

Caveat: These communications are informative teaching instructions for those who seek to increase their understanding of themselves and the magnitude of the future lying before us all. These lectures are not of a religious nature but rather deal with the science of human potential and evolution. This document is a direct transcription from the original recording. Although it has been checked for obvious errors, it has not been finally edited.

Zalhem: Greetings to you my children, I am Zalhem. I thought that I would stop by and chat with you for a few minutes. What would you like to talk about.

Questioner: Did President Reagan make a wise decision in bombing Libya?

Zalhem: This is the way of your world. They are not going to allow the terrorist to overrun them, guess.

Questioner: Is this going to help?

Zalhem: Not really. Violence, of course, brings violence. That is not the answer to the problem but until nations and people can sit down and talk to one another in the spirit of what is best for all, this type of thing will continue. It does not seem that your civilization is ready for that type of negotiations yet. So it's all a process that you are going through and eventually it will escalate into something greater. That area has been a "hot bed" as you would call it for many, many years. The people in that area have not been able to get along together. They have been fighting for so long, it is hard to remember when it started. Some day this will change.

Questioner: Will you talk about the economic situation?

Zalhem: It is very difficult to pinpoint when a given event will take place but things are progressing.

Questioner: What about the possible collapse of the stock market?

Zalhem: I do not think that it is the time yet, but it is approaching. It is heading in that direction. As more and more people become involved in the market, due to the fact that they think they see a chance to make some financial gain through the boom of the market, it will bring about a collapse. The manipulators are the ones who come out on top. At this time, referred to as the 'boom of the market', many will be attracted to invest in the market and when enough have taken the bait, they will lower the boom, so to speak. The same as what happened before your last great depression. Almost everyone was buying stock at that time. Even the farmers were getting into the stock market. Easy

money, you know, attracts many. There is no such thing as a free ride, eventually the ax will fall.

Questioner: Will you comment on the new money?

Zalhem: The thing that is holding up the new money at this time, is the idea of a world currency. You do not hear too much about it, but it is being pushed and discussed extensively by those in power. Even some of the new moneys that have come out, have left a blank space on the money to print in the world symbol when it comes along. I think that what you are going to see in the not too distant future is the world currency.

The world money market is having great difficulties with the exchange rate changing all the time. It is difficult in the world trade market to keep track of these changes. The value of the dollar has been purposely dropped to try to balance the trading between countries. Now they are coming to the conclusion that the only way that they are going to be able to do this is by an international currency, with a fixed value.

Questioner: Would you talk about the Ovals and their evolution? Did they start on the moon?

Zalhem: No, the moon, the third planet, is not where they started out. They started out two planets before that. The individualization of the Ovals took place on the moon, when the consciousness was injected and the individualization became a reality. Before that, on the first two planets, it was more of a group consciousness.

Questioner: Like a flock of birds?

Zalhem: Yes, you could compare it to something like that. Each evolutionary cycle of planets is separate and they are not created at the same time and they are not all at the same level. There are many different levels that exist at the same time. The Ovals, that we talked about, did not have a physical body. They did not even have self awareness on the first planet. The atoms were just being put together. On the second planet, they were becoming more and more developed, but still were not ready for individualization. They were not ready to become an individual soul. It was not until the third planet, the moon, that they became individualized. Each one became an individual. There they were able to gain their sustenance from the fruits and vegetables

that grew there. However, they did not have mouths. They did not eat like you eat. They had to absorb this sustenance from the fruits and vegetables, much like some of the plants that you have that wrap themselves around something and absorb it. They also got some of their sustenance from the ethers itself. The moon at one time was a lush planet with all kinds of things growing. This all took place millions of years ago. At this same time, the Earth was just being formed. It was just being put together. All of this takes millions and millions of years. It took the Earth many, many years just to cool down so that it could support plant life.

Well, my friends, I have spent my time. If I have been of any help to you, I am grateful. As I leave I extend to each of you my most sincere love, my blessings, my peace, my joy, and my understanding. May each of you make great progress in the near future, in your seeking and in your evolution, and never forget who and what you are. Never be afraid to claim your rightful place and the blessings that the Father holds for you.

Be not afraid. Did not your Master say, "Be not afraid, for I am with you always." That, I AM, is always with you and if you believe, it will go before you clearing the way, making right the way.

So be peaceful. Peace, Peace, Peace. ♣
