

Caveat: These communications are informative teaching instructions for those who seek to increase their understanding of themselves and the magnitude of the future lying before us all. These lectures are not of a religious nature but rather deal with the science of human potential and evolution. This document is a direct transcription from the original recording. Although it has been checked for obvious errors, it has not been finally edited.

Yaum: Good evening to you, my friends, I am Yaum.

It gives me great pleasure to come among you this evening and to be able to share with you. I know that in the minds of many of you there is great wonderment, shall we say, as to what will take place, due to the conjunction of the planets. So, I say this to you, my friends, I am not a prophet, therefore I do not attempt to prophesy. But watch the events of this year very closely, for this will be a very eventful year. Some of the events that will take place are going to have great effect upon the future of the two great powers upon your planet today, and also upon your entire civilization. But also, the influence of this event will be much more far reaching and will extend over many years to come. That is all I have to say concerning this.

But I should like to, with your permission, speak to you for a little while concerning some of the other things that you were discussing earlier in your gathering. My friends, remember that you are living in a universe of energy. Even you, yourself, are pure energy. What you call electricity plays a great part in the function of your universe and your planet. And remember, too, that your planet is not only a great mass of substance, but it is in its own right an entity in itself. This, my friends, is something to consider. Perhaps this would be somewhat difficult to conceive, but nevertheless, this is true and someday, as you come into a greater understanding of the function of your great universe, you will agree with me. But, your planet is contained within an envelope that you call your atmosphere, and this is made up of many layers of various combinations of gasses. And some of these contain pure gas of one kind or another, such as hydrogen. There is a layer around your planet which consists of pure hydrogen and these layers are many and varied, but each has a definite function to perform. Your planet also consists of or functions by frequencies or vibration. That is to say, these have effects upon the planet and its atmosphere.

Now let us stop here for a moment and go to something else. Thought, you speak of thought and its power. Now, my friends, there is much greater power in thought than is realized by any of you. For thought is energy upon a certain frequency, and this also has or

rather could be broken down into various frequencies, like your electrical current. I refer to that because, perhaps, it is more familiar to you. It has been proven by your own scientists that there are thousands and thousands of frequencies of your electrical current that can be transmitted on many thousands of frequencies, and frequencies far beyond what your scientists have discovered. They have not reached the ultimate of these things, by far. But thought can also be transmitted on many frequencies, and this will determine the effect that it has upon the envelope of your Earth.

Now, my friends, here again, these energies when they are released, do not cease to exist in a short time. They too, go on into the envelope of your Earth and depending upon the frequency of vibration, or perhaps I should say, the frequency of vibration will depend upon—no, I must try to make this more clear. You know sometimes it is quite difficult for me to transfer my thoughts into your language of which I am not too familiar, But if you will forgive this lack of ability that I have not quite overcome yet, I shall proceed. The effect that these frequencies will have in the envelope of your Earth, will depend on the frequency of the thought. Now, you say, "What determines the frequency of the thought?" There are several things there too. The motive back of the thought will determine somewhat the frequency, also the type of thought. For instance thoughts of resentment, of hate, of fear each has its frequency, and this frequency has its effect, and will eventually seek out the same vibration or level of vibration in the envelope. As this builds up in the Earth's envelope and becomes greater and greater in quantity, it will have its effect upon the Earth, because the Earth's envelope has effect upon the Earth and determines what takes place. Now weather, earthquakes, or many, many things are affected, or your planet is affected by these things through the envelope of your Earth a great deal more than your scientists realize.

You see, my friends, why a planet of people living in harmony, living for the good of each other, eliminating hate, resentment, greed, their minds working at all times in what you call positive thinking, you see why these planets do not face conditions that the planets do who do not recognize the importance of these things.

So, you see, it is very important how we allow our minds to function. The act, my dear friends, is not nearly as important as the thought back of the act. For if it were not for the thought, the act would not occur. So that is why planet Earth faces what it faces today.

In your religious books or your Bible, there is spoken something about a day of judgment, and some of your religions make a great issue of this. They believe that the dead shall come to life and everyone shall be judged, like you've been good, you go here, you've been bad, you go there. Well, my friends, there is truly coming a day of judgment, but it shall not occur in this manner, for no great Deity is going to sit upon a great throne and separate his sheep. But, each man will receive justice, according to his own thoughts. He shall bring upon himself his own judgment. Many of you, or I should say, all of you, shall witness this judgment, for it does not matter if you are in this dimension that you call physical, chemical, or whether you are in what you call the astral life. The judgment day will be far-reaching and will include all of Earth people, regardless of the dimension they happen to exist in at this time, for there is very little separation between the two dimensions.

In fact, if all of you had developed within you your full senses, you would know this, for in reality there is no separation. You have taken place a dimension within a dimension. But, as you have been told before, those who have used their powers in the right way, who have attempted to live a life of justice, who have seen the needs of their fellow man and met them, who have faced up to their responsibilities, they have nothing to fear, for all shall be well with them. But they shall witness this judgment and they shall understand. They shall know at this time that man is always dealt with justly through the laws of his creator and not by his creator. That he brings about his own conditions, his own punishment or what so ever you should like to call it.

Now, my friends, I think I have taken enough of your time. Perhaps one of the other teachers would like to speak to your group through one of the other instruments here. I understand there are others here.

It has been my very great pleasure to spend this time with you. I wish to extend to this household my gratitude for accepting me into this household and perhaps again we shall meet. I sincerely hope so. I want to extend to each of you my very deepest love and blessings and may each of you reach the heights that you are seeking in your understanding. I encourage each of you to search diligently.

Goodnight to you, my friends. It has been my very great pleasure to be with you. ❀
