Yaum: Greetings to you, my friends. I thought I would stop by and wish you a Happy New Year. I do not have anything special to say. I just thought it would be nice to stop by and give you my greetings.

Questioner: Thank you. We certainly appreciate your thoughtfulness, and we love you.

Yaum: My love for you is great. As you know, you are like old friends to me. I have been coming to see most of you for quite a few years in your time, and I have become quite fond of you.

I see we have a new friend here tonight. I do not think that I have been in your brother's presence here before, but I believe the lady has been present before when I have been here. I would like to extend a special greeting to both of you, and I hope that all of you will have a very happy peaceful, loving and prosperous year.

I know that all of you have many things that you want to accomplish, and I think you are making good headway. Anytime that I can do anything within the law to be of assistance to you, I would be glad to do so.

Questioner: Thank you. You have our standing invitation.

Yaum: It is not difficult for me to keep in touch with you, as Anthon keeps me pretty well informed. We have been very close friends for a long, long time, much longer than you could realize. But I am not the main teacher. I am only a visitor. Your other four teachers are your main teachers, but they are very generous in allowing me to come and talk to you occasionally.

I always feel very fulfilled after I have come and talked with you. Maybe someday you can all come and see me, and I will show you around China.

Questioner: We have learned a great deal from the time you have spent with us, and we appreciate your loving assistance. Thank you.

Yaum: Yes, we have had some nice visits.

Questioner: In what part of China should we look for you?

Yaum: Well, I usually stay around Peking, but you let me know you are coming and I will find you.

Questioner: Do you mean that we should go in our physical bodies or our astral bodies?

Yaum: Your physical body. You come over and I will show you around. That is a promise. Just let me know that you are coming and I will make the arrangements at that time because I do not stay in the same place all of the time.

Questioner: Would you like to comment on your work, Yaum?

Yaum: Oh, I think I have pretty well explained that to you. I work with a group of people who gather information which then goes into the headquarters where the Occult History is written. The history which we write is the true account of things as they actually happened, not as some historian writes about them.

We leave our bodies and project into all of the great and important meetings of the governments of the various countries of the world, and we keep track of many other things as well. There are 140 of us in this group, and we keep quite busy. As I said, the information we gather is used to write the Occult History, and we attend any meeting that has significance.

Now, you must understand that we do not do this in the physical body. They do not know that we are there, but we know everything that goes on in that meeting and that information is all recorded in the Occult History. That is the only way that you can have a true history because your historians are often influenced by certain segments of your society, or by their own prejudices. Often they do not know what actually transpired, only what someone else has told them.

Questioner: Do you record what they are thinking as well as what they are saying because it might be different?

Yaum: Yes, we make note of all of these things. The really important meetings, those that actually determine the course of events throughout the world, are not held by the government leaders. These events are determined by the powers behind them who control the

world's energy sources. They are the ones who really pull the strings, and they come from all over the world.

Questioner: Do you foresee a 10 or 20 percent devaluation of the dollar within the next year or two?

Yaum: I do not believe that it is going to go that high. They haven't made a decision on this yet, and there is still a great deal of debate concerning this. One of the reasons is they feel that it would have a bad effect on the election. After the election they can do this. They are also debating whether to make it an even exchange or just what rate of exchange it should be, but basically, it will be a devaluation. This would help to reduce the national debt, which is one of the things they are trying to do. As I said, they are still undecided, and there is still much debate for and against it.

Questioner: Will this come as a sudden announcement?

Yaum: I think that the public will be aware that an exchange is being worked out, but they will not know the ratio until it is announced. Now, my friends, I do not want to keep you here, and I promise you tonight, my dear, that I will not get carried away.

Questioner: Yaum, I have a question if you have time to stay a little longer.

Yaum: OK, if that is alright with the rest of you.

Questioner: We have such a willing group. We are not sleepy and we don't have far to travel, so we would like you to stay as long as you wish.

Questioner: As you know, over the years you have made several references to the new Sun. I have been reviewing some of your comments from '61, '73 and '75. At that time, not too much had developed in that area. Do you have any new information that would bring us up to date on the appearance of the new Sun and when this will happen?

Yaum: I don't know that I can add much of anything, as I think that we pretty well described what was going to happen. I do not know the exact time that this will take place. Only the Cosmic Spirits know that, but it will enter your system and it will have its effect. This may occur around the same time as the shift of the poles, but that is not necessarily the case. When it happens, it is going to cause a shifting of all the planets including your Earth, and the chances that the Moon will survive are very small.

When this event takes place all of the planets will shift into a different orbit, and your solar system will have a new magnetic center. Some of the satellites will be destroyed in the process, and there is probably only about a 5% chance that the Moon will survive the change. It will depend upon the direction of rotation when it strikes the Earth's envelope. If it is rotating in the opposite direction, it will tear it apart, and that is probably what will happen.

There will be a great debris that will fall upon your planet, mostly in the form of dust, but this will be beneficial to your planet, acting as a fertilizer. Some lands will sink beneath the oceans and others will rise up. This dust will be especially beneficial to those lands that do not go down, for it will make them more fertile and productive.

Questioner: As you know we have been very interested in learning more about our present Sun and the 8 hertz waves it emits. Will the new Sun function in the same way as our present Sun?

Yaum: It will have much the same effect, but there will be some difference. The two Suns will bring about a different vibratory rate for planet Earth, and this will be beneficial in man's development. It will enhance man's ability to perceive and to use his brain capacity to a greater extent.

Questioner: This confirms what we were discussing last night concerning the magnificence and magnitude of Creation. It is so awe-inspiring when we think of how the Creative Spirits have planned all of this and provided for the continued evolvement of a system they created eons ago. They have even added a new Sun to increase the vibrations of peace and love. It is all so beautiful!

That is only a small part of their work, and when you consider that there are many, many galaxies and solar systems, it truly is awesome. Of course, there are thousands of these Planetary and Cosmic Spirits who are carrying out the will of Universal Consciousness, or God, as you call it.

Questioner: Some time ago we discussed with you the possibility that Reagan might not live to complete his term in office. Do you still think that he may not make it?

Yaum: I do not want to make any predictions of that kind, but there is that possibility. That is as far as I would care to go, for it is not good to make predictions of that nature. Making those predictions can sometimes bring about the very influences that will cause them to happen.

Questioner: Do you think that Reagan's current policy of "gunboat diplomacy" will backfire and cause public opinion to turn against him?

Yaum: People forget very quickly, you know, so it is difficult to say if it will or not. If you were to take a public opinion poll in your nation right now, you would find just as many in favor of it as there are against it. So I don't believe it is going to have a great deal of effect.

Now, my friends, I must leave you. As I leave, I extend to each of you my most sincere love and blessings, and I invoke the love and blessings of the Great Ones. Go in peace, my friends.

Peace, peace, peace.

January 1, 1984

Oxal: Greetings in the Light, my friends, I am Oxal.

I would like to extend to each of you our greetings, and as is the custom of your people, to wish you a happy and joyous new year.

Now, I perceive that you would like to know what we see for your coming year. So, from our vantage point, I will proceed to give some of the things that we see for the coming year.

It is going to be a very eventful year in many ways. You are going to see a continuation of record breaking weather patterns, both extreme cold and heat. There will be droughts in some parts of your planet, and in some parts of your country there will also be the opposite with heavy flooding of some areas.

The fault lines of your planet will become more active in this year of 1984. Part of this will be due to the conjunction of certain planets, placing more strain upon the crust of planet Earth. This will cause greater tensions to build up in the fault lines, thus more and greater slippage will take place.

The economy of your nation will be fairly stable through most of 1984. Those who control the situation are going to make every effort to keep the economy stable, until at least after your new leader is chosen.

It is possible and likely that in the latter part of this year or possibly not until the earlier part of '85, you are going to see a new money system emerge. Many of you are aware of this being considered. Some of those in control of this would like to do it sooner but it will be held off until at least after the elections. The decision has not yet been made as to just what the exchange will be. They have multiple reasons for doing this which you already know about and understand, therefore, I will not go deeper into that. I merely mention that it might possibly and very likely take place in the latter part of this year.

Those who control the money systems of your nation and the world are struggling desperately to prevent the default of what you call the developing nations. This is the one thing that they fear the most, because they realize that it will bring disaster upon your entire banking systems and the banking systems of the world. But they will only be able to prevent defaulting for a short time.

The big problem with all of your nations today is debt, and this also extends down to the people. The debts of your nations and their people is the thing that will bring the downfall of your monetary system. Man cannot function when he is laden with debt. His mind cannot function properly and a nation cannot function properly when it is bogged down with debt. Debt will do to a nation the same thing that hate will do to an individual. It will bring about their downfall. The law of Cause and Effect will bring this about, and once you have gone

beyond the point of no return, it is bound to bring destruction.

The Middle East situation will not improve. The greed and hate is too great among those responsible for the actions there. The greater problem lies in the greater powers in their greed for the power to 'control the energy sources.

It is sad that Earth people have not yet learned to come together and work for the good of all, and to do what is best for all people rather than to try to gain power over others. Greed must be eliminated. There must be a brotherly feeling among men, but that does not seem to be the case. Oh, that we could say that it is true that man had come to the realization that brotherly love for his brother would solve many of his problems. But as yet, that has not occurred.

But on the brighter side there will come such a time and it is not very far off. As time exists it is a very short time when the sheep will be separated from the goats. Those that are left will come into this realization of love and will start to build a new system based on justice, justice for all, and a true love for each other. They will come into the realization that we are all brothers and sisters in the great Universal Plan, and that we should and must function in this manner. They will realize that they must function by Universal Laws, and by so doing, they will not need man-made laws, they will not need law enforcement, for if you live the law, you will not need it.

Yes, beloved ones, the beginning of this type of civilization is not far off. It will take time to build it, but those who will have the responsibility of directing and building this civilization will have that love. Your whole educational system will change. Children will be taught the law of cause and effect, that they will be responsible for their own actions, that they cannot escape God's laws, that if they live those laws, they will have a happy, joyous and prosperous life. It will be known as the "Age of Justice, so do not look upon these times as something terrible, but rather as a cleansing time.

Your great Master that you call Jesus, stated that when you see these signs and these things taking place, rejoice and be glad, for you know that your redemption is nigh. So you have nothing to be sad about, nothing to worry about if you follow His instructions and live by His laws, His rules. You will have nothing to fear, but you will rejoice for you will know that greater things portend.

I leave you, my friends, by extending to each of you my love and my blessings, and I extend to you the love and blessings of all our people. Our love for you is great, but it is not the type of love that most Earth people would understand, for ours is an unconditional love. We require nothing in return, we love you for what you are.

So be it. ♣
