

Caveat: These communications are informative teaching instructions for those who seek to increase their understanding of themselves and the magnitude of the future lying before us all. These lectures are not of a religious nature but rather deal with the science of human potential and evolution. This document is a direct transcription from the original recording. Although it has been checked for obvious errors, it has not been finally edited.

Teacher: May the peace of love and understanding of the great one be with each of you tonight.

You speak of experiences, of visions, of dreams, that come to you, but let me state this my friends, each of these is something that means a great deal to you, and as your awakening comes, you will understand the purpose of those things. It is also possible that you might bring about an understanding of these things through your own meditation, by taking them within with you. I am sure that each of you in the not too far distance, will experience a number of things of this nature. Man, in his unawakened state, has great difficulty in understanding himself, in understanding the nature of his being.

You see, my friends, the fact that you have experienced so many life times leaves a great deal stored in your consciousness. I wonder what Earth people would do if suddenly their past experiences were to flash before them? I am afraid that some of them would not be able to cope with them. They would not believe what they saw. But on the other hand, perhaps they might understand why they must do certain things, why they are drawn to certain people and why they find themselves so closely associated with certain people and why certain relationships exist. Many of these things are a great pattern formed by past experiences.

Karma, my friends, plays a great part in one's life. Karma can be on the positive or on the negative side, for you see, my beloved friends, it works both ways. As your great Master once stated, "As you sow, so shall you reap." And this, my friends, is a definite positive law that always brings about the same results. That is why, in many cases, individuals find themselves drawn to certain individuals, associated with them at various times in their life span.

These associations often occur for a short period to bring about certain results. Others may be of long duration. Today, all across the surface of planet Earth, there is a great deal of bringing together certain individuals. Now, all of this, my friends, is not karmic, for in many cases certain individuals are here for certain purposes in the plan that is being carried out at

this time. And in the work that is in store for these individuals, it is necessary that certain ones be brought together from time to time, and this is arranged in unusual ways. Those of you who find yourselves open and receptive to inner guidance, I am sure, have no doubt that often, through no doing of your own, you are brought into certain action. You do certain things and you find yourself in certain places at certain times. And often those whom you thought would be there, are not, and those whom you did not expect, are there. Often these things are arranged and controlled from sources outside yourself.

More and more people are becoming aware of the changing times on planet Earth. Some are awakened to action and other find themselves rather unconcerned. To use one of your expressions, they take the "So what attitude." These, my friends, are mentally lazy individuals. They are not ambitious enough to put forth the effort that is necessary for their own enlightenment, or either they are worshipping a false master which they are not willing to forgo for the higher learning.

Materialism has become a God for the multitudes of Earth people.

It saddens our heart to know that these people are soon to lose their God, and they will have nothing to cling to. They shall find themselves in great despair, and they shall sink deep, for there will be nothing there for them to hold to. Build your foundation, my friends, on this spiritual rock, and you need have no fear for the future.

There is a great amount of work to be done for planet Earth. The response of the masses is very, very slow. With all the help that is being sent to planet Earth at this time, if its people were only slightly receptive, a great deal could be avoided. A great deal of pollution would be cleared from Earth's aura. But the response has been so very, very slow and the efforts have been so great. We are hoping that this situation shall shortly change. There has been some improvement in the results of our influences among some of your leaders, or perhaps I should say, there appears to be. The results are not yet evident, but our prayers are going out hourly for these people.

Now, my friends, I think I have rambled long enough. I shall bid you goodnight and leave with you my love, my peace and my blessings. ✿
