

Caveat: These communications are informative teaching instructions for those who seek to increase their understanding of themselves and the magnitude of the future lying before us all. These lectures are not of a religious nature but rather deal with the science of human potential and evolution. This document is a direct transcription from the original recording. Although it has been checked for obvious errors, it has not been finally edited.

Joseph: Greetings to you, my friends. I am Joseph.

Around the middle of the nineteenth century or shortly thereafter, the motion of change began to increase and since that time, there has been a gradual increase of momentum in the advancement of your civilization, scientifically and intellectually. As time passed, the momentum increased and as you look back,—especially those of you who came in around the turn of the century or shortly thereafter—you must be somewhat amazed at all the changes that have taken place in your civilization within your lifetime.

You have now reached a stage where the advancement is increasing very rapidly, and you are going to see changes in a very short period of time that will alter the whole lifestyle of your people. A great many individuals from Atlantis, who were advanced minds in the field of science, have incarnated in this century, and they have been responsible for the advancements that you have seen and will continue to see. These achievements have not always been used in the best interests of mankind, for if they had been, your lifestyle would be much better than it is at this time. You would all be much better off, for you would have a higher standard of living and could enjoy life to its fullest, but this has not been the case in many instances. Instead, these advanced scientific methods have been used for the purpose of making war.

Man has not reaped the benefits from these advancements that he should have, because the moral standards have not been as advanced as they should have been. All these things are meant for the good of mankind, but how mankind makes use of them is another question. When you think of the enormous sums of money that are spent on machinery for war—or as you put it, for defense—you can see that, had these huge expenditures been used for the good of mankind, your whole world would be functioning on a much higher spiritual level, and a much higher scientific level, as well.

Man would not need to earn his bread by “the sweat of his brow” if he were to use these advancements for the right purposes. However, when these advancements are used for destruction, for invading the rights of the

people or controlling them, the law will begin to react and mankind will bring about his own destruction. It is sad that your leaders cannot see this in the proper light. Oh, if only they could do this and come together in understanding, with good intentions and the attitude of doing that which is good for all. But instead, they meet with an attitude of mistrust, and try to take advantage of each other in order to gain advantage for themselves and increase their own power.

This is a lesson that mankind must learn sooner or later if he is to survive, for it will only be those who incorporate these principles into their thinking and living who will survive the onslaught. The time has come when much of this negativity must be removed from your civilization, and this is what is meant by the Judgment Day. It will be a time of sorting out, when the goats will be separated from the sheep, the sheep being those who have high principles and ideals, and seek justice for all. They are the ones who have a love for all mankind and function with the attitude that all must be free, all must benefit from the good that comes forth.

There is no limit to what mankind can achieve, but there are restrictions as to how he can use his achievements. If they are used for selfish purposes such as gaining power over others, then the law will react and destroy him. However, when these achievements are used for justice, for peace, and for the good of mankind, they will enhance the lives of all. A better life will be the result, and that segment of mankind will move forward in its evolution. Eventually, it will reach its goal which is to become God-like, or in other words, to become a God.

Oh, if only this realization would come to those in power, the morality of your civilization could be uplifted and an era of Brotherly Love could prevail, but I am afraid that this will only be true for a few in comparison to the huge population that inhabits your planet today.

Questioner: Would that be the 144,000 that are mentioned in the Bible?

Joseph: Yes, that is the approximate number of those who will be responsible for starting a new civilization, although the exact figure may be a few thousand more

or less than that, and as we have explained before, the separations will take place on more than one level.

As you see the momentum increase and the changes taking place rapidly, realize that these are the times that you are in, and that salvation is near for those of you who have been faithful to the cause. In due time, you will experience a new life where justice will be justice, and where each man will be taught his responsibilities, and the importance and true meaning of Brotherly Love.

Now, beloved ones, as I leave, I extend to each of you my love, my blessings and my peace. Go in peace, my children. Go in peace, walk in peace, be loving and be kind.

So it is. ✿
