**Samuel:** Greetings to you, my beloved friends. I am Samuel. It is my privilege to spend a few moments with you upon this occasion.

I should like to speak with you for a few moments about nature and its relation to man. Your nation has perhaps advanced more in its scientific knowledge and achievements more in the past two centuries than any other nation upon your planet has advanced since the beginning of your civilization. Your peoples take pride in this accomplishment and this accomplishment would be well except for one thing. The great intellects of your civilization today and in the past have not followed their own laws, they have made their own laws and in so doing they have built upon the sand.

The science of your nation is built upon a foundation that is weak and has been crumbling for some time. Now if man is to have peace, to be happy and to enjoy life, if he is to have bodies that are strong and healthy then he must cooperate, he must be in harmony with the laws of nature. Harmony in man and in nature is very, very important. To be out of harmony with nature is sin and sin causes man to be sick, causes nations to be sick. Your nation today is a very sick nation and your people, by and large, are sick people. In nature is found a cure for any illness that man could have.

But do your men of science search in nature for the cures of sickness? No, he attempts to create them with his great knowledge of chemistry. He attempts to create his cures artificially and what is the end result? Do I need say more?

Man in almost every effort to advance his civilization has done it in such a way as to bring about disaster, for he has opposed the law of nature rather than cooperate with it. Man has in his development of transportation and in the and in the manufacturing of it and in all of these things, has taken an approach which opposed nature. Had he taken an approach that would cooperate with nature, if he had studied nature and her laws, she would have revealed to him her secrets and these things could have been done in such a manner that would not have brought about these results. Then man would be living a much happier existence, a much more productive, a much more peaceful and joyous

existence. He would be working for the welfare of all and he would not have a welfare system that you have today. Where many are not capable or qualified to contribute to your society and must be supported by others in your society. This isn't as nature intended and man with proper motivation would not accept this type of thing but would insist on pulling his share of the load.

Your creators provided everything that man would need to sustain him and to keep him healthy. The only reason your people find themselves in the situation that they are in today is because they are not in harmony with nature as their creators intended them to be. This, my friends, is why those on other worlds who have learned this lesson and applied it, have found greater peace, greater joy, greater understanding. This is why they live in health. This is why many of them are able to travel the universe. They are suing nature's laws to accomplish this and are doing it easily without efforts. They toil but do not toil as do Earth people. They do not think in terms like the Earth people do. What they do they do for the good of all, never thinking for a moment of "What is the best for me, but what is best for all" and this is the law of nature, the law of your God. This is your God.

May the Peace, joy and the love of all the Great Ones be invoked upon each of you and may each of you tune yourselves to His laws and become a part of His laws and in so doing may each of you find a great Peace, a great joy and a great happiness and a healthier body. Peace. Peace. ☸
