

Caveat: These communications are informative teaching instructions for those who seek to increase their understanding of themselves and the magnitude of the future lying before us all. These lectures are not of a religious nature but rather deal with the science of human potential and evolution. This document is a direct transcription from the original recording. Although it has been checked for obvious errors, it has not been finally edited.

Zalhem: Greetings to you my children, I am Zalhem. I would like to extend special greetings for the new member here today. It is my privilege and my pleasure to be in your presence.

Now you have discussed at great length about the things that are necessary if you are to grow on the path of knowledge and I concur with what you have said.

I would like to suggest that in your quiet times when you are practicing your visualizations and your concentration, that you ask Deity to assist you in this. That you ask for the knowledge to come to you. That you ask for assistance in improving your ability to comprehend these things. The effort on your part must be exerted if you are to receive this help, for without your efforts, you will gain very little.

As your efforts increase, you will find coming to you opportunities to gain knowledge; opportunities will come from various directions. Recognize these opportunities and take advantage of them. Realize that you must gain knowledge if you are to advance along the path. Do not attempt to gain knowledge too rapidly, that is, going here and going there taking a lot of your time in pursuing in all directions. Rather concentrate on certain areas of your evolvement at certain times.

You are not going to do it all in a moment. Evolution is a slow process and in order for you to evolve properly it must be a slow process. But it is also a continual effort on the part of each individual to move forward on this path.

Now the things that we have given you and lead you into over the periods of time that we have worked with you, are only basic things. They are some basics that you must work with and gain knowledge of and be able to demonstrate degree by degree. All of these things will come about in degrees, and this depends on your efforts again.

The basics must be learned and demonstrated, and brought into use if they are to be of any value to you. Nothing is of value unless it is usable, demonstrable and something that you can make a part of you, that will enhance your life and enable you to help others to

enhance their lives. Each law you must prove for yourself.

To know about the law is not enough. Many people have knowledge of many things, intellectual knowledge, but it is of no value to them because they have only intellectual knowledge. They do not put it to use, do not practice it and therefore, it is of little value to them. So if you are to become knowledgeable you must demonstrate these things, and then you know that you know. We have dwelt on this same theme for several years, but it is so easy to sit back and be satisfied with the status quo.

This is what the Master Jesus meant when he gave the parable of the bridegroom. Do you recall this, "Keep your lamps filled and your wicks trimmed so that when the bridegroom comes, you can enter with him," and "Those who do not fill their lamps and trim their wicks will be left behind." The wedding is rapidly approaching so, are you going to have your lamps filled and your wicks trimmed for the bridegroom so that you may participate in the wedding and the establishment of the new era that you are coming into?

You will have to have enough understanding to establish a new civilization, an understanding that will build a foundation upon which to build a civilization. One that will be built with good social relations, with spiritual development, with the emphasis on justice to all. There will be no prejudice, no racial distinction. All will be equal, and none will be superior. That is the only kind of civilization that can survive.

There is going to be a great effort put forth in the New Age that is upon you to try to keep these principles and to build upon these foundations. It is hard for you to conceive of a civilization of this kind in a highly scientific environment. The science that man has reached today is only child's play compared to what he can have if he will but follow the Universal Laws and forget the manmade laws. If he could realize that if he himself, and his brother man would live the Universal Laws, there would be no need for manmade laws, or armies or navies or police forces. There would be no one to police if everyone lived the law as it was established.

Now, beloved ones, as I leave I extend to each of you my love and my blessings. I ask that the blessings and the love of the Great Ones be bestowed on each of you. May you go forth in peace, love and understanding.

Peace, beloved ones. Peace. Peace. Peace. ☸
