**Oxal:** Greetings and light. Greetings and light. I am Oxal of Arcturus. I bring you the greetings and love of my people.

For the benefit of some here who are not familiar with our story, I shall give a brief resume of our purpose in coming to your system. We, aboard the Otavana, are not of your system.

I shall refer to our system as Arcturus, since our sun is known to your astronomers by this name. We are aboard a craft outside your solar vortex.

We have come by request. By request of members of the Confederation within your system. We have come to help your system and especially your planet at a time of crisis. We have been in your skies for nearly three years, as you calculate time. We are not alone. There are many, many craft at this time surrounding your planet. These have come from planets within your system and from many, many systems. We have all come to serve, serve your system and your planet. Each has his mission to perform; each was chosen for his mission because of his particular capabilities. But I shall concern this little talk tonight with my own people and our mission.

Our craft, to be specific, is 120 miles in length; it is 36 miles in diameter; it carries upward of 25 million people and approximately 50,000 smaller craft. It is difficult for you to conceive of a craft of this size, but we do not do things on a small scale. We serve only to our fullest capacity.

Your people, through all generations of time, have had the right to choose. They have not chosen wisely, so, in your time you face a great crisis. We, as have many others, have come to help you. We are awakening your people in great numbers, not to any great knowledge, but to the fact that they must make a choice, that there are two paths which they can follow. To those who make the choice to serve their humanity in every way and to follow the path of service of love, of light and understanding, we pledge our help.

To all those who make the choice, we shall move in with protection, with love, light and truth. We shall guide them into paths whereby they can grow into new

love and understanding. We shall guide them to the opportunities for service. They shall find themselves going about a new way, not knowing why they do this. We pledge our protection; no harm shall come to those who make the choice in full faith and understanding. All of this we shall do and more.

We shall not land upon your planet. We shall not come among you, for all that we do shall be done from here. We could not take you aboard our craft. The vibrations are such that in your present level of understanding you could not exist here. We can perform any of our duties from here. The powers of my people are such that anyone of them could stand upon the surface of our planet and perform any of the miracles described in your religious history. We do not mean to brag of our achievements, for we are servants, servants to a cause, and we are grateful and humble for the opportunity to serve you.

There are many, many brothers and sisters working for your planet and your people at this time. Some of those are able to come among you and are among you. They are seen daily in your skies. Many of them are living among you and serving quietly. If they were to be known, their work would be greatly hampered, for this has been the experience in the past. When we have tried to come among your people and make ourselves known, some were worshipped as gods, which we are not, others would tend to murder us. So, they work quietly among you, as one of you, and thereby accomplish their mission without harm.

I might also add, and some of you are already aware of this, but I believe it might be of interest to certain ones here, that those brothers who are working among you, have been brought here by craft landed upon your planet and became absorbed in your humanity. Others have voluntarily come through the normal route and have lived among you as one of you. Many of these are not yet aware, have not been awakened to their identity, but at the proper time when they are about to perform their tasks, they shall be awakened and go about their Father's work.

There are millions of craft about your planet at this time. They are keeping accurate records, continually making observations of all things that take place. We have instruments that are continually making

observations of all things that take place. We have instruments that are continually registering every movement that takes place in the fault lines on your planet. These things are being watched closely.

The heads of all your governments, I should say your major governments, have been contacted by us. They are well aware of our existence. We have made great offers to them and to your world leaders. We want to share both our scientific and spiritual knowledge with you, but in every case, we have been rejected. Due to your economic structure, your organizations and your customs, it is felt that they cannot accept our offers. Your profit system would not function well under the stipulations which we presented. For what we offer is for all and not for a few. It is for the benefit of all mankind.

Our contacts are now with the people. A great change shall come about through people like yourselves. When enough of your people have established in yourselves enough love and understanding, the changes will be inevitable.

What, my friends, do you think is the greatest power in the universe? Answer from one of the group. "Love is the greatest power." You have spoken truly, my sister. Love can accomplish anything. It is a force that permeates the universe. I say to you, beloved, love one another for through this love shall you rise to great heights in understanding.

I leave you, my friends, by extending to you the love and understanding of my people.

I am Oxal of Arcturus. ☸
