**Oxal:** Greetings in the Light, my friends, I am Oxal.

Since your guests here tonight are interested in what you call the phenomena of UFOs, I shall concern my little talk here tonight to this field.

Now, as you know, your solar system is going through a major change. It is moving into a new area of space where it will be exposed to new vibrations. In fact, these vibrations are already being felt. The change is now in progress and has been for many years. This means that a great many changes will take place in your solar system as well as changes upon the planets. Now all of the other inhabited planets within your solar system are aware of these changes and know what to expect. Therefore, they have requested help from other systems in your galaxy, such as ourselves. As you know we are not from your solar system. As we have stated before we have come here by request of the Federation of your system to help in this transition.

There has been a major concern for planet Earth since it is the only planet in your system that is not aware of the coming changes. That is one reason why there has been so much concentration of spaceships about planet Earth. For one thing, we have attempted to make your people aware and to urge them to prepare themselves, to raise their consciousness, to expand. planet Earth must be prepared to take its place with the other planets of your system. It must be represented in the Federation. Thus far it has not been, as you know.

Now, there are many different types of craft that are working around planet Earth and in your solar system. These have come from various planets in your system and as I have said, some have come from other solar systems. These craft will vary greatly in density. There are some aircraft traveling through your atmosphere daily that you do not see, you are not aware of them being there because they are of such a density of vibration that they are not visible to the physical eye. In fact very few of them are, unless they lower their density to come within the spectrum of your physical sight, and this they often do. Some of them are of a density that can be seen by you. Often these will appear as cloud, by ionizing the air about them they will appear as a cloud. But those that are aware can quite

easily detect these. But it is necessary that Earth man, at least a portion of them, become aware of these changes and of our presence and why we are here.

One of the reasons that we have kept such close watch on planet Earth is because they have been in great danger of destroying themselves and their planet, and had it not been for our intervention, your planet would not exist today. For twice your scientists have come close to destroying all life upon your planet and the planet also, had there not been an intervention. This cannot be allowed to happen and it will not be. We cannot interfere with the evolution of a planet. If they desire they can have their wars, they can kill each other, they can carry on, to a point. But we will not allow the planet itself to be destroyed, for as most of you are aware, it was only allowed to happen once in your solar system and it cannot be allowed to happen again.

Concerning life in space as you call it. There is life, life throughout space, many forms of life that you are not aware of. In fact most Earth people are not aware of any life in space, but life will vary on different planets due to their environmental conditions, their atmospheric conditions, gravity, their distance from the sun, et cetera. It may not be a life as you know it as most of these people on other planets in your system are of a different density as is everything else that they have. Their material, what you would call material things, would be of a different density. In other solar systems you would find much the same situation that you have here as you would find planets supporting life of various densities. There are planets in some of the other solar systems that have not evolved nearly as much as has your planet. There are some that are still developing at a very low level.

Time, as you view it, is not the reality of time. Man of Earth level has a tendency to view time in relation to what he terms a lifetime and that is a very, very small period of time. It may take a civilization such as yours, millions of years to evolve to a point where it can move on to a higher density. This seems to you, perhaps, like a very long time. But when you view it from a different vantage point it does not seem so long. You have all been around for a very, very long time in your concept of time. And there are many upon your planet who still

have a long time to go to reach this state, if you view it from the Earth viewpoint. But in other areas of time, a thousand years can be as a moment, as you view it.

When I mentioned that your solar system is going through a great change I meant that there are going to be changes in the locations of your planets, stars and satellites. You are going to become a binary sun system and when this new sun moves into your solar system the magnetic center of your system will change, and so will the locations of your planets they will have to readjust to the two suns. This is going to make a big difference in your solar system. Earth man will become a different creature due to the new vibrations to which he will be exposed. He will have a body of a higher density and have the capacity to conceive greater knowledge and wisdom. The survival of the fittest will disappear and the lion will truly lie down with the lamb. You will have a consciousness of pure love, of true love, of brotherly love. You will have a much greater interest and concern for your fellow man. You will truly be brothers and sisters. No longer will lust, greed, jealousy and hate prevail. Man will realize how destructive these things can be and he will no longer tolerate them.

This is what we are trying to help your planet come into. It saddens us to know that the majority of the people of planet Earth will not be able to move into this new vibration because they have not prepared themselves. They have refused to listen. They have allowed the lower self, the carnal man to rule, and this can only bring destruction. So new provisions will have to be made for these people so that they might go on with their evolution and eventually be able to take that step. But all men do not move at the same speed. Each must go his own way, must develop in his own way. We cannot force anyone. Each must find his own way in his own time. But to those who have prepared the way, their rewards will be great. They will be the ones who will help develop the new civilization that is to come about on planet Earth.

I leave you now, my friends, by extending to you the love, the light, the understanding of my people. I am Oxal. ✨
