

Caveat: These communications are informative teaching instructions for those who seek to increase their understanding of themselves and the magnitude of the future lying before us all. These lectures are not of a religious nature but rather deal with the science of human potential and evolution. This document is a direct transcription from the original recording. Although it has been checked for obvious errors, it has not been finally edited.

Antho: Peace be with thee, my friends, I am Antho.

I should like to take this opportunity and a few moments to extend to you my love and my blessings. I should like also to state that it has been most gratifying to see you as an organization advance and grow as you have. It is very necessary that groups such as yours, and such as have been formed under various names, yet all working for a realization of their relationship to mankind, to their relationship to their creator. It matters not what you have labeled yourself. It only matters that you are searching for truth, and in your search for truth, be ever mindful of the fact that truth is far reaching, that man, as he passes through the corridors of evolution continuously gathers more and more of the universal truth.

The ultimate in man's evolution and search is a long and narrow path. It will not be reached in this lifetime, nor in the next, but through many, many, many phases of life. Man of Earth has great need of the realization of the search for life. There are those who are advanced in understanding, what in your terminology would be eons and eons of time, and their accomplishments would be inconceivable to man of Earth and would be even inconceivable to many who have passed far, far beyond this level of understanding. Yet, they have not, to their knowledge, reached the ultimate in understanding. So you see, my friends, the search goes on and man becomes ever wiser. His understanding becomes ever greater. Yet, would man be happy if the search were to end?

Life will never become boring to those who search for truth, for you see, truth is never ending. So, beloved ones, keep your sights high, move ever onward with an open mind, with a seeking mind, yet, a discerning mind, using always great wisdom in your search, for there are also the pitfalls for those who use not wisdom.

Beloved friends, as my son, his mate, go forward in their path, they are not apart from you, for in mind there is no separation. In mind and spirit we are all one. We are all one in this great creation of life. Time and distance does not exist in mind and spirit. Know this my friends, and you will not know separation. It has been a great privilege in my experience to have spent the time

with you that I have, and there are many others who wish to extend their blessings and assure you that if you continue in your work, help will be forthcoming in more ways than you know. I know in many cases you will not realize it, but help will be there and will be given. Bear these things in mind, and continue on your path of service to your creator and to man. For when you serve man, you have serve your creator.

My Peace I leave with you and may the Peace, the joy, the understanding of all the great ones be bestowed upon you.

Peace be with you my friends, Peace, Peace.

Yaum: Good evening to you, my friends.

Once more it is my very great pleasure to come among you. I could not pass this opportunity to speak to you tonight for a few moments, for as I have said before, I feel very close to all of you. I feel that all of you are very dear friends, as I hope you feel about me. We have spent many pleasant moments together, have we not, in our discussions, etc., and I have been given again the opportunity to speak to you.

As I believe most of you here know, I am a dweller upon your planet. I have lived and worked upon planet Earth for many, many years. I will not go into this in detail for most of you know and can explain it to anyone who does not understand.

But, my friends, I have been very interested in your organization.

That is why I have spoken to you so many times, and I have also been very interested in many other organizations, in many other groups who are working in the light © who are attempting to bring light to Earth man and it is very, very satisfying to see that there are people all across the planet Earth who are doing this. But the only saddening part, my friends, is that there are not nearly enough. And there does seem at this time to be somewhat of an increase in people who are coming into the realization you see, of what is faced by Earth civilization today and we have great hopes that the awakening will come more and more rapidly to your people.

Of course all of you know what the problem is that faces you and what the solution is the only thing is to get more and more people to realize it and your group here in the city of Detroit has done a very, very good job of this.

We wish to commend you, and there has been a great deal more results than you know about. And this is good. If enough people will get behind these things and try to awaken your civilization, my friends, you cannot possibly conceive of what awaits your civilization in the not too far distant future. If, if they can only pass the point of where they no longer want to destroy each other and to no longer have mistrust for each other, then your civilization will really begin to move forward. Well, my friends, you know these things, but I sincerely hope that your people, you people, will continue in your efforts and encourage others to do the same. And, as my very dear friend

Anthon said, you are going to get much more help than you will realize if your efforts continue. We can only help you in your efforts. Unless you make the effort, we can do nothing for you.

If the people of Earth could realize how much they have been helped by those from outside your civilization, as many of you know, that none of you would be here today had it not been for them. So you see, my friends, every effort that you can put forward is of great importance, for every, every ounce of effort is felt, whether it be in the outward or the inward.

You see, there are many ways you can work. You can work in the outer by doing these things, and also on the mental plane by developing your own light and letting it shine forth into the ethers of your planet, for there is great need of higher vibrations there. So, in every way you can do these things, remember always, take the time to go within, to build your own strength and understanding, searching deep within your own soul for the answers. These things, my friends, I ask you to do.

It is necessary at this time that the instrument and his mate move on. This, my friends, is not only for his good but for yours. This is necessary for all of you at this time. We also wish to extend our gratitude for the service he has rendered to all of you and to us in this manner and to his very dear mate who has in the past been what you might say his "right arm," maybe his right and left both. Without her assistance you would not have all of these printed communications that you have had and many, many other things that is done behind the scene.

So, for all of these things and to all of you for all of your efforts, we wish to thank you, to extend our gratitude.

And we, and I am speaking for all of the various teachers that have spoken to you. It is not possible for all of them tonight to, to speak to you, so I am speaking on behalf of all of these when I say, that their love for you is great, greater than you can ever, ever think or

realize. For it is a love of which you do not yet have understanding. You are each as a great jewel in their sights, for we see you as you are, pure children of the creator, emanating and expressing his good. Each of you are our brothers and our sisters, we are one, we are all of the great one being. I am in you, you are in me. So you see, we cannot be separated, we are all one, just a cell in the great, great spirit of creation, which you may call "God." Expression matters not, the only thing that matters is the realization of our Sonship, our part in this great sea of life.

Beloved ones, we love you, we bless you, we bestow upon each of you the blessings, the love and the understanding of the great Masters, those whose love is of such magnitude that the concept of it is not possible to us yet, I know that through your asking, they have fulfilled.

Peace be with you my friends. Go in Peace and know that you are everything. That you are always in the hands of the great, great intelligence, being continually guided into the knowing of which you seek.

Peace be with you, my friends, Peace.

Oxal: Greetings in the Light, my friends, I am Oxal.

On this night, I come to you with a plea to dedicate yourselves again and again to the service of your civilization. For, today, upon your planet the need is great if your civilization is to survive and move into the new Age, but the choice, my friends, lies with Earth Man.

In your religious histories are predicted or prophesied many events in the latter days of your civilization. Perhaps that terminology is not as it should be, perhaps I should have said, that in the higher evolution of your civilization it is prophesied that great disaster shall befall you. But let me say to you this, that prophecies were given so that

Man would have the opportunity to avoid these things. Prophecies do not necessarily need to be fulfilled, for Man's destiny lies entirely within his own hands. You see, prophecies are made by a realization of a pattern, but patterns can be changed, and you, my friends, the people of Earth, have it within your power to change and to avoid these things.

As I have stated, your civilization at this moment hangs in the balance and which way the pendulum shall swing will depend upon Earth Man. If enough of your people will choose the path of service to their fellow man, the path of love, light and peace, your civilization will experience the greatest advance in its evolution since the creation of this planet. Twice your civilization has risen to this point and fallen. Shall it fall again, or shall you this time, pass over the top and into a true realization of a Brotherhood of Man? People of Earth, it is up to you.

You hold the choice in your own hands. Those of other planets in your system stand ready to help you in every way possible, whenever your people are ready to receive them. We have offered our assistance to those in power upon your planet and have been rejected. Yet, we still stand ready to extend the helping hand. A hand of friendship, if we are accepted.

We cannot solve your problems for you. We can only show you the way, but it must be done by Earth people themselves. For none can profit by another's doing for him but he can profit by using the experience of others who have found the way.

Again, I should like to commend those of you who have put forth their efforts in these directions, who have dedicated yourselves to the service and used your efforts in that direction. We are helping you in more ways than you know and we know of your every effort, of your every accomplishment, for we are watching and recording the actions of all people of Earth. We are aware when you have made the choice and we are aware as to the degree of your choice.

It has been my very great privilege to have worked with you and for you. If, in our dissertations I have been of a slight service or help to you, I am humbly grateful, for we consider an opportunity to serve in the light of truth and understanding a very great and rare privilege. Perhaps it shall be sometime before I shall be able to speak to any of you again in this manner, but in leaving, I should like to leave with you, my very, very deepest blessings, my love and my understanding. It has been my very great privilege. I understand there are some others who wish to extend a few words to you, so we shall withdraw our instrument from you and in their manner they shall speak with you.

Again in leaving, I extend to you the love, the light and the understanding of my people.

I am Oxal. ❄
