is difficult, very difficult for those who have not encountered these situations to understand how they could exist and this, my friends, this very thing will be the downfall of your civilization and that is coming very rapidly.

As you have been told in the past I am sure, that it is the lack of the proper foundation in your civilization that will bring this about. It has been built upon the carnal, upon self. Your people have been taught, your children are being taught that they are to consider themselves first, they are to be foremost in their considerations. This has been taught generation after generation.

Many of your people do not understand the teachings that your great Masters and Avatars have brought to you. They have ignored them. Everything functions by law. The Golden Rule, as you call it, is a law for whatsoever you do to another, another will do to you." But this is not taught. Lip service is given to doing unto others as you would have them do unto you but that, in most cases, is all that it is.

It amazes us how so many of your people claim to be honest. They would not steal from anyone, they are very adamant about punishing the thieves. Yet they will take advantage of their fellow man, they will take from him in many ways but they do not consider this as thievery. Even those we find who are seeking, who are trying to walk the Path, often take advantage of their fellow man for a little monetary gain. Yet they do not consider this as thievery.

But if you will study the works and teachings of your great Master you will find that He makes this very clear. That those who do these things are just as guilty as that one who stole from the merchant or who robbed the traveler. That, my friends, is the problem in your civilization. Little consideration is given in trying to benefit the multitudes, it is rather in how much they can gain from it.

Where I come from our system is entirely different. Nothing is done for profit, everything is done for the good of all. Any consideration of change or improvement is considered on the basis of what is best for all. We have no poverty, we have no ghettos. No one is forced to do anything yet everyone fulfills their duties. Our children are taught responsibility from the

time of birth. We have ways of determining their talents and abilities and they are trained accordingly. So everyone does the thing that he is capable of doing and does it well. Everyone assumes their responsibilities, everyone has all that they need and have no desire to have more. If you have an adequate place to live, adequate food and clothing, transportation and are happy in your work, what more could you ask for? Why would you want to accumulate a fortune, why would you want to have power over others? Our leaders are chosen for their ability to fulfill the tasks that are for them to carry out and spiritual growth, spiritual understanding is a major factor in the choosing of our leaders.

Now, my friends, I have rambled long enough. I am told that is time for me to vacate this instrument. I wish to thank the instrument and his wisdom for giving me this opportunity and wish to state that it has been my privilege and my pleasure to be among you.

As I leave I should like to extend to each of you my love, my blessings, my peace and joy. May each of you go forth in peace, in love and in joy.

Peace.

I will be seeing you. ☸
