

Caveat: These communications are informative teaching instructions for those who seek to increase their understanding of themselves and the magnitude of the future lying before us all. These lectures are not of a religious nature but rather deal with the science of human potential and evolution. This document is a direct transcription from the original recording. Although it has been checked for obvious errors, it has not been finally edited.

Zalhem: I greet you and I bless you, my beloved brothers and sisters, I am Zalhem.

It is the ultimate purpose of all man to eventually evolve into the higher realms. He may not be consciously aware of this but his soul and his spirit is aware of this fact. But there are certain things that man must eventually accomplish.

Many have been striving for billions of years in your time, yet by the Cosmic Clock this is not so long. Each must travel at his own rate and in his own way but eventually he will attain great heights. He may fall many times along the way and slip back for a period of time but eventually he must progress into the higher realms of life. He must attain adeptship and beyond.

There are two paths that man can travel and there comes a time when he must consciously make a choice. Now there is the long and there is the short path. The long path is the easier path and the one chosen by most. That is to say, you move gradually with the evolution of your civilization and eventually the civilization itself evolves to a point where the negative forces of that civilization created by the negative thoughts and acts become much less.

For the moment you place your feet upon the Path and make that decision and that commitment, you become different from those about you, your fellow man. And those about you take a different attitude toward you and all the negative forces that they create are loosed upon you and this is where many falter and back away.

So you see that if these forces, due to the evolution of the people, are greatly reduced, your path will be easier at that time. This is the first hurdle that you must conquer when you start upon the path to adeptship.

Where, upon the short Path, you decide to move now, you have all of these forces to deal with, plus the other forces of self which we shall talk about at another time.

So it is up to each individual to make the choice, whether he will travel the harder Path and do it now or perhaps wait many eons of time and have an easier time.

The steps upon the short path to adeptship are difficult but once attained you will look back and say, "It was well worth it." For you will begin to see then the great possibilities and opportunities that lay ahead.

Now there are many positions to be filled along the line as you travel the Path. There are many paths that you can take, many specialties that you can follow, too many to mention.

The word Master, in the occult terminology, means one who takes pupils unto himself. He may be an adept or he may have yet a few steps to go to reach that state. Mostly these that we call Masters deal with people in a teaching capacity and in directing certain energies, etc.

But there are many, many positions above this, above the adept, or perhaps we could say many levels of adeptship.

There are those who deal only in energies. There are those who develop root races upon certain continents on certain planets and guide and develop these races.

There are the Logos who are in charge of planets and there are those who work under them and under their direction, carrying out their plans, directing energies and what have you.

The Logos of the planet are in turn responsible to the Logo of the solar system who also has huge numbers of individuals who work under him and so it goes.

There are many titles, too numerous to mention, so when you think in terms of the universe, as you have knowledge of it today, can you not see what a vast operation we are talking about? It gets beyond the finite mind and this is understandable.

So you see, my friends, you have a great future before you, great goals to strive for, much conquering to do. So I say, keep your sights high. Perfection, I grant you, is a long way off, yet this is the goal for which we must struggle. It is attainable to all but it requires strength, dedication and lots of hard work.

Are you willing to strive for these goals? We think you are, we think you will.

There is nothing that gives us greater pleasure than to see one of God's children reach another rung upon the

ladder of evolution, to gain more knowledge and more wisdom.

I leave you, my friends, by extending to each of you my most sincere love and blessings and may each of you make rapid progress upon your path.

Peace, peace, go in peace. ☸
