

Caveat: These communications are informative teaching instructions for those who seek to increase their understanding of themselves and the magnitude of the future lying before us all. These lectures are not of a religious nature but rather deal with the science of human potential and evolution. This document is a direct transcription from the original recording. Although it has been checked for obvious errors, it has not been finally edited.

(Excerpted group version.)

Teacher: Time is of the essence. It is not possible to predict the exact time of events, nor exactly how they will go. There are too many factors involved. The monetary system is sliding downward quite rapidly. There will be many efforts made to revive it and will revive it for short periods. But it cannot hold together too long. The situation in the Middle East is deteriorating quite rapidly, as I am sure all of you can see. This eventually will erupt into another world war. But I do not believe this is going to culminate for another perhaps two years. There will be much turmoil there and some warring between some of the smaller nations as you are seeing now. These smaller wars will gradually escalate and in due time will break forth into a greater war which will involve the major nations.

Your nation will not prosper from this war as they have those in the past, for your nation has passed its peak and is on the downward trend. And you are not going to get involved in a major war any sooner than can possibly be helped. Eventually your nation will be drawn in but it will stay on the side lines for some time. But you can be grateful that this will be the last war.

You are going to see in the very near future, even in the coming year, greater food shortages in your nation. Your nation has been fortunate thus far and your people do not realize what it is to experience famine. Other nations of the world have not been so fortunate. But it will also come to your nation. The coming year will also bring many cataclysms such as earth quakes and great storms. Already you are experiencing some of this.

Questioner: In our country specifically?

Teacher: Yes, the record breaking rains, floods. You are going to see greater and greater storms in various parts of your nation. All these things will contribute to food shortages. It is bound to be that way.

So the times are coming upon you, perhaps faster than you realize.

So time is of the essence. Move forward as rapidly as you can.

But not so rapid that you become careless or negligent. Develop yourselves spiritually, for this is also an important part.

The key to spirituality is concentration and visualization. Concentration first. The mental must be developed if one is to become a spiritual soul.

These things are not gained easily. It requires work and I mean work, mental work. There are three things that we consider to be necessary if one is to become a spiritual soul: omniscience, omnipotence, omnipresence. Omniscience means to gain all knowledge. How can a person or individual gain great knowledge when they cannot hold their concentration upon one subject for more than five minutes at a time? One must be able to hold their concentration upon any one subject until they have gained the knowledge that they need or desire concerning that particular subject.

Omnipotence meaning all powerful. One cannot gain the knowledge and the wisdom necessary to be all powerful or to become master of the cosmic forces, to be able to use them and call them forth, unless he has gained omniscience. One must have, if he is to use and call forth the forces that have been provided for him, he must have gained the power of concentration and visualization. And he who has gained ever so small knowledge of these things will never find himself a victim of circumstances or a ward of charity. He will be able to control his own destiny. If one reaches a point where he has a small workable knowledge of these forces, he has made a great stride forward in his evolution. Omnipresence we will not go into, for until one has gained and mastered the first two they will not even want to consider the third. Perhaps sometime we will go into that. But omnipresence means to be present everywhere.

Now, if you have a question or two.

Questioner: When you referred to mental knowledge, it is our understanding that we are going to need a deeper understanding of the laws of Jesus' demonstration. Would you care to elaborate on that?

Teacher: Yes, we referred to the deeper knowledge, the knowledge of how to use these energies for the good of mankind. Why was He able to remove from others illnesses, disease, to bring harmony into their

minds? He was able to do this because he had this understanding. He had gained omniscience and omnipotence. Therefore he was able to use the cosmic energies and to call forth that which was necessary to accomplish what he wanted to accomplish. You must know the colors of these energies, which ones apply to certain things, and until you are able to call forth and master at least the blue and the yellow your accomplishments are still quite weak.

Questioner: You heard our approximate scenario of the future. I do not want to sound gloomy but is that anywhere close to approximately what you see or are we quite a ways off? In the next few years?

Teacher: Meaning time or the happenings?

Questioner: Just the happenings, more or less.

Teacher: I think you are quite close in your estimation of what is going to happen. In desperate times the undeveloped soul or ego becomes very frustrated because he does not have control of his emotions. He loses reason and he becomes violent. So you can expect violence and more violence as people become more and more confused and desperate. People will commit crimes under those conditions who would not otherwise do so. And some are affected much greater than others. You have even seen some of that already, have you not? Over very small things. So you can expect that to be accentuated according to the desperation of the situation.

Questioner: Do you envision the next president of the United States invoking this presidential order and becoming a dictator or is it some other person who will rise and be the dictator?

Teacher: At the moment, I do not see this as coming about in the Reagan administration. However, the situations could change somewhat. You see we cannot determine down to the hour or the moment the reactions of individuals. And much of this depends upon the action of certain individuals, those who control your monetary system. Some call them the international bankers. They are actually members of the dark forces. They think in only terms of what is good for them. They have no sympathy or no desire to raise the consciousness or the well being of others. They proclaim that they do, but their movements are all done for the benefit of themselves. And it is not always possible to determine exactly when they will do certain things. But this is bound to come about through the desperateness of the people. As more and more of your people become unemployed and become desperate for food, they will demand of their government, that they be helped. And it will come to a point next to revolution. When this happens the government has no other choice than to declare a state of emergency because they do not have the wherewithal to take care of all of these people. So they have to use desperate measures and usually this

brings about a dictatorship. You are wondering who the dictator will be?

Questioner: Yes. Will it be Alexander Haig?

Teacher: Well, I would rather not go into this. I think some of these things are better left to develop in their own way.

Questioner: We wish to start our house, but we do not have sufficient resources to complete it. Should we start it not having the money to complete it? Do you see any way that the resources will be forth coming?

Teacher: Very good question. How badly do you want to establish this? What sacrifices are you willing to make? There are many questions perhaps that would arise here. Do you have to have all that you think perhaps you do? Or maybe could you cut some corners and do it more quickly? There is always a way. But you must believe that there is a way and you must visualize this thing as you wish it to be within reason. I would like to add something here, too, in your visualization. Be careful how you visualize for something that you want. Often people make a great error here. If there is something that you want, for instance now you were speaking of your project that you want to do. Now, if you are going to visualize that, visualize it as you would like to have it. And here again, I add, within reason. That which you need, not necessarily that which you want. We have to be careful with this old desire self. Often we desire much more than is necessary. But to get back to the visualization, visualize it as you would like it, as you feel it should be. Do not visualize the money to do this. Let God, as you call Him, handle that because often people will want something of this nature and they will establish what it would cost and then they will start visualizing the money. When you do that, you are only visualizing money and you are not visualizing what you really want. And in due time you will get the money but the problem is that something else may enter in here. Some emergency, perhaps, that you would have to use the money for.

(Full personal version.)

Teacher: Greetings to you, my son, and my special greetings and love to all of you. It is my privilege to again have this opportunity to speak with you. You have much work ahead of you, as I know you realize. And we are happy to see that you are making some progress. I think such gatherings as you have had here today to establish your postulates shows us that you are sincere and attempting to move forward. We are doing all that we can do to aid you by attempting to bring about opportunities that would be advantageous to you. Often we do these things by impressing others to do things that will be beneficial to you and we try always to see that they will be beneficial to the other individual also. And I believe that you have begun to

see some of the results from some of these efforts. Am I right in thinking or saying this?

Student: Yes, thank you. I am assuming you are meaning the dam situation on the lower end of the property and the new products.

Teacher: We are working on other ways of bringing to you opportunities and ways and means of accomplishing the things that we would like to see you accomplish.

Questioner: Do you envision only a five foot dam (*small*) or do you think we will end up with a larger one where we have a lake?

Teacher: I would not like to say specifically but my feeling is that you will find it advantageous to build the higher one and with that you should have no problems with your lake. We hope that we can bring about situations that this can be of not too great a financial burden for you. But you must realize too that we are dealing with individuals quite often who do not have the consciousness or the awareness that some of you have. Also you must realize that in any project that is established for the good of man other forces will come in who are not interested in the welfare of man and will attempt to throw blocks in your way. I am sure you have run into some of this already. We attempt in every way we can to eliminate these things but the opposing forces are also powerful and often they are more successful in influencing certain types of individuals, due to the consciousness of these individuals, than we are, in that they are more susceptible to the influences of evil than they are susceptible to the influences for good.

Questioner: I wish to thank you because I can feel your help. Things have matured without a lot of effort on my part even though I have been involved. It has fallen together so nicely that I know you have had a hand in it.

Teacher: But all that we do will not help unless the individuals involved carry out their part and work together for the good of all and for the love of mankind. This is our primary interest.

Questioner: We feel the time is getting very short and we have been guessing at a year to eighteen months. Do you think that is realistic or not realistic?

Teacher: Time is of the essence. It is not possible to predict the exact time of events, nor exactly how they will go. There are too many factors involved. The monetary system is sliding downward quite rapidly. There will be many efforts made to revive it and will revive it for short periods. But it cannot hold together too long. The situation in the Middle East is deteriorating quite rapidly, as I am sure all of you can see. This eventually will erupt into another world war. But I do not believe this is going to culminate for another perhaps two years. There will be much turmoil

there and some warring between some of the smaller nations as you are seeing now. These smaller wars will gradually escalate and in due time will break forth into a greater war which will involve the major nations.

Your nation will not prosper from this war as they have those in the past, for your nation has passed its peak and is on the downward trend. And you are not going to get involved in a major war any sooner than can possibly be helped. Eventually your nation will be drawn in but it will stay on the side lines for some time. But you can be grateful that this will be the last war.

You are going to see in the very near future, even in the coming year, greater food shortages in your nation. Your nation has been fortunate thus far and your people do not realize what it is to experience famine. Other nations of the world have not been so fortunate. But it will also come to your nation. The coming year will also bring many cataclysms such as earth quakes and great storms. Already you are experiencing some of this.

Questioner: In our country specifically?

Teacher: Yes, the record breaking rains, floods. You are going to see greater and greater storms in various parts of your nation. All these things will contribute to food shortages. It is bound to be that way.

So the times are coming upon you, perhaps faster than you realize.

So time is of the essence. Move forward as rapidly as you can.

But not so rapid that you become careless or negligent. Develop yourselves spiritually, for this is also an important part.

The key to spirituality is concentration and visualization. Concentration first. The mental must be developed if one is to become a spiritual soul.

These things are not gained easily. It requires work and I mean work, mental work. There are three things that we consider to be necessary if one is to become a spiritual soul: omniscience, omnipotence, omnipresence. Omniscience means to gain all knowledge. How can a person or individual gain great knowledge when they cannot hold their concentration upon one subject for more than five minutes at a time? One must be able to hold their concentration upon any one subject until they have gained the knowledge that they need or desire concerning that particular subject.

Omnipotence meaning all powerful. One cannot gain the knowledge and the wisdom necessary to be all powerful or to become master of the cosmic forces, to be able to use them and call them forth, unless he has gained omniscience. One must have, if he is to use and call forth the forces that have been provided for him, he must have gained the power of concentration and visualization. And he who has gained ever so small

knowledge of these things will never find himself a victim of circumstances or a ward of charity. He will be able to control his own destiny. If one reaches a point where he has a small workable knowledge of these forces, he has made a great stride forward in his evolution. Omnipresence we will not go into, for until one has gained and mastered the first two they will not even want to consider the third. Perhaps sometime we will go into that. But omnipresence means to be present everywhere.

Now, if you have a question or two.

Questioner: When you referred to mental knowledge, it is our understanding that we are going to need a deeper understanding of the laws of Jesus' demonstration. Would you care to elaborate on that?

Teacher: Yes, we referred to the deeper knowledge, the knowledge of how to use these energies for the good of mankind. Why was He able to remove from others illnesses, disease, to bring harmony into their minds? He was able to do this because he had this understanding. He had gained omniscience and omnipotence. Therefore he was able to use the cosmic energies and to call forth that which was necessary to accomplish what he wanted to accomplish. You must know the colors of these energies, which ones apply to certain things, and until you are able to call forth and master at least the blue and the yellow your accomplishments are still quite weak.

Questioner: You heard our approximate scenario of the future. I do not want to sound gloomy but is that anywhere close to approximately what you see or are we quite a ways off? In the next few years?

Teacher: Meaning time or the happenings?

Questioner: Just the happenings, more or less.

Teacher: I think you are quite close in your estimation of what is going to happen. In desperate times the undeveloped soul or ego becomes very frustrated because he does not have control of his emotions. He loses reason and he becomes violent. So you can expect violence and more violence as people become more and more confused and desperate. People will commit crimes under those conditions who would not otherwise do so. And some are affected much greater than others. You have even seen some of that already, have you not? Over very small things. So you can expect that to be accentuated according to the desperation of the situation.

Questioner: Do you envision the next president of the United States invoking this presidential order and becoming a dictator or is it some other person who will rise and be the dictator?

Teacher: At the moment, I do not see this as coming about in the Reagan administration. However, the situations could change somewhat. You see we cannot determine down to the hour or the moment the

reactions of individuals. And much of this depends upon the action of certain individuals, those who control your monetary system. Some call them the international bankers. They are actually members of the dark forces. They think in only terms of what is good for them. They have no sympathy or no desire to raise the consciousness or the well being of others. They proclaim that they do, but their movements are all done for the benefit of themselves. And it is not always possible to determine exactly when they will do certain things. But this is bound to come about through the desperateness of the people. As more and more of your people become unemployed and become desperate for food, they will demand of their government, that they be helped. And it will come to a point next to revolution. When this happens the government has no other choice than to declare a state of emergency because they do not have the wherewithal to take care of all of these people. So they have to use desperate measures and usually this brings about a dictatorship. You are wondering who the dictator will be?

Questioner: Yes. Will it be Alexander Haig?

Teacher: Well, I would rather not go into this. I think some of these things are better left to develop in their own way.

Questioner: We wish to start our house, but we do not have sufficient resources to complete it. Should we start it not having the money to complete it? Do you see any way that the resources will be forth coming?

Teacher: Very good question. How badly do you want to establish this? What sacrifices are you willing to make? There are many questions perhaps that would arise here. Do you have to have all that you think perhaps you do? Or maybe could you cut some corners and do it more quickly? There is always a way. But you must believe that there is a way and you must visualize this thing as you wish it to be within reason. I would like to add something here, too, in your visualization. Be careful how you visualize for something that you want. Often people make a great error here. If there is something that you want, for instance now you were speaking of your project that you want to do. Now, if you are going to visualize that, visualize it as you would like to have it. And here again, I add, within reason. That which you need, not necessarily that which you want. We have to be careful with this old desire self. Often we desire much more than is necessary. But to get back to the visualization, visualize it as you would like it, as you feel it should be. Do not visualize the money to do this. Let God, as you call Him, handle that because often people will want something of this nature and they will establish what it would cost and then they will start visualizing the money. When you do that, you are only visualizing money and you are not visualizing what you really want. And in due time you will get the money but the

problem is that something else may enter in here. Some emergency, perhaps, that you would have to use the money for.

So, if you visualize the house, etc, as you want it, do not necessarily think about the money. Universal Mind will bring it about in the best possible way that it could be done without either bringing inconvenience or hardship to anyone else. But this is a mistake many people make. Do not try to tell Universal Mind or God how it shall be done. Let that be the function of It. When you do that, things will work out harmoniously and fall in place.

Now, if you feel that now is the time, and I think you do, I think you have foresight enough that you are seeing what is taking place and the results, that are bound to happen. You feel that now is the time. Perhaps it would have been advantageous to you had you started working on this much sooner, mentally, I mean, because you would have much water over the dam by now, because these things do take some time and the time limitation depends a great deal on your power of visualization and concentration and the time and effort that you put into it. But you have others who can work with you on it which will also help.

Questioner: Do you see anything that can be done with the progress of this project that perhaps is not being done now? Do you suggest anything?

Teacher: Perhaps I could suggest a lot of things but the way it stands at this moment, you do not have here the help that would be necessary and perhaps the funds either at this moment to do some of the things that need to be done. As I mentioned before when I talked to you that you are going to have to have assistance here in developing a lot of these things that you cannot do all by yourself. Until such a time as you can have that aid here for you, this is going to be difficult for you to do some of the things that need to be done.

Questioner: Could you mention some of these things so we could help visualize them and be more aware?

Teacher: Well, it depends on where you put your priorities. I think at the time now a great deal of your efforts should be put into the project that has been presented to you now, the dam and getting that in motion. Once this has been done, then you can move on to other things such as your green house and setting up your food storage, etc. You have already gained a great deal in that area. But you will have to establish priorities on the various needs as you go and I think the sooner you can be prepared for some to come who will be helpful to you in a way that you will not have to expend money for it. Efforts put forth in the physical, the work that needs to be done.

Questioner: Surveys and ...

Teacher: Yes, I think this will be where you will get a lot of your help. You are not going to be able to go out and hire help for all of these things. I think they are going to have to be done by the people here. Some of these projects you will not be able to develop here until you do get enough personnel here to handle the work, such as your machine shop, your saw mill, etc.

Questioner: That is excellent. We will start on that track immediately. We thank you. We also, as part of our goals, want to be available for whatever work there is to be done to help the brotherhood's work and mankind's work. If you have a word or two to give us on enlightenment and encouragement we would appreciate it.

Teacher: Our work is to do anything that will further the evolution of mankind and a project of this type is designed to aid in this direction. You are not alone. There are many of these being developed and some are already developed throughout the world. Man has reached the time in his evolution where he must move on, on his own. Man, up until this point in evolution, has been more or less automatically advanced in his evolution because he does not have the mentality to do it on his own. Man went through this same state where he was pushed along and automatically evolved, although slowly. Now that you have passed the halfway mark of this cycle of evolution, or this evolutionary day as it is often called, you are going to be more and more on your own. In other words, speed with which you will evolve will depend upon the individual. Many will fall by the wayside. You know all seeds that are sown do not reach maturity. So it will be the seeds that develop the strong plant that will reach maturity. So it is up to every individual from now on. He must realize his responsibilities.

In the New Age the teachings will be much different than you find them today. Man will be taught that he is responsible for his own actions and no one else will be responsible or will accept responsibilities. For how can you ever become a strong spiritual being if someone else does your growing for you? You would not do this to your child. And neither will your Maker do it to you.

You will be taught that you are a creator, a part of the One Great Mind out of which you came. You have the power that was given you, as a part of that Great Mind, to create, and that you are creating with every thought and every deed. Today you are creating your tomorrows. In this life you are creating your next life, by your very thoughts, your very desires and your very actions. That which you desire will come to you whether it be good or whether it be evil, if that is what you desire, it will come to you. If not in this lifetime, in the next. If you think hatred, if you are resentful, selfish, self-centered, you will meet the same thing the next time around. Each one is given the opportunity to accept the Truth and to live it, to become one with love, to become one who loves his fellow man and will work

for his benefit. Those who reject this will fall by the wayside and will go on the downward path. Your great master, Jesus the Christ, used a little different way to express this. He said the greatest sin of man is to reject the Holy Spirit. That is the terminology that is used in your scriptures. And that he who did this would fall backward and have to wait until the ages rolled again. And by the ages he meant the cosmic day of the evolutionary cycle of the cosmic day which is billions and billions of years. I think I have said enough.

Questioner: You said there are other communities in the world, a few we know of. Are there one or two you might suggest to us or perhaps you have other suggestions whereby we might gain goals, purposes, bylaws, or are we better off working these out as a group ourselves?

Teacher: I think you are better off working them out to suit your situation. For each one of these you are going to find is operating under a different guide line, have a different purpose and are going to be dealing with perhaps a different type of ego than are you. You are going to have to set these up to fit your own situation. You are not planning on a commune which most of them are. And there are some who are somewhat similar to yours but each is different in its own way.

I think it would be well for you to work out that which is suitable to your situation. I would always be on the lookout for new talent. As I mentioned in the beginning, we bring about influences which starts a chain of events many times. For instance, I might bring through influences or some of my colleagues or someone to you, perhaps only to meet and become acquainted, and socialize and discuss, but this might be the only way that we could get another one to you which is much more important, or this one might bring knowledge to you. The other one is only used as a catalyst you might say. So be aware of these things and be aware of the information and contacts that some of the people might have that you might meet which would put you in touch with someone who would have information and knowledge that might become very, very important to you.

For in the New Age, and we hope to introduce many of the New Age sciences into many of these communities where they can get a pre-start, you might say, for those who are involved can gain knowledge of these things. Always remember that you are in the pursuit of knowledge. Knowledge is the roadway to spirituality. Without knowledge it will never be reached. So always be sensitive to new people that you might meet or someone that you might seemingly accidentally come in contact with which might be one of the greatest assets. Now I must leave you.

Questioner: Do you know if there is a retreat around the Mt. Shasta area or Grant's Pass area?

Teacher: I don't know of any in the Grant's Pass area. There is one at Mt. Shasta but that is not a community of this type. It is a Brotherhood there that is within the mountain. That may be moved shortly.

Questioner: For geographical reasons?

Teacher: Yes.

Questioner: Is the mountain going to blow within the next year?

Teacher: It is possible. There are going to be many of them in your chain down through California, Washington and other areas that will have their problems.

I wish to extend to each of you my love, my blessings, and may each of you grow rapidly as you seek the path of knowledge. May you always remember the key and may you develop these attributes to their fullest, for if you do, you will reap the rewards. My love and blessings I leave with you. ✨
