

Caveat: These communications are informative teaching instructions for those who seek to increase their understanding of themselves and the magnitude of the future lying before us all. These lectures are not of a religious nature but rather deal with the science of human potential and evolution. This document is a direct transcription from the original recording. Although it has been checked for obvious errors, it has not been finally edited.

Oxal: Greetings in the Light, my friends, I am Oxal. As Athens just said, we will not keep you in suspense any longer.

All of your astronomers were baffled by the performance of the late comet, Kohoutek. It did not do as we had calculated, either. If this comet had followed the course that it was on it would have been one of the most spectacular comets, from the viewpoint of planet Earth, in this civilization.

If you will recall that at that time, there were some very critical situations upon your planet, especially in the Middle East, as you call it. It was observed, as we understand it, by the Higher Powers, that if this comet were allowed to continue upon the course that it was on, it would probably have triggered a great holocaust upon your planet which would have been very premature.

And also, there were great efforts made by certain individuals to solve the problem in a fair and just manner, so it was determined by the Higher Powers that they should have all of the advantages possible to bring this about. Had the influences of this comet been strong in the environs of your planet, it is doubtful if any progress could have been made. Rather it probably would have been the reverse in the extreme. Therefore the course was changed so that it would not come so close to your planet.

The greater influence would have been on its return after it had gone around the sun. To bring about further reduction in influence, an etheric envelope was put about this body as it passed around the sun. This is the reason that it was almost impossible to observe it after it had made its orbit or part orbit around the sun.

The influences would have been great in many ways. It would have been beneficial to some, it would have raised the consciousness of some. But the influence upon the negative forces would have been greater and would have far offset the positive side.

So, People of Earth, once again there has been intervention in the effort to give Earth man a better chance to work out his problems in a right and just manner.

We sincerely hope that Earth man will continue in his efforts and will not allow the negative forces to overpower those who are trying to do that which is right.

So we would suggest that all Earth People use their power to reinforce the positive, your power of thought, of mind and of prayer.

I leave you by extending to you the love, the light and the understanding of my people.

I am Oxal ☸
