Zalhem: Greetings to you, my beloved friends, I am Zalhem.

I should like to spend just a few moments with you this evening to speak about the change which is coming about at this time.

At the beginning of every age a great Master comes to your planet in physical form as you know it. But before this happens, there is a meeting that takes place upon your planet of many of the Masters who are in control of your planet and they set the postulates as they are to be taught in that age. Then comes what you call the Avatar who presents these postulates to the people. The Avatar will choose certain disciples with whom he will work and with these he will teach more in depth than he will with the general populace. The things that your Master Jesus taught to his disciples were not the same as he taught in public, for here he was dealing with the masses and they had to be taught in parables and in simple illustrations that they could comprehend.

In the later writings this was also true, for instance, your story of creation is told in a very simple form that would be at least partially comprehended by the people of that time. But now your civilization has advanced scientifically, minds have grown in their understanding of some of the laws of nature, so some of the stories of that time do not satisfy many of your people today. So you see it is necessary for the New Age to have a new set of postulates.

As you go into the New Age it will be necessary to leave many of the old concepts behind and to search out the new concepts to be able to understand the new teachings that will be given, not in parables, not in such simple form. But the story will be told as it really is and those who will be chosen, or should I say have been chosen, to establish the foundation and set the stage for the New Age will be those who will be able to leave the old behind and to work with the new. These will be few and the New Age will not be established in a day.

The thousand year millennium that is spoken of in your scriptures will be the period in which this foundation will be laid and where the Brotherhood of Man will be established in reality. Man will learn who and what he

really is and will be able to develop his true potentialities.

Many will not be able to make this transition at this time, they will not be able to leave the old behind. They will cling to the old and resist the new. Therefore it will be necessary that these be not included in the ones that establish the foundation of the new civilization. They will be held in the astral until this foundation is well established and then they will be allowed to gradually incarnate into this civilization and will have the opportunity to take their place again on the ladder of evolution.

There will however, be some who would not be even ready for that, who have not grown at all in the past two thousand years. These will have to be removed to another planet in another cycle of evolution, one that they can fit into and progress as they will.

This is what is meant when it was said that at the end of this thousand years Lucifer will again be released. This does not mean that an evil entity is going to be released into the civilization but it means that many will come into the civilization at that time who are less advanced and are of a more negative nature. From then on, it will be a matter of how the civilization handles itself and what it does to bring them into the full realization of the necessity for them to evolve with the civilization. Every civilization has its challenges and how it meets these challenges will depend upon its progress.

Provision also has to be made for those who are determined to move faster and to really follow the path of the Masters. No one is limited, everyone has the opportunity to progress as he or she might determine to do, none are held back. Everyone has the opportunity to raise themselves to the point of eliminating the necessity of them being upon the wheel of incarnation of your planet and can become one of the great helpers and directors of the planet.

So in your next civilization, which is merely a continuation of this one, the same ones incarnating into the civilization will have a greater opportunity for you will be working under new vibrations and new energies that will enhance your brain capacity and your ability to understand and to absorb. The end result depends

upon the individuals, what they do with their knowledge, how they use it, and whether they gain the wisdom necessary to apply their knowledge in the right direction.

One of your ancients said, "With all thy getting, get understanding," and this is a wise statement except that I would add, with that understanding get wisdom. For understanding without wisdom can be very dangerous.

You have much to look forward to, my friends. Your opportunities will be great, take advantage of them in every way that you can. Work hard at getting knowledge and understanding but also strive diligently to attain the wisdom to go with it. You only need to look about you in your civilization today to see what knowledge without wisdom is doing. Keep ever alert, keep an open mind, but be discerning. Test all of your knowledge, prove it to be true or false for you shall never know by being told that it is so or by reading somewhere that it is so. You must prove to yourself the knowledge which you have attained and when you have proven it, then you know. But until you have proven it, you only know because someone has told you so and this is not true knowledge.

I leave you, my friends, by extending to each of you my most sincere love and blessings. I ask the Love and blessings of all the Great Ones be bestowed upon you now. Go in peace. ✿
