

Caveat: These communications are informative teaching instructions for those who seek to increase their understanding of themselves and the magnitude of the future lying before us all. These lectures are not of a religious nature but rather deal with the science of human potential and evolution. This document is a direct transcription from the original recording. Although it has been checked for obvious errors, it has not been finally edited.

Zalhem: Greetings to all of you my beloved children, and I extend a special greeting to your friend here who has not experienced our functions here before. Welcome.

Now I guess you know that I am Zalhem. Now what would you like to talk about. I would like to talk about the things that you are interested in. It will answer them to the best of my ability. I, as you know, do not claim to know everything. So if I cannot answer your question, if it is too involved for me, I will tell you so.

Questioner: Do you know anything about the hurricane off the East Coast. Was it caused by the Russian E.L.F. waves (Extremely Low Frequencies)?

Zalhem: That had a lot to do with it. They are doing a great deal of experimentation, as you know. Even your own government has started to work in this area. This group of experiments are not helping the weather conditions.

Questioner: Does our government have any awareness of the effects they are causing?

Zalhem: Oh yes, they suspect it by now. It took a long time for them to be convinced that this was happening. Some of them now are convinced and they are trying to take counter measures.

Questioner: Would one solution to the Russians using these E.L.F. emitting devices be to develop one of our own, the U.S., and use it against them?

Zalhem: Well, yes it is. They, the Russians, need to be brought to the realization that they are bringing chaos upon a lot of people. That the tables can be turned upon them.

Questioner: Do you think the U.S. government will do that?

Zalhem: Your government is working on that now. It is rather sad that mankind has to take such actions. That your various countries and nationalities cannot work in harmony and cooperation, as they should, trying to develop things that are best for all mankind and will further the evolution of all mankind.

Questioner: Is this part of the pattern that is helping to get people off the planet before the shift of the poles?

Zalhem: A lot of the cataclysms are part of the pattern, but they are worsening the situation.

Questioner: Will that bring about the flip any sooner?

Zalhem: It is possible.

Questioner: Do you think that 1987 will be the turning point in economic system?

Zalhem: I believe that it will be. I believe that they are reaching the end of the rope so far as debt is concerned. The financial institutions cannot stand too much more of this strain. Your nation now has become the greatest debtor nation in the world. In fact your debt is more than all the rest of the other nations together. You cannot go on continually putting out more than you get in. This is not according to Universal Law. So sooner or later, you must suffer the consequences. This is known by most of your economists who take a realistic view of this situation. There are always the few who call themselves optimist, and refuse to face the facts. The facts are there and sooner or later, you will have to face them. The money mongers of the Earth and the astral forces back of them, have too long spread their greed, and it is almost time for them to suffer the consequences. Many of them know this but they are hoping against hope that they can find a way out, and still carry on in their ruthless ways. But this is not possible. That will be the beginning of the crumbling of your financial institutions of your economic system. The crumbling of your money system. All of this is about upon you. They have done just about everything that they can do to ward this off, without losing face. The people themselves have to face up to this situation. Everyone thinks that something should be done about it, so long as it does not affect them. Politicians are a strange breed of people, they have to try to please those who support them, who put them in office. So they are not about to do anything that would displease these people.

Questioner: How do the E.L.F. waves affect the elementals that normally have control over the weather patterns?

Zalhem: It does have its effect on that segment of the elementals. It makes it more difficult for them to do their job, because things are thrown into turmoil. It would be much worse if they were to lose complete control, and enough of this interference could cause that. Hopefully those who are in charge of these experiments will come to their senses soon enough to prevent complete chaos. You cannot interrupt or interfere with nature's normal process without having negative results. You are breaking Universal Law. When you break Universal Law the penalty must be paid. Ignorance of the law does not excuse anyone, just as ignorance of your civil laws does not excuse anyone.

Questioner: What is meant by the phrase "render unto Caesar what is Caesar's and render unto God what is God's"?

Zalhem: If you are living in a society and have governmental facilities, they do have to be supported. In other words taxes are a necessity. When Jesus said this, he was saying to render unto those that is due them, so that they might function. You must render unto the spiritual side also, meaning that good things should be supported. Also that your own efforts should be put into spiritual development or involvement. Paying of your taxes is giving of your efforts, because you had to exert your energies. Refusing to pay your taxes is not an honorable thing to do, unless you are being unfairly taxed. In that case the group that is being unfairly taxed would function as a group. By not paying your taxes, you jeopardize your own involvement, because you are obligated for these taxes, although they may not be used the way you would like to have them used. The way that these taxes are used is partly your responsibility. You have not placed people in these offices that would use this tax money properly and fairly. It is through the loss of interest of the people in their governmental process that has allowed these things to develop. They (the people) are the only ones who can stop it, by ousting those who misuse these funds. Then electing people who are honest and fair. Your governments have become so large and complex that the people have lost sight of their representatives, and this is mostly due to the fact that the people did not take interest in their government.

To use your terminology "Let the other guy do it." You cannot bury your head in the sand and let the rest of the world go by and expect it to go by properly. The evil forces are always there and they are always ready to take advantage of any opportunity to enhance their own welfare. So although your people may complain and be unhappy with their government and its functions, they must face up to the fact that they too, must shoulder some of the blame for this. How many of your people take advantage of your government in its programs, which are supposed to help the needy. So you see you cannot put all of the blame upon the leaders. If the people are to have an honest government, then the people must be honest. If they

are honest and are concerned, then they should use their efforts to help correct this. If enough people would do this, the problems would quickly be corrected. It is so easy to point our finger at someone else, not realizing that we are somewhat to blame ourselves. How is it that your saying goes, "When you point a finger at someone else, you are pointing three back at yourself."

Questioner: Could you talk to us about whether or not we should have credit cards at this time? Will having cards now, make any difference when it comes to getting the "mark of the beast"?

Zalhem: There is nothing particularly wrong with having a card as long as it is properly used. However through these cards, now they are getting all this information on the individuals. It is being put right on the card, in magnetic form. In this way they can tell all about you right from the card, by running it through computers.

Questioner: Are you talking about credit cards?

Zalhem: Yes, credit cards. Are you noticing all the new little things that they are putting on the cards. All these things have a purpose. As your money becomes worth less and less, I think that you will find that they will be going to plastic card altogether. Already you see all of the banks are promoting plastic card, electronic banking, doing away with checking accounts as fast as they can, working on reeducating people. It is all moving in that direction, and it has been for a long time. All of the bar codes that you have on all of your merchandise. It is all part of the electronic system. You will live by electronics very shortly.

Questioner: Would you give us an idea when each individual will have to make the choice between receiving the "mark," or standing apart from that system?

Zalhem: It is a little difficult to say exactly when this will happen. Sooner or later it is going to come when this "mark" is going to be put upon the person themselves, either on the hand or the forehead. As you know there are already experiments of that kind going on at this time in I think its Sweden. They have already started that system, and it will spread from there. It is going to be really difficult for people to avoid this system.

Questioner: If a person did not have a card, this would not mean that they did not have all this information about you anyway. Is this true?

Zalhem: The mark that goes on you would contain this information.

The problem is that you are not going to be able to transact business without this "mark." I would estimate that this is three to five years away. It will depend some on how rapidly they can bring this thing forth. You see there are oppositions to a lot of these things. Some of these parts of the new electronic system are not being

as well received by some segments of the population as they had hoped. For instance, some of the larger companies, that for years have had their own credit card system, are not convinced that there is any advantage to them going to the electronic system through the banks. The bank is going to charge them for these transactions, of course. Now they are not paying this charge. They are carrying their own credit, and collecting the interest on the accounts. They are not particularly interested in this new system, and the banks have not been able to sell the idea to some of the larger companies. Sears and Roebuck is one and some of your large department store complexes.

Questioner: So the negative forces have to figure out a way to force them to enter into this new system.

Zalhem: Yes. The banks are making it very attractive to the individuals now, to discontinue the use of their checks, by charging more for a checking account than they do for electronic banking. They use every angle to gain their way.

Questioner: When the Earth enters into the next age, will you still be here?

Zalhem: Oh sure. I am part of this evolutionary cycle. I will stay with it through the full cosmic day. I am not on the wheel of incarnation, but I am still a part of this evolutionary cycle.

Questioner: Have you moved on to the next planet?

Zalhem: No, it's not ready yet. However once that time comes when this civilization moves to the fifth planet, then this planet will be a dying planet, the same as your moon is now. In the next few years when the cycles change, the moon will be disintegrated at that time. It will be no longer a satellite. When the fifth planet is ready to be occupied, those from Earth will be moved to the fifth planet. Now I am not saying that everyone will go to the fifth planet. There might be quite a few that will not go to the fifth planet. At that time the Earth will start to deteriorate. This is when the destructive forces take over, and it (Earth) will become a satellite of the fifth planet. Much like the moon is a satellite of your planet, at this time.

Questioner: Will this fifth planet be in this solar system?

Zalhem: Yes. It is in the process of development, and is quite far along at this time. There will be some advanced ones who will move on to the fifth planet, and be preparers of the way for those to follow. This will happen in approximately 125,000 years.

Questioner: When C. and I have made the transition and Center R is no longer active, what will you be doing?

Zalhem: The same thing that I am doing now, perhaps.

Questioner: Will you be assigned another Center, of Earth people?

Zalhem: I would not venture to say just what the future would bring about. It is important that all of us reach back and try to help those who are trying to trod the path that we have trod, or to help mankind in general in his evolution. Anything that furthers the evolution of man is good, and we cannot go wrong in doing anything that we can, that would help.

Questioner: Would you please talk on the subject of "speaking in tongues."

Zalhem: "Speaking in tongues," is not the great achievement that your fundamentalists would have it be. It is alright, properly done, but it is no great achievement, and can be good or not so good, depending a lot upon the individual. Much of this is just something coming out of the individual.

Questioner: So this is not coming from a higher realm?

Zalhem: Not necessarily. One of your ancients, Paul, was quite emphatic about that. He said that if you speak in tongues and do all these things and you have not love, you are but a sounding cymbal. What it comes down to it, what is your purpose, and this applies to many things. What are your motives. I would say that in a large percentage of the cases, the motive is to speak in tongues, and that is it. Many feel that once they have accomplished this, that is the ultimate, but that is, of course, furthest from the truth. With many, it is a phase they go through and they move on from that and forget about it. With others, they get stuck in the rut, and remain where they are. This, of course, is true with anything.

We have to be open minded, seek the truth, and develop the intuitive nature of ourselves, so that we may discern truth from fiction. We must always, always ask for wisdom so that any new power that you gain, you might use it wisely, and efficiently. Truth, of course, is relative to the individual. If an individual is truly open minded and seeking, they will find their truth changing from time to time as their understanding becomes greater. You can only receive and use what you are capable of at this moment, but by using this truth, putting it to work you will soon discover whether it is truth or not. Any truth must be demonstrate-able, and if it is not demonstrate-able it is worthless. So when you learn about these truths, put them to work, test them, but test them fairly, not halfheartedly. Some of these laws require a great deal of work and practice to master. Always be willing to change your mind if necessary, when you find something that you believed in, is not altogether true. We have all experienced this. In the evolutionary process, this is one of the things that we will experience many times. This is nothing to be ashamed of or to be concerned with, just keep an open mind, and prove everything as you go.

Now my friends I have stayed my time. As I leave you, I extend to each of you my love, my peace, my joy, and

my understanding. Go in peace beloved. Walk in peace. Be peaceful. May you soon find that great peace which you seek. ✝
